with increased hostility and sectarian violence in Iraq gave rise to a complex and transnational identity. Faced with Islamophobia in the US, Chaldeans were at pains to emphasize a Christian identity and appropriated the ancient pre-Islamic history of their namesake as a means of distinction between them and other immigrants from Arab lands. In this, the first ethnographic history of the modern Chaldeans, Yasmien Hanoosh explores these ancient modern inflections in contemporary Chaldean identity discourses: the use of history as a collective commodity for developing and sustaining a positive community image in the present and the use of language revival and monumental symbolism to reclaim association with Christian and pre-Christian traditions. The Trans-Saharan Slave Trade John Wright, 2007-04-03. This compelling text sheds light on the

important but under-studied trans-Saharan slave trade. The author uncovers and surveys this, the least noticed of the slave trades out of Africa, which from the seventh to the twentieth centuries quietly delivered almost as many black Africans into foreign servitude as did the far busier but much briefer Atlantic and East African trades. Illuminating for the first time a significant but ignored subject, the book supports and widens current scholarly examination of Africans' essential role in the enslavement of fellow Africans and their delivery to internal Atlantic or trans-Saharan markets. **The Publishers Weekly**

The nature of security in Europe has been transformed in recent years. Security in 21st Century Europe argues that the defining feature of contemporary European security is the existence of a security community underpinned by the twin institutions of the EU and NATO, but that today the European security community, NATO and the EU face a growing array of external challenges and their ability to respond to those challenges is increasingly being called into question. Offering a systematic assessment of security in contemporary Europe, this third edition examines the changing character of European security and assesses the extent of the threats posed by recent challenges as well as the policy dilemmas involved in responding to these challenges. It explores Europe's engagement with core thematic issues in European security, including military intervention, nuclear weapons, terrorism and non-military security. Providing both a substantive contribution to academic thinking on European security and a overview of debates on contemporary European security, this new edition offers 3 new chapters on migration, climate change and cybersecurity. Coverage of all recent major developments related to European security, including the Syrian civil war and the regional destabilization arising from it, Russia-Ukraine crisis, the rise of populism, the migration crisis, the acceleration of China's rise. Security in 21st Century Europe combines theory and detailed empirical analysis, exploring both how different theoretical perspectives can help us think about European security and concrete empirical developments in European security policies and institutions. This text is the perfect companion for advanced undergraduate and Master's level courses on European security, whether within courses in Security studies, European studies or International Relations. *The English Catalogue of Books ...* Sampson Low, 1893.
