Gothic Architecture and Sexuality in the Circle of Horace Walpole Matthew M. Reeve, 2020-07-15 Gothic Architecture and Sexuality in the Circle of Horace Walpole shows that the Gothic style in architecture and the decorative arts and the tradition of medievalist research associated with Horace Walpole 1717-1797 and his circle cannot be understood independently of their own homoerotic culture Centered around Walpole's Gothic villa at Strawberry Hill in Twickenham Walpole and his Strawberry Committee of male friends designers and dilettantes invigorated an extraordinary new mode of Gothic design and disseminated it in their own commissions at Old Windsor and Donnington Grove in Berkshire Lee Priory in Kent the Wyne in Hampshire and other sites Matthew M. Reeve argues that the new third sex of homoerotically inclined men and the new modern styles that they promoted including the Gothic style and chinoiserie were interrelated movements that shaped English modernity The Gothic style offered the possibility of an alternate aesthetic and gendered order a queer reversal of the dominant Palladian style of the period Many of the houses built by Walpole and his circle were understood by commentators to be manifestations of a new queer aesthetic and in describing them they offered the earliest critiques of what would be called a queer architecture Exposing the role of sexual coteries in the shaping of eighteenth century English architecture this book offers a profound and eloquent revision to our understanding of the origins of the Gothic Revival and to medievalism itself It will be welcomed by architectural historians as well as scholars of medievalism and specialists in queer studies

Gender Studies in Architecture Dörte Kuhlmann, 2014-04-11 Analyzing a range of ideas from biological evolutionary and anthropological theories to a variety of feminist psychoanalytic poststructuralist and constructivist discourses this book provides a comprehensive introduction to the problematics of gender and power in architectural and urban design Topics range from conceptions of postulated matriarchal architecture in Old Europe to contemporary technologies of control from the mechanisms of gaze to architectural performatives from the under representation of women in the planning profession to the integration of gender issues to the curriculum The particular strengths of the book lie in its inclusiveness and critical analysis It is not a partisan defence of feminism or any other theory but a critical introduction to

the issues relating to gender Moreover the conclusions reach beyond a narrow gender studies perspective to social and ethical considerations that are unavoidable in any responsible architectural or urbanistic practice With its broad range and balanced analysis of different theories the book is suitable as an overview of gender studies in architecture and useful for any designer who is concerned with the social effects of the built environment [Mechanisms Driving Karyotype Evolution and Genomic Architecture](#) Aurora Ruiz-Herrera,Marta Farré-Belmonte,2021-08-31 Understanding of the origin of species and their adaptability to new environments is one of the main questions in biology This is fueled by the ongoing debate on species concepts and facilitated by the availability of an unprecedented large number of genomic resources Genomes are organized into chromosomes where significant variations in number and morphology are observed among species due to large scale structural variants such as inversions translocations fusions and fissions This genomic reshuffling provides in the long term new chromosomal forms on which natural selection can act upon contributing to the origin of biodiversity This book contains mainly articles reviews and an opinion piece that explore numerous aspects of genome plasticity among taxa that will help in understanding the dynamics of genome composition the evolutionary relationships between species and in the long run speciation **Exploring Gender in Vernacular Architecture** Jessica Ellen Sewell,2025-02-03 In Exploring Gender in Vernacular Architecture Jessica Ellen Sewell considers the gender of those who create and shape spaces how gender ideology contributes to and manifests itself in built form and what research methods make the observation of gendered experience possible She discusses single gender mixed gender and queer spaces providing a comprehensive look at how gender influences the design and construction of those spaces how those spaces are used and the relationship between gender and the broader architectural landscape In her study Sewell also provides an expansive view of how gender intersects with other categories of power and difference such as race class and age and how this intersectionality contributes to the design and use of built spaces In addition to examining the spaces themselves Sewell explores research methods for studying gendered experiences in architecture She argues that traditional research methods in vernacular architecture studies which often focus on building based fieldwork should be complemented by other methods such as letters oral histories and diaries that expand the understanding of buildings beyond their construction date and reveal how those buildings have been used and represented over time Digging into primary records Sewell posits can help challenge our assumptions about who influences architecture and urban development illuminating the roles of women and others in the building and shaping of space Thoroughly researched yet accessible for scholars new to the study of vernacular architecture Exploring Gender in Vernacular Architecture bridges the gap between specialized scholarship and broader public understanding Students of architectural history gender studies and cultural history will find it a valuable resource not only for examining the relationship between gender and architecture but for engaging new methodological tools that may further their own research **Architecture of Threshold Spaces** Laurence Kimmel,2021-12-30 This book explores the relationship between

