pt. 1 and a section of vol. 4, pt. 3 of the major series Joseph Needham, 1978 Joseph Needham's *Science and Civilisation in China* is a monumental piece of scholarship which breaks new ground in presenting to the Western reader a detailed and coherent account of the development of science technology and medicine in China from the earliest times until the advent of the Jesuits and the beginnings of modern science in the late seventeenth century. It is a vast work necessarily more suited to the scholar and research worker than the general reader. This paperback version abridged and re-written by Colin Ronan makes this extremely important study accessible to a wider public. The present book covers the material treated in volumes I and II of Dr Needham's original work. The reader is introduced to the country of China its history geography and language and an account is given of how scientific knowledge travelled between China and Europe. The major part of the book is then devoted to the history of scientific thought in China itself. Beginning with ancient times it describes the milieu in which arose the schools of the Confucians Taoists Mohists Logicians and Legalists. We are thus brought on to the fundamental ideas which dominated scientific thinking in the Chinese Middle Ages to the doctrines of the Two Forces Yin and Yang and the Five Elements wu hsing to the impact of the sceptical tradition and Buddhist and Neo Confucian thought. Publisher description

The Shorter Science and Civilisation in China: Volume 2 Colin A. Ronan, 1985-06-20 In the second volume of his abridgement of Joseph Needham's original text Colin Ronan looks in detail at the early Chinese contributions to various sciences. The first section deals with mathematics and it is shown that the Chinese works were comparable with the pre Renaissance achievements of the old world. This account is written with the non mathematician in mind. The text is next concerned with the sciences of astronomy and meteorology followed by the Earth sciences geography cartography geology seismology and mineralogy. Volume 2 closes with a description of some aspects of Chinese physics including their predilection for the wave theory as opposed to particles metrology statics hydrostatics heat light and sound

The Shorter Science and Civilisation in China: Volume 1 Colin A. Ronan, 1980-06-19 Joseph Needham's *Science and Civilisation in China* is a monumental piece of scholarship which breaks new ground in presenting to the Western reader a detailed and coherent account of the development of science technology and medicine in China from the earliest times until the advent of the Jesuits and the beginnings of modern science in the late seventeenth century. Ronan,1995-09-14 This fifth volume of Colin Ronan s abridgement of Joseph Needham s monumental work is concerned with the remarkable engineering feats made during the early and medieval periods No other country did more in civil engineering both as to scale and skill than China The book opens with an account of the road system which compared favorably with that of the Roman Empire

Naturally the Great Wall of China is covered in some detail within the social context of walls which more than any other structure mark the basic features of Chinese communities The Chinese genius for town planning and achievements in hydraulic engineering are covered in later chapters This book provides many clues as to the influence of Chinese innovation on Western engineering trends and will fascinate readers who are interested in the history of science and Chinese civilization

Science and Civilisation in China, Part 2, Mechanical Engineering Joseph Needham, 1965-01-02 As Dr Needham's immense undertaking gathers momentum it has been found necessary to subdivide volumes into parts each to be bound and published separately The first part of Volume 4 already published deals with the physical sciences the second with the diverse applications of physics in the many branches of mechanical engineering and the third will deal with civil and hydraulic engineering and nautical technology With this part of Volume 4 then we come to the application by the Chinese of physical principles in the control of forces and in the use of power we cross the frontier separating tools from the machine We have already noticed that the ancient Chinese concept of *chi* somewhat similar to the *pneuma* of the Greeks asserted itself prominently in acoustics but we discover here that the Chinese tendency to think pneumatically was also responsible for a whole range of brilliant technological achievements for example the double acting piston bellows the rotary winnowing fan and the water powered metallurgical blowing machine ancestor of the steam engine as well as for some extraordinary insights and predictions in aeronautics
