Short Term Parent Infant Psychotherapy:

Short-term Parent-infant Psychotherapy Paul V. Trad,1993 In case studies replete with descriptions of assessment and treatment psychiatrist Trad examines the developmental principles that ensure a steady course of growth and maturation for the infant He proposes a dynamic model of intervention that relies on the developmental phenomenon of previewing for assessing interpersonal behavior in the parent infant dyad Annotation copyright by Book News Inc Portland OR

Neurodevelopmental Parent-Infant Psychotherapy and Mindfulness Maria Pozzi Monzo,2019-12-05 This innovative book explains and introduces the use of mindfulness in therapeutic work with parents and babies covering issues such as feeding crying sleeping and relating as well as other developmental challenges which affect family life as practiced in both clinical sessions and in the home The book is divided into two parts Part 1 introduces 1 what parent infant psychotherapy is its origin and evolution 2 mindfulness which consists in paying attention in a purposeful way in the present moment and not judgementally and 3 the development and maturation of the brain and nervous system and how they are affected by the environment in utero and after birth Part 2 then goes on to explore a range of topics such as parental mental illnesses immigration dislocation loss guilt substance misuse abuse post natal depression congenital malformations and the role of fathers It describes how these factors impact the parental relationship with and the healthy development of the infant drawing from relevant research to demonstrate the effectiveness of parent infant psychotherapy and mindfulness The practice of psychoanalytic psychotherapy aided by mindfulness is a useful intervention for distressed families with infants while a mindful approach to oneself and one's baby can ease parental anxiety and free loving capacities Neurodevelopmental Parent Infant Psychotherapy and Mindfulness is an essential resource for clinicians and researchers working on parent and infant relations and will also appeal to curious new or future parents

An Integrated Approach to Short-Term Dynamic Interpersonal Psychotherapy Joan Haliburn,2018-03-26 Short term dynamic interpersonal psychotherapy is an integrated trauma informed contemporary dynamic way of working with a range of mental health difficulties Flexible though structured phase oriented focused and time limited it is informed by the Conversational Model Attachment and Interpersonal Theories and Brief Psychodynamic Psychotherapies which are briefly described It provides clinicians with a way of working with patients whose difficulties do not warrant long term therapy who prefer a talking therapy or who have failed cognitive behaviour therapies With the help of examples it guides the process of assessment and therapy with trauma in mind using Conversational Model techniques where empathy replaces confrontation resistance is seen as a fear of re traumatization defence mechanisms are regarded as adaptive coping mechanisms which later become maladaptive transference interventions replace interpretations and self reflective capacity is encouraged rather than just insight Separation anxiety is addressed and anxiety provoking techniques are avoided given that anxiety is a large part of most presentations

The Practice of Psychoanalytic Parent-Infant Psychotherapy Tessa Baradon,Michela Biseo,Carol Broughton,Jessica

James, Angela Joyce, 2016-01-13 *The Practice of Psychoanalytic Parent Infant Psychotherapy* is a comprehensive handbook addressing the provision of therapeutic help for babies and their parents when their attachment relationship is troubled and a risk is posed to the baby's development. Drawing on clinical and research data from neuroscience, attachment and psychoanalysis, the book presents a clinical treatment approach that is up to date, flexible and sophisticated whilst also being clear and easy to understand. The first section, 'The theory of psychoanalytic parent infant psychotherapy', offers the reader a theoretical framework for understanding the emotional interactional environment within which infant development takes place. The second section, 'The therapeutic process', invites the reader into the consulting room to participate in a detailed examination of the relational process in the clinical encounter. The third section, 'Clinical papers', provides case material to illustrate the unfolding of the therapeutic process. This new edition draws on evidence from contemporary research with new material on embodied communication between parent and infant and clinician/patient's fathers and fathering. Engagement of at-risk populations. Written by a team of experienced clinicians, writers, teachers and researchers in the field of infant development and psychopathology, *The Practice of Psychoanalytic Parent Infant Psychotherapy* will be an essential resource for all professionals working with children and their families, including child psychiatrists, psychoanalysts, psychotherapists and clinical and developmental psychologists.

Innovations in Parent-Infant Psychotherapy Maria Pozzi Monzo, Beverley Tydeman, 2018-05-01 This book has emerged from the authors' excitement about the proliferation of parent infant psychotherapy work around the world, including Australia, Brazil, Europe, South Africa and the United States. It shows how the therapy connects with the culture of the family, inspired by the wider community.

