The Material Landscapes of Scotland's Jewellery Craft, 1780-1914 Sarah Laurenson, 2023-06-29 Shortlisted for the History Book Award in Scotland's National Book Awards 2023 During the long 19th century Scotland was home to an established body of skilled jewellers who were able to access a range of materials from the country's varied natural landscape precious gold and silver sparkling crystals and colourful stones freshwater pearls shells and parts of rare animals Following these materials on their journey from hill and shore across the jeweller's bench and on to the bodies of wearers this book challenges the persistent notion that the forces of industrialisation led to the decline of craft It instead reveals a vivid picture of skilled producers who were driving new and revived areas of hand skill and who were key to fostering a focused cultural engagement with the natural world among both producers and consumers through the things they made By placing producers and their skill in cultural context the book reveals how examining the materiality of even the smallest of objects can offer new and multifaceted insights into the wider transformations that marked British history during the long 19th century Uniting a vast array of jewellery objects with a range of other sources including paintings engravings newspaper reports letters inventories of big houses and small workshops sketchbooks novels works of literary geology and early travel writings this book provides a deep dive into the cultural history of jewellery production through accessible thematic studies In doing so it sets out innovative methodologies for writing about the histories of craft production the natural environment and the material world Now available in a paperback edition it will be an important addition to the bookshelf of cultural historians and those interested in Scotland's wild landscapes and natural objects

Agricultural and Pastoral Landscapes in Pre-Industrial Society Fèlix Retamero, Inge Schjellerup, Althea Davies, 2014-12-01 Through a series of case studies this third volume in the Earth series deals with the technological constraints and innovations that enabled societies to survive and thrive across a range of environmental conditions The contributions are structured into three sections to draw out particular commonalities and contrasts in the choices made by pre industrial communities in the construction of varied landscapes and cultural heritage Landnam from the Old Norse for taking of land deals with

colonization including the drivers and processes through which colonizers developed an understanding of the productive potential and limitations of their new lands Fields and field systems Field walls are a distinctive and apparently timeless characteristic of many pre industrial farming landscapes but they present many the challenges to their study such as the effects of plowing abandonment and land use change and of urban development in fertile lowland zones which may eradicate reduce or conceal past systems of land use and division The importance of indirect and proxy evidence is illustrated and the value of interdisciplinary and modeling approaches emphasized Agro pastoralism focuses on the complex time space adaptations devised for managing cultivation and livestock production particularly the need to prevent stock incursions into arable fields during the growing season whilst making effective use of seasonal grazing resources The contributions focus on mountainous areas where temporary migrations in the form of transhumance provided access to a diversity of resources based around seasonal constraints on their availability and productivity *Highlanders* James MacKillop,2024-01-04

Rebellion was recurrent in the Highlands because the Gaels Scoti were an often oppressed indigenous minority in the nation Scotland to which they gave their name They spoke a language Gaelic few outsiders would learn and had their own family and social system the clans Warfare was bloody culminating in the catastrophe of Culloden Moor during the doomed quest to restore the Stuart kingship to all of Britain Economic hardship including the near genocidal Clearances in which tenant farmers were replaced with sheep drove the Gaels from the glens and islands so that most today live in the diaspora including millions in North America Although the Gaels lack a single genetic identity they clearly draw from distinct roots in the Irish Norse and Picts Despite their hardship the Gaels are also presented in romantic portrayals by the artistic elite of other nations This book offers ways in which the reader might find roots and ancestry in unfamiliar terrain Chapters discuss the landscape and language of the Highlanders the rise of clans feuds and invasions and eventual emigration **The**
