deserts and wetlands in arid places worldwide **The Late Archaic across the Borderlands** Bradley J. Vierra, 2010-01-01 Why and when human societies shifted from nomadic hunting and gathering to settled agriculture engages the interest of scholars around the world One of the most fruitful areas in which to study this issue is the North American Southwest where Late Archaic inhabitants of the Sonoran and Chihuahuan Deserts of Mexico Arizona and New Mexico turned to farming while their counterparts in Trans Pecos and South Texas continued to forage By investigating the environmental biological and cultural factors that led to these differing patterns of development we can identify some of the necessary conditions for the rise of agriculture and the corresponding evolution of village life The twelve papers in this volume synthesize previous and ongoing research and offer new theoretical models to provide the most up to date picture of life during the Late Archaic from 3 000 to 1 500 years ago across the entire North American Borderlands Some of the papers focus on specific research topics such as stone tool technology and mobility patterns Others study the development of agriculture across whole regions within the Borderlands The two concluding papers trace pan regional patterns in the adoption of farming and also link them to the growth of agriculture in other parts of the world **Coastal Foragers of the Gran Desierto** Douglas R. Mitchell, Jonathan B. Mabry, Gary Huckleberry, Natalia Martínez Tagüena, 2024-03-19 The result of nearly twenty years of interdisciplinary research this volume contributes to the archaeological and paleoenvironmental knowledge of an important but lightly investigated hyperarid coastline at the heart of the Sonoran Desert Focused on the coast near Puerto Peasco Sonora Mexico it examines the diverse groups occupying the coast for salt abundant food sources and shells for ornament manufacturing

Excavations at Gu Achi W. Bruce Masse, 1980 **Field Man** Julian D. Hayden, 2016-10-01 Field Man is the captivating memoir of renowned southwestern archaeologist Julian Dodge Hayden a man who held no professional degree or faculty position but who camped and argued with a who's who of the discipline including Emil Haury Malcolm Rogers Paul Ezell and Norman Tindale This is the personal story of a blue collar scholar who bucked the conventional thinking on the antiquity of man in the New World who brought a formidable pragmatism and hand sense to the identification of stone tools and who is remembered as the leading authority on the prehistory of the Sierra Pinacate in northwestern Mexico But Field Man is also an evocative recollection of a bygone time and place a time when archaeological trips to the Southwest were expeditions when a man might run a Civilian Conservation Corps crew by day and study the artifacts of ancient peoples by night when one could honeymoon by a still full Gila River and when a Model T pickup needed extra transmissions to tackle the back roads of Arizona To say that Julian Hayden led an eventful life would be an understatement He accompanied his father a Harvard trained archaeologist on influential excavations became a crew chief in his own right taught himself silversmithing married a city girl helped build the Yuma Air Field worked as a civilian safety officer and was a friend and mentor to countless students He also crossed paths with leading figures in other fields Barry Goldwater and even Frank Lloyd Wright turn up in this wide ranging narrative of a desert rat who was at once a throwback and as he only half jokingly suggests

ahead of his time Field Man is the product of years of interviews with Hayden conducted by his colleagues and friends Bill Broyles and Diane Boyer It is introduced by noted southwestern anthropologist J Jefferson Reid and contains an epilogue by Steve Hayden one of Julian s sons *Los Primeros Mexicanos* Guadalupe Sánchez,2016-05-12 In 1927 near the town of Folsom New Mexico a spectacular discovery altered our understanding of early humans on the American continent Scientists excavating a bison from the late Pleistocene age discovered a fluted projectile point wedged between the animal s ribs forceful evidence that humans existed during the Ice Age together with now extinct animals Subsequent discoveries at nearby Clovis introduced scientists to the first large scale occupation of the Americas Clovis culture with a time span of 13 250 to 12 500 years ago *Los Primeros Mexicanos* explores the Clovis occupation of Mexico s northwest region of Sonora Using extensive primary data concerning specific artifacts assemblages and Paleoindian archaeology Mexican archaeologist Guadalupe S nchez presents a synopsis and critical review of current data and a unique summary of information about the First People of M xico that is difficult to find in Spanish and until now not available in English S nchez s essential framework for early Sonora prehistory includes the Sonoran landscape the biotic communities a history of investigations the regional cultural historical chronology of Sonora and the Clovis record in the surrounding area The Sonoran settlement pattern she asserts indicates that Clovis groups were hunter gatherers who exploited a wide range of environments locating their settlements near lithic sources for tool making water sources large prey animals and a variety of edible plants and small animals In 1592 a Jesuit priest Jos de Acosta chronicled his puzzlement over when man first arrived in the New World Four hundred years later the peopling of the American continent is still intensely interesting to scientists and researchers *Los Primeros Mexicanos* offers an exhaustive synthesis of available archaeological evidence to shed light on Clovis occupation in Sonora Mexico *Connecting Mountain Islands and Desert Seas* ,2005 **Sunshot** ,2006 The Devil s Highway crosses a stretch of borderland desert in northern Mexico where many immigrants have traveled and too many have died It is a despoblado where desperate people defend secret places But it is also known as El Gran Desierto a place where stately saguaros stand near aromatic elephant trees where sand dunes caress the edges of jagged granite mountains where one can watch bighorn sheep in the morning and whales in the afternoon Over the years desert rat Bill Broyles has ventured repeatedly into this sunshot landscape slogged across its salt flats and sand dunes and defied its deadly heat This book chronicles his years of exploration a vivid and personal introduction to a thorny but ultimately enchanting place that manages to endear itself over time if it doesn t kill you first Michael Berman s stark black and white photographs capture the desolate beauty of the desert while conveying a sense of Broyles adventures Gleaned from more than 4 000 images shot with a large format camera these exquisite photographs translate the desert s formidable monotone into finely tuned studies of light and represent some of the best photos ever taken of this mysterious region El Gran Desierto is a grand desert indeed with beauty spirit and mystery rivaling any place on Earth and anyone captivated by the earlier explorations of Lumholtz Ives or

Hornaday or by Edward Abbey's love of desert places will revel in these modern day adventures Sunshot defies the stereotype of a punishing wilderness to show how even the most perilous desert can be alluring if approached with knowledge and respect Bulletin ,1955 **Counting Sheep** Gary Paul Nabhan,1993 This unusual anthology demonstrates the range of possibilities in nature writing with contributions from Charles Bowden Julian Hayden Danny Lopez Charles Sheldon Ann Zwinger and others Essential reading for naturalists and conservationists Highly recommended Library Journal *Earth's Landscape* Joyce A.
