Photography and Exploration James R. Ryan, 2013-07-15 When Ferdinand Magellan set out to circumnavigate the globe in 1519 he wasn't able to bring a digital camera or a smartphone with him Yet as the eagerly awaited images from the Mars rover prove modern exploration is inconceivable without photography Since its invention in 1839 photography has been integral to exploration used by explorers sponsors and publishers alike and the early twentieth century advances in technology and photography's newfound cultural currency as a truthful witness to the world made the camera an indispensable tool In *Photography and Exploration* James R. Ryan uses a variety of examples from polar journeys to space missions to show how exploration photographs have been created circulated and consumed as objects of both scientific research and art Examining a wide range of photographs and expeditions Ryan considers how nations have often employed images as a means to scientific advancement or territorial conquest He argues that because exploration has long been bound up with the construction of national and imperial identity expeditionary photographs have often been used to promote claims to power especially by the West These images also challenge the way audiences perceive the world and their place within it Featuring one hundred images *Photography and Exploration* shines new light on how photography has shaped the image of explorers expeditions and the worlds they discovered

Through Astronaut Eyes Jennifer K. Levasseur, 2020-06-15 Featuring over seventy images from the heroic age of space exploration *Through Astronaut Eyes* presents the story of how human daring along with technological ingenuity allowed people to see the Earth and stars as they never had before Photographs from the Mercury Gemini and Apollo programs tell powerful and compelling stories that continue to have cultural resonance to this day not just for what they revealed about the spaceflight experience but also as products of a larger visual rhetoric of exploration The photographs tell us as much about space and the astronauts who took them as their reception within an American culture undergoing radical change throughout the turbulent 1960s This book explores the origins and impact of astronaut still photography from 1962 to 1972 the period when human spaceflight first captured the imagination of people around the world Photographs taken during those three historic programs are much admired and reprinted but rarely seriously studied This book suggests astronaut photography is particularly relevant to American culture based on how easily the images were shared through reproduction and circulation in a very visually oriented society Space photography's impact at the crossroads of cultural studies the history of exploration and technology and public memory illuminates its continuing importance to American identity

New Spaces of Exploration Simon Naylor, James R. Ryan, 2009-12-18 For many the dawn of the twentieth century ushered in an era where the world map had few if any blank

spaces left to discover The age of exploration was supposedly dead New Spaces of Exploration challenges this assumption Focusing specifically on exploration in the twentieth century the authors demonstrate how new technologies and changing geopolitical configurations have ensured that exploration has remained a key feature of our rapidly globalizing world Ranging widely in their geographical focus from the Europe and Asia to Australia and from the polar regions to outer space they demonstrate the increasing diversity of modern exploration and reveal the continuing political military industrial and cultural motivations at play The result is a major contribution to our understanding of the significance of exploration in the twentieth century Contributors include E Baigent C Collis K Dodds F Driver M Godwin J Hill F Korsmo F MacDonald S Naylor J Ryan N Thomas and K Yusoff

Race to the South Pole Kate Messner,2022-08-17 In this middle grade historical adventure a dog travels through time to take part in a voyage from New Zealand to the South Pole Ranger the time traveling golden retriever with search and rescue training joins an early twentieth century expedition journeying from New Zealand to Antarctica He befriends Jack Nin the stowaway turned cabin boy of Captain Robert Falcon Scott s ship They re racing against a rival explorer to reach the South Pole but with unstable ice killer whales and raging blizzards the journey turns into a race against time and a struggle to stay alive Praise for the first book in the Ranger in Time series This excellent story contains historical details full page illustrations and enough action to keep even reluctant readers engaged School Library Journal The third person narration expertly balances Ranger s thoughts between the appropriately doglike squirrels bacon and the heroic Ranger s drive to find and protect Kirkus Reviews McMorris s richly rendered illustrations heighten the plot s many moments of danger and drama and Messner incorporates a wealth of historical details into her rousing adventure story Publishers Weekly

