social transformation comes into being through an active process of deconstructing and reconstructing shared norms and ideas. The contents in this book are thus centered around two focuses: the impacts of identities and grassroots. Both of these aspects are at the heart of each country's transformations towards democracy, peace, justice and freedom. Under this framework, the chapters cover a diverse range of common issues such as minority grievances, gender inequality, ethnic identity, grassroots power in alliance making towards community peace, recovery and resilience, digital freedom, democracy assistance and communication, and bridging multiple divides. As identity-based cleavages are daily lived experiences for individuals and communities, it requires grassroots initiatives and alliances as well as democratic communication to tackle obstacles at the root. Ultimately, the book convinces readers that social transformations must begin at the individual to communal level and local to national level.

Thai Agriculture Lindsay Falvey, 2000. The history, science and social aspects of today's Thai agriculture is traced from hunters and gatherers through agro-cities through State religious Empires and immigrating Tai to produce a sustainable agriculture. The wet glutinous rice culture determined administrative structures in a pragmatic society which regularly produced a saleable surplus. Continuing today, these systems consolidated the importance of rice agriculture to national security and economic well-being as Chinese and European influence benefited agribusiness and initiated the demand which would expand agriculture through population increase until accessible land was expended. As agriculture declined in relative financial importance, it continued to provide the benefits of employment, crisis resilience, self-sufficiency, rural social support and cultural custody. Agricultural institutions evolved from a taxation and dispute resolution base to provide research, education and technology transfer at levels below potential as they supported commercial agriculture funded by credit. Agribusiness expanded from the 1960s and small holders were partly viewed as a past relic which agribusiness could modernise. Unique elements of Thai agriculture include irrigation technologies, administrative structures based on water control, global leadership in many agricultural commodities, multinational agribusiness negotiating approaches, potential for further increases from known technologies and an open culture which has embraced new ideas. One of the world's few major agricultural exporters, Thailand leads the world in rice, rubber, canned pineapple and black tiger prawn production and export, the region in chicken meat export and several other commodities and feeds more than four times its own population from less intensive agriculture than its neighbours. Poised to benefit from expansion in livestock demand, poverty reduction and improved education, research and legal and social systems evident in the recent Asian financial crisis will be considered with popular concern for socially sensitive alternatives for small holder farmers to co-exist with commercial agriculture. Thailand will likely remain one of the world's major agricultural countries in social, environmental and economic terms for the foreseeable future as it addresses the continuing rural issues of poverty and inequity.

A History of Manners and Civility in Thailand Patrick Jory, 2021-01-07. Manners have long been a central concern of Thai society. Kings, aristocrats, prime ministers, monks, army generals, politicians, poets, novelists, journalists and teachers have

produced a large corpus of literature that sets out models of appropriate behaviour These include such things as how to stand walk sit pay homage prostrate oneself in the presence of high status people sleep eat manage bodily functions dress pay respect to superiors deal with inferiors socialize and play These modes of conduct have been taught or enforced by families monasteries court society and in the twentieth century the state through the education system the bureaucracy and the mass media In this innovative new social history based on Thai manners and etiquette manuals dating from the early nineteenth century to the late twentieth century Patrick Jory presents the first ever history of manners in Thailand and challenges the idea of Western influence as the determinant of change in ideals of conduct □□□□□2021 COMM