Parent-Infant Psychotherapy for Sleep Problems Dilys Daws, Sarah Sutton, 2020-04-07 Sleep problems are among the most common, urgent and undermining troubles parents meet. This book describes Dilys Daws' pioneering method of therapy for sleep problems, honed over 40 years of work with families. It offers brief psychoanalytic therapy with parents and infants together, offering tried and tested ways of helping parents work things out better with their babies when such problems arise. This new edition of Dilys Daws' classic work, updated with expert help from Sarah Sutton, frees professionals from the burden of feeling they need to rush to give advice to families, showing instead how to begin the challenging journey of discovering new emotions that every baby brings. It sheds light on the sleep problem in the context of a whole range of aspects of the early world: the regulation of babies' physiological states, dreams and nightmares, the development of separateness, separation and attachment problems and connections with feeding and weaning. This much-needed, compassionate and well-informed guide to helping parents and babies with sleep problems draws on twenty-first century development research and rich clinical wisdom to offer ways of understanding sleep problems in each individual family context, with all its particular pressures and possibilities. It will be treasured by new parents struggling with sleeplessness and is enormously valuable for anyone working with parents and their babies.

Martín Maldonado-Durán, 2008-08-13 Countless studies have demonstrated the power of early intervention to permanently alter the course of a child's life Yet heightened by the past decade's research breakthroughs in genetics the nature vs nurture controversy rages on This volume dispels some of the persistent myths surrounding this controversy Unlike largely theoretical texts that describe infant behavioral and emotional difficulties and other psychosocial challenges affecting young children this eminently practical guide illustrates what to do in numerous clinical situations with actual patients Written by clinicians who work with infants and children and their families every day this reality based approach addresses the most common and important problems in infant psychopathology e.g. trauma sleep feeding excessive crying attachment disruptions covering models of intervention from pregnancy through infancy attachment issues and transgenerational themes Here you'll find topics rarely addressed elsewhere The theoretical and clinical implications of trauma during early childhood and its effects on emotional regulation cognition and attachment including potential disruptions of attachment a topic widely overlooked in the life of young children perhaps because of the distress it produces in adults to think that infants can be subject to violence witness major traumatic events and experience consequences from such events Techniques such as multimodal parent infant psychotherapy for working effectively with families once considered unreachable who are under severe stress and have endured multiple disruptions disappointments and marginalization A timely discussion of a rarely addressed problem on the importance of early intervention and the effects of day care for infants from the point of view of the infant exposed to multiple caretakers addressing the very difficult questions of the effects on infants of changes in caretakers How young children use their bodies and its functions to manifest their difficulties focusing on sleeping crying and eating with practical suggestions that can be widely applied by health care professionals Unique commentaries on two case examples by a diverse international panel of clinicians and researchers from countries such as Argentina Canada France Japan Mexico Switzerland the UK and the US illustrating the differences of opinion approaches and perspectives that together generate more effective assessment and treatment This thought provoking clinical reference is a must read for developmental child and adolescent psychiatry educators and practitioners and nurses pediatricians occupational therapists and clinical social workers as they help the youngest members of our community through theoretical understanding and practical intervention Individualized Psychotherapy Treatment of Young People With Mental Disorders Giada Pietrabissa, Stefanie Julia Schmidt, Henriette Loeffler-Stastka, Randi Ulberg, 2022-04-20 Trauma and Attachment in the Kindertransport Context Iris Guske, 2009-03-26 The present volume is the result of an interdisciplinary oral history research project which was carried out at the Centre for German Jewish Studies at the University of Sussex It focuses on the Kindertransport the British rescue operation saving 10 000 predominantly German Jewish children from Nazi Germany and is based on in depth case studies of five child survivors

of the Holocaust Looking at human development over the life cycle as mediated by intervening trauma was at the heart of the project which examined the making and breaking of a child's close ties to significant others processes of identity formation under acculturative stress as well as the creation and recall of traumatic memories The study is thus one of the few in the field of attachment research which sheds light on the lifelong influence which early attachment has on coping with massive cumulative trauma The former child refugees narratives are enriched by letters diaries or articles written by them and their host families as well as by interviews conducted with family members and friends Consequently we can look at individual lives and collective destinies from more than one perspective as we are provided with rich multi layered accounts of people's whole life trajectories While each Holocaust survivor's developmental story is unique it is however linked to the others by the common experience of negotiating an identity between two countries cultures and religions against the background of unparalleled political upheavals and as such also sheds light on and offers ways out of the traumata suffered in present day contexts of enforced migration and displacement