Terra Antarctica William L. Fox,2011-04-15 How does the human mind transform space into place or land into landscape For more than three decades William L Fox has looked at empty landscapes and the role of the arts to investigate the way humans make sense of space In *Terra Antarctica* Fox continues this line of inquiry as he travels to the Antarctic the largest and most extreme desert on earth This contemporary travel narrative interweaves artistic cartographic and scientific images with anecdotes from the author s three month journey in the Antarctic to create an absorbing and readable narrative of the remote continent Through its images history and firsthand experiences snowmobile trips through whiteouts and his icy solo hikes past the edge of the mapped world Fox brings to life a place that few have seen and offers us a look into both the nature of landscape and ourselves

Polar Wives Kari Herbert,2012-03-09 The lives and adventures of seven intrepid women are revealed in this gem of a book as captivating as the northern landscape itself Portland Book Review Polar explorers were the superstars of the heroic age of exploration a period spanning the Victorian and Edwardian eras In *Polar Wives* Kari Herbert reveals the unpredictable often heartbreaking lives of seven remarkable women whose husbands became world famous for their Arctic and Antarctic expeditions As the daughter of a polar explorer Herbert brings a unique and intimate perspective to these stories In her portraits of the gifted sculptor Kathleen Scott eccentric traveler Jane Franklin

spirited poet Eleanor Anne Franklin Jo Peary the first white woman to travel and give birth in the High Arctic talented and determined Emily Shackleton Norwegian singer Eva Nansen and her own mother writer and pioneer Marie Herbert Kari Herbert blends deeply personal accounts of longing betrayal and hope with stories of peril and adventure Previously consigned to historical footnotes these pioneering women played vital roles in their husbands expeditions Their stories many drawn from previously unpublished journals and letters take us not only to the polar wastelands but also through war torn Macedonia the lawless outback of Australia and the plague riddled ancient cities of the Holy Land Sky's Witness C. L. Rawlins, 2014-09-30 Thoreau joked that he was a self appointed inspector of snowstorms and rainstorms never dreaming that such a need might exist But such is the author's work and that of his various helpers from ski bums to shortstops They travel the alpine wilderness at all seasons by touring skis snowshoes pack llamas float tubes and a tiny but dependable rat The remove mountain beauty where thoughts stretch for miles and days would be enough but C L Rawlins is after something more He's a backcountry hydrologist collecting rain snow and the water of high lakes to measure air pollution Alongside Rawlins we discover the natural history of the central Rockies the flowering of plants and the ways of mountain animals We learn how the Shoshoni lived in this harsh country before the arrival of settlers We see also the effect of twentieth century living on a wilderness that feels pristine but bears the chemical trace of distant smokestacks and freeways With a style that roams between natural observation and personal essay Rawlins's Sky's Witness gives access not only to the wilderness but to the ways in which we know ourselves

Antarctica John Stewart, 1990 An encyclopedic guide to Antarctic matters including geographical features expeditions people scientific subjects and general interest items for laymen and specialists Includes a chronology of exploration list of expeditions and annotated bibliography South National Maritime Museum, 2018-08-23 Had we lived I should have had a tale to tell of the hardihood endurance and courage of my companions which would have stirred the heart of every Englishman These rough notes and our dead bodies must tell the tale Extract from Scott's message to the public March 1912 The late 1890s saw the start of a heroic age in polar exploration This book tells the story of three men who were to embody the spirit of the time driven by courage determination and ambition to be the first to discover the South Pole Robert Falcon Scott Roald Amundsen and Ernest Shackleton South The Race to the Pole describes the extraordinary challenges faced and hardships endured in their attempts Scott's first British National Antarctic Expedition 1901-04 The exploits of Shackleton's British Antarctic Expedition 1907-09 The success of Amundsen's team in reaching the Pole in 1911 and the tragic events surrounding Scott's British Antarctic Expedition 1910-13 Shackleton's dramatic journey to seek rescue after the destruction of his ship *Endurance* on the Imperial Trans Antarctic Expedition 1914-17 Illustrated throughout the book contains a map depicting the routes of the various expeditions crew lists a selected bibliography and suggested reading and recommended websites This new revised edition will be thoroughly revised throughout and contain a new introduction to reflect new research and discoveries regarding these expeditions as well as

more recent attempts in travelling to the Pole in addition to containing new images from the Royal Museums Greenwich Collection **The World's Greatest Explorers** William Scheller, 1992-06-01 Relates the enterprises and discoveries of twelve explorers including Vasco da Gama Captain James Cook and Roald Amundsen Art, Design, Photo ,1975 **Alula** ,2000