architecture and philosophy through a discussion on threshold spaces linking public space with publicly accessible buildings. It explores the connection between exterior and interior and how this creates and affects interactions between people and the social dynamics of the city. Building on an existing body of literature, the book engages with critical philosophy and discusses how it can be applied to architecture. In a similar vein to Walter Benjamin's descriptions of the Parisian Arcades in the nineteenth century, the book identifies the conditions under which thresholds reveal and impact social life. It utilises a wide range of illustrated international case studies from architects in Japan, Norway, Finland, France, Portugal, Italy, the USA, Australia, Mexico, and Brazil. Within the examples, thresholds become enhancers of social interactions and highlight broader socio-political contexts in public and private space. *Architecture of Threshold Spaces* is an enlightening contribution to knowledge on contemporary architecture, politics, and philosophy for students, academics, and architects.

Architecture and the Politics of Gender in Early Modern Europe Helen Hills, 2018-05-08. Written by leading scholars in the field, the essays in this book address the relationships between gender and the built environment, specifically architecture in early modern Europe. In recent years, scholars have begun to investigate the ways in which architecture plays a part in the construction of gendered identities. So far, the debates have focused on the built environment of the nineteenth and twentieth centuries, to the neglect of the early modern period. This book focuses on early modern Europe, a period decisive for our understanding of gender and sexuality. Much excellent scholarship has enhanced our understanding of gender division in early modern Europe, but often this scholarship considers gender in isolation from other vital factors, especially social class. Central to the concerns of this book, therefore, is a consideration of the intersections of gender with social rank. *Architecture and the Politics of Gender in Early Modern Europe* makes a major contribution to the developing analysis of how architecture contributes to the shaping of social relations, especially in relation to gender in early modern Europe.

A balance of sophistication and clarity in the writing, authoritative entries, and strong cross-referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture. The contents feature major architects, firms, and professional issues, buildings, styles, and sites, the architecture of cities and countries, critics, and historians, construction materials, and planning topics, schools, movements, and stylistic and theoretical terms. Women, Practice, Architecture Naomi Stead, 2016-01-08 The image of the architect is undeniably gendered While the male architect might be celebrated as the ideal man in Hollywood romantic comedies blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle the image of the woman architect is not so clear cut While women have been practicing and excelling in architecture for more than a hundred years their professional identity as constructed in the media is complex and sometimes contradictory This book explores the working lives and aspirations of women in architectural practice but more than this it explores how popular media newspapers magazines and websites serve to define and describe who a woman architect should be what she should look like and how she should behave Looking further into the way that professional characteristics are reinforced through awards like the Pritzker Prize the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine but instead a complex hybrid owing much to historic concepts of genius Drawing on history sociology media analysis and feminist theories of architectural practice the book will be of interest to all of those who seek to better understand the image and identity of the architect This book was published as a double special issue of Architectural Theory Review

Creating Gender in the Garden Barbara Deutschmann, 2022-02-24 Winner of the 2023 ANZATS Award for the Best Monograph by an Emerging Scholar What can explain the persistence of gender inequality throughout history Do narratives such as the Eden story explain that dissymmetry or contribute to it This book suggests that the Hebrew Bible began and has sustained a rich conversation about sex and gender throughout its life A literary study of the Garden of Eden story reveals a focus on the human partnership as integral to the divine creation project Texts from other Hebrew Bible genres build a picture of robust and flexible partnerships within a patriarchal framework In popular culture Eve still carries the stench of guilt while Adam seemingly unscathed by Eden events remains a positive symbol of manhood This book helps

explain why they have had such different histories The book also charts the subversive alternate streams of interpretation of women s writings and rabbinic texts The story of Adam and Eve demonstrates how conceptions of gender in both ancient and modern worlds reflect larger philosophical schemes Far from existing as timeless verities female and male relations are constructed according to cultural imperatives of the day Understanding the different ways that Adam and Eve have been conceived gives us perspective on our own twenty first century gender architecture **Negotiating Domesticity** Hilde Heynen, Gulsum Baydar, 2005 A series of essays to challenge and stimulate examining the links between gender domesticity and architecture from a number of different perspectives and disciplines
