of Anthropology as a Holistic Science Glynn Custred,2016-04-27 A History of Anthropology as a Holistic Science defends the

holistic scientificapproach by examining its history which is in part a story of adventure and its sound philosophical

foundation It shows that activism and the holistic scientific approach need not compete with one another This book discusses

how anthropology developed in the nineteenth century during what has been called the Second Scientific Revolution It

emerged in the United States in its holistic four field form from the confluence of four lines of inquiry the British the French

the German and the American As the discipline grew and became more specialized a tendency of divergence set in that

weakened its holistic appeal Beginning in the 1960s a new movement arosewithin the discipline which called for abandoning

science as anthropology s mission in order to convert into an instrument of social change a redefinition which weakens its

effectiveness as a way of understanding humankind and which threatens to discredit the discipline      **Mathematics and**

*Nationalism and History Education* Rachel Hutchins,2016-02-26 History education by nature transmits an official version of national identity National identity is not a fixed entity and controversy over history teaching is an essential part of the

process of redefining and regenerating the nation France and the United States have in particular experienced demographic

and cultural shifts since the 1960s that have resulted in intense debates over national identity This volume examines how

each country s national history is represented in primary schools social studies textbooks and curricula and how they handle

contemporary issues of ethnicity diversity gender socio economic inequality and patriotism By analyzing each country

separately and comparatively it demonstrates how various groups including academics politicians and citizen activists have influenced education and how the process of writing and rewriting history perpetuates a nation Drawing on empirical studies of the United States and France this volume provides insight into broader nationalist processes and instructive principles for similar countries in the modern world      **The Nebraska Educational Journal** ,1925      **Texas High Schools; History and the Social Sciences** Texas.
