Smith, 2013-12-17 If human burials were our only window onto the past what story would they tell Skeletal injuries constitute the most direct and unambiguous evidence for violence in the past Whereas weapons or defenses may simply be statements of prestige or status and written sources are characteristically biased and incomplete human remains offer clear and unequivocal evidence of physical aggression reaching as far back as we have burials to examine Warfare is often described as senseless and as having no place in society Consequently its place in social relations and societal change remains obscure The studies in The Routledge Handbook of the Bioarchaeology of Human Conflict present an overview of the nature and development of human conflict from prehistory to recent times as evidenced by the remains of past people themselves in order to explore the social contexts in which such injuries were inflicted A broadly chronological approach is taken from prehistory through to recent conflicts however this book is not simply a catalogue of injuries illustrating weapon development or a narrative detailing progress in warfare but rather provides a framework in which to explore both continuity and change based on a range of important themes which hold continuing relevance throughout human development **Goldman-Cecil**

**Conflict** David M. Buss, Neil Malamuth, 1996-04-11 Sexual harassment in the workplace date rape and domestic violence dominate the headlines and have recently sparked scholarly debates about the nature of the sexes Concurrently the scientific community is conducting research in topics of sex and gender issues Indeed more research is being done on the topics of sexual conflict and coercion than at any other time in the history of the social sciences Despite this attention it is clear that these issues are being addressed from two essentially different perspectives one is labeled feminist while the other viewed as antithetical to the feminist movement is called evolutionary psychology which emphasizes the history of reproductive strategies in understanding conflict between the sexes This book brings together leading experts from both sides of the debate in order to discover how each could offer insights lacking in the other The editors overall goal is to show how the feminist and evolutionary approaches are complementary despite their evident differences then provide an integration and synthesis In fact several of the contributors to this unique volume consider themselves advocates of both approaches As a stimulating presentation of the dynamics of sex power and conflict and a pioneering rapprochement of the diverse tendencies within the scientific community this book will attract a wide audience in both psychology and women s studies fields *The Cemeteries of Abydos* Edouard Naville, 1914 War, Peace, and Human Nature Douglas P.
