Half-hours in Japan Herbert Moore,1900 Drawing Programs: The Theory and Practice of Schematic Functional Programming Tom Addis,Jan Addis,2009-10-30 Drawing Programs The Theory and Practice of Schematic Functional Programming describes a diagrammatic schematic approach to programming It introduces a sophisticated tool for programmers who would rather work with diagrams than with text The language is a complete functional language that has

evolved into a representation scheme that is unique The result is a simple coherent description of the process of modelling with the computer The experience of using this tool is introduced gradually with examples small projects and exercises The new computational theory behind the tool is interspersed between these practical descriptions so that the reasons for the activity can be understood and the activity in turn illustrates some elements of the theory Access to the tool its source code and a set of examples that range from the simple to the complex is free see www.springer.com 978 1 84882 617 5 A description of the tool s construction and how it may be extended is also given The authors experience with undergraduates and graduates who have the understanding and skill of a functional language learnt through using schema have also shown an enhanced ability to program in other computer languages Readers are provided with a set of concepts that will ensure a good robust program design and what is more important a path to error free programming

Essays on the History of Mechanics Antonio Becchi,Massimo Corradi,Federico Foce,Orietta Pedemonte,2012-12-06 The history of mechanics and more particularly the history of mechanics applied to constructions constitutes a field of research that is relatively recent This volume together with the recent publication Towards a History of Construction is intended as an homage to the two eminent scholars who made a determinant contribution to the history of mechanics Edoardo Benvenuto and Clifford Truesdell
