

The background of the book cover is a photograph of a cityscape. In the foreground, there are several multi-story buildings with balconies, some of which appear to be in a state of disrepair or are makeshift structures. In the background, a prominent skyscraper with a pointed top is visible against a hazy sky. A young girl with dark hair, wearing a light-colored shirt, is standing in the lower right foreground, looking towards the camera.

Siamese Tragedy:

A Siamese Tragedy Walden F. Bello, Shea Cunningham, Kheng Poh Li, 1998 Thailand has come to be known as the Fifth Tiger With the Asian economic collapse of 1997 1998 this book poses the central question Is this merely a short term crisis or is there a real prospect of Thailand being pushed back into Third World status The International Monetary Fund has intervened with an irrelevant indeed damaging policy package that promises to determine the outcome *A Siamese Tragedy* argues that even before the collapse the Thai economy had feet of clay Walden Bello and his co authors show how vested interests local and international propelled the Thai people down a particular path which is unsustainable in terms of human exploitation social disruption ecological damage and economic fragility Thailand like the rest of the world needs to rethink the fundamentals of its economic model

Contested Waterscapes in the Mekong Region Francois Molle, Tira Foran, Mira Kakonen, 2012-05-04 The catchment area of the Mekong River and its tributaries extends from China through Burma Myanmar Thailand Laos Cambodia and to Vietnam The water resources of the Mekong region from the Irrawaddy and Nu Salween in the west across the Chao Phraya to the Lancang Mekong and Red River in the east are increasingly contested Governments companies and banks are driving new investments in roads dams diversions irrigation schemes navigation facilities power plants and other emblems of conventional development Their plans and interventions should provide some benefits but also pose multiple burdens and risks to millions of people dependent on wetlands floodplains and aquatic resources in particular the wild capture fisheries of rivers and lakes This book examines how large scale projects are being proposed justified and built How are such projects contested and how do specific governance regimes influence decision making The book also highlights the emergence of new actors rights and trade off debates and the social and environmental consequences of water resources development This book shows how diverse and often antagonistic ideologies and interests are contesting for legitimacy It argues that the distribution of decision making political and discursive power influences how the waterscapes of the region will ultimately look and how benefits costs and risks will be distributed These issues are crucial for the transformation of waterscapes and the prospects for democratizing water governance in the Mekong region The book is part of the action research of the M POWER Mekong Program on Water Environment and Resilience knowledge network Published with IFAD CG AR Challenge Program on Water Food M POWER Project ECHEL EAU and HEINRICH BOLL STIFTUNG

Thailand Maurizio Peleggi, 2007-05-30 Tourist brochures and travel guides depict Thailand as an exotic country with a rich cultural heritage strong religious traditions and a popular monarchy Historians also contribute to Thailand's international allure with chronicles of its unique historical and cultural continuity in comparison to the other southeast Asian countries whose histories are stained by colonialism and nationalist struggles for independence Thailand challenges these stereotypes with a reinterpretation as well as an introduction to the emergence of Thailand as a nation state The book argues that the development of Thai nationhood was a long term process shaped by interactions with the outside

world its pursuit of civilization and more recently globalization Maurizio Peleggi's original account investigates among other issues the evolution of the geographical and linguistic landscapes changes in class and gender relations the role of institutions and ideologies modern cultural expressions social memory and the conception of the Thai national self as contrasted against the racial and cultural Others of Burmese Chinese and Westerners Thailand is a concise and compelling introduction to the complexities that lie behind Thailand's exotic facade

Alternative Capitalisms Robert Gwynne, Denis Shaw, Thomas Klak, 2014-05-12 This book aims to examine the effects of globalization and economic and political transformations in those parts of the world which are now regularly referred to as emerging regions These are Latin America and the Caribbean East Central Europe and the former Soviet Union and East Asia This book breaks new ground in three areas First of all it develops a critique of the use of the term emerging regions for geographers and social scientists and relates this to world systems theory Secondly it explores the development trajectories and challenges of countries in this so called emerging world countries that will be crucial to the evolution of the world economy in the twenty first century Thirdly it compares and contrasts the pathways of both economic and political change in the three world regions under focus This is a unique approach in terms of books published in both geography and the social sciences Within the context of the three world regions the book combines historical and contemporary analysis of the evolving world system In these regions we are concerned to understand the historical expansion and extension of capitalism and how its contemporary forms of production exchange and regulation are evolving The authors believe that at the present time these processes have produced alternative capitalisms economic and associated developments which while assuredly capitalist differ in various ways from those typical of the capitalist West or core economies of North America and Western Europe

Megacities Andre Sorensen, Junichiro Okata, 2010-11-18 For the first time in human history more than half the world's population is urban A fundamental aspect of this transformation has been the emergence of giant cities or megacities that present major new challenges This book examines how issues of megacity development urban form sustainability and unsustainability are conceived how governance processes are influenced by these ideas and how these processes have in turn influenced outcomes on the ground in some cases in transformative ways Through 15 in depth case studies by prominent researchers from around the world this book examines the major challenges facing megacities today The studies are organized around a shared set of concerns and questions about issues of sustainability land development urban governance and urban form Some of the main questions addressed are What are the most pressing issues of sustainability and urban form in each megacity How are major issues of sustainability understood and framed by policymakers Is urban form considered a significant component of sustainability issues in public debates and public policy Who are the key actors framing urban sustainability challenges and shaping urban change How is unsustainability risk or disaster imagined and how are those concerns reflected in policy approaches What has been achieved so far and what challenges remain The publication of this book is a step toward answering these and other

Political Booms: Local Money And Power In Taiwan, East China, Thailand, And The Philippines Lynn T White, 2009-06-10 Why have Taiwan rich parts of China and Thailand boomed famously while the Philippines has long remained stagnant both economically and politically Do booms abet democracy Does the rise of middle classes promise future liberalization Why has Philippine democracy brought no boom and barely served the Filipino people This book unlike most previous studies shows that both the roots and results of growth are largely political rather than economic Specifically it pays attention to local not just national power networks that caused or prevented growth in the four places under consideration Violence has been common in these polities along with money Elections have contributed to socio political problems that are also obvious in Leninist or junta regimes because elections are surprisingly easy to buy with corrupt money from government contracts Liberals should pay more serious theoretical attention to the effects of money on justice and Western political science should focus more clearly on the ways non state local power affects elections By considering the

effects on fair justice of local money and power largely from small and medium sized firms that emerge after agrarian reforms this book asks democrats to face squarely the extent to which electoral procedures fail to help ordinary citizens Students and scholars of Asia will all need this book as will students of the West whose methods have become parochial

Leadership in a Slum Alan R. Johnson,2009 In Leadership in a Slum Johnson looks at leadership in the Thai social context from a different angle than traditional studies which measure well educated Thais on leadership scales derived in the West Seeking a cultural account of social influence processes he turns to those who have been left behind in the race to participate in a globalizing world the urban poor Using both systematic data collection and participant observation he develops a culturally preferred model as well as a set of models based in Thai concepts that reflect on the ground realities Johnson also examines the community state relationship and finds that in the face of state power that brings both development and the forces of eviction the community and its leaders are not passive in this relationship but modify reject or resist state views in their various forms He concludes by looking at the implications of his anthropological approach for those who are involved in leadership training in Thai settings and beyond This work challenges the dominance of the patron client rubric for understanding all forms of Thai leadership and offers an alternative view for understanding leadership rooted in local social systems to approaches that assume the universal applicability of leadership research findings across all cultural settings
