Furlong,2013 All too often public policy textbooks offer a basic grounding in the policy process without the benefit of integrating the use of policy analysis Kraft and Furlong since their first edition take a different tack They want students to understand how and why policy analysis is used to assess policy alternatives not only to question the assumptions of policy analysts but to recognize how analysis is used in support of political arguments To encourage critical and creative thinking on issues ranging from the financial bailout to rising gas prices to natural disasters the authors introduce and fully integrate an evaluative approach to policy Public Policy starts with a concise review of institutions policy actors and major theoretical models The authors then discuss the nature of policy analysis and its practice and show students how to employ evaluative criteria in six substantive policy areas Public Policy arms students with analytic tools they need to understand the motivations of policy actors both within and outside of government influence a complex yet comprehensible policy agenda Enhancements to the 4th edition All chapters have been comprehensively updated to include recent events issues and policy debates including the conduct of the wars in Afghanistan and Iraq the use of private contractors for military support and operations the rising cost of gasoline and disputes over energy policy and climate change the controversy over immigration policy requirements for financial regulation heightened concerns over economic and social inequality and the clash over reforming taxes and entitlement programs as well as dealing with the federal deficit and national debt New and updated working with sources and steps to analysis features help students investigate sources of information and apply evaluative criteria New and updated end of chapter discussion questions suggested readings and web sites **Catalog of Copyright Entries. Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4
