Scorpions Claw:

Tooth and Claw J. L. Cloudsley-Thompson, 1980 The Legend of Arthax Z. Belobrajdic, 2015-05-18 In a time before our time there was a vast land called Arthax A place where mystery abounded in every corner and everywhere you went there was a story to tell The people of this land lived in a stable and peaceful environment well protected from any threats around them However little did they know that a shadow of evil was sweeping over them slowly and silently Five men from different regions of Arthax brought together by the paths that were put before them sense this threat and commit themselves to find its source and put an end to it once and for all Their commitment takes them on a journey through the land and history of Arthax It takes them to the very edge of Arthax s existence which may hang in the balance Dangerous lands old friends and enemies battles giant scorpions and wolves that control fire stand in the way Not to mention the unknown power that is growing to the east *That Cunning Mask* Gabby Ozems, 2009-10 Melodious mild sunk the crimson sun Over an earth so fated with harm Above islands primitive as woes That sally in the union of those Who hail the curfewed tear of Taila By which tear the legend of Taila And the ancient sun got entangled A ditty they upheld but mingled Ditty as harmonious as gusto Telling of a Zowdor Nemoso Tussling against the Sissi Nanna Trampling upon the Zomo Nanna Even though he conspired with the night The morning our islands went abligh History shall spare her sworn fiance As we mourn the son of Kalante

Gorb, 2016-12-13 This book surveys attachment structures and adhesive secretions occurring in this class of animals and discusses the relationships between structure properties and function in the context of evolutionary trends and biomimetic potential Topics comprise mechanical attachment devices such as clamps claws hooks spines and wraps as well as hairy and smooth adhesive pads nano fibrils suction cups and viscid and solidifying adhesives Attachment is one of the major types of interactions between an organism and its environment There are numerous studies that deal with this phenomenon in lizards frogs insects barnacles mussels and echinoderms but the second largest class of animals the Arachnida was highly neglected so far The authors demonstrated that most arachnid adhesive structures are highly analogous to those of insects and vertebrates but there are also numerous unique developments with some intriguing working principles Because arachnid attachment organs have a very strong potential of technological ideas for the development of new materials and systems inspirations from biology could also be interesting for a broad range of topics in materials and surface engineering
