Converse,2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress

on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs

geographical and political challenges in North Vietnam and use limited air power more effectively In 1972 the two Linebacker campaigns joined with other air operations to make a dramatic although temporary difference While they unleashed powerful B 52 area bombers the campaigns also demonstrated the efficacy of newly developed laser guided precision bombs Drawing upon twenty years of research in classified records Wayne Thompson integrates operational political and personal detail to present a full history of the Air Force role in the war against North Vietnam He provides an unprecedented view of the motivations and actions of the people involved from aircrews to generals to politicians in every phase of the air campaigns He outlines for instance the political reasons for President Johnson s reluctance to use B 52 bombers against major North Vietnamese targets He also examines how the media influenced US policy and how US prisoners became the war s most celebrated heroes The war in Southeast Asia ultimately pushed the Air Force toward adopting more flexible tactics and incorporating increasingly sophisticated weapons that would shape later conflicts

*Bloody Sixteen* Peter Fey, 2018-05 Strategy and reality collide in Peter Fey s gripping history of aircraft carrier USS Oriskany s three deployments to Vietnam with Carrier Air Wing 16 CVW 16 Its tours coincided with the most dangerous phases of Operation Rolling Thunder the ill fated bombing campaign against North Vietnam and accounted for a quarter of all the naval aircraft lost during Rolling Thunder the highest loss rate of any carrier air wing during Vietnam The Johnson administration s policy of gradually applied force meant that Oriskany arrived on station just as previous restrictions were lifted and bombing raids increased As a result CVW 16 pilots paid a heavy price as they ventured into areas previously designated off limits by Washington DC Named after one of the bloodiest battles of the Revolutionary War the Oriskany lived up to its name After two years of suffering heavy losses the ship caught fire a devastating blow given the limited number of carriers deployed With only three months allotted for repairs Oriskany deployed a third and final time and ultimately lost more than half of its aircraft and more than a third of its pilots The valor and battle accomplishments displayed by Oriskany s aviators are legendary but the story of their service has been lost in the disastrous fray of the war itself Fey portrays the Oriskany and its heroes in an indelible memorial to the fallen of CVW 16 in hopes that the lessons learned from such strategic disasters are not forgotten in today s sphere of war bent politics

**Infrared Systems for Tactical Aviation**  
George B. Hept, 2002 Evolutionary development is based on using continuous experimentation and adaptation in changing circumstances to reward success while allowing but eventually eliminating failure Since this approach is agile flexible quick reacting and thrives on change it contrasts with strategic planning in which systems are developed in a planned and orderly fashion to meet future requirements A planned system is rigid slow to react and resists or ignores change which contrasts with how the military traditionally develops weapon systems One word that distinguishes between evolutionary and planned development is chaos Chaos like risk is unavoidable and hence should be managed rather than avoided Indeed a certain degree of chaos is desirable because it generates the necessary set of adaptations and ideas that can eventually be selected

for evolutionary improvement The Darwinian concept of survival of the fittest can be applied to ideas systems and organizations that seek to maintain a competitive advantage
