Sightlines 10 Barbara C. Fullerton, Mary Crane, Amanda Joseph, 2000      Study on Magnetohydrodynamic Turbulence and Its Astrophysical Applications Siyao Xu, 2019-04-23 Turbulence and magnetic fields are ubiquitous in the Universe Their importance to astronomy cannot be overestimated The theoretical advancements in magnetohydrodynamic MHD turbulence achieved during the past two decades have significantly influenced many fields of astronomy This book provides predictive theories of the magnetic field generation by turbulence and the dissipation of MHD turbulence These fundamental non linear problems were believed to be tractable only numerically This book provides complete analytical descriptions in quantitative agreement with existing numerics as well as theoretical predictions in physical regimes still unreachable by simulations and explanations of various related observations It also discusses and promotes the astrophysical applications of MHD turbulence theories including i the particle acceleration and radiation in high energy phenomena e g Gamma Ray Bursts supernova remnants cosmic rays ii interstellar density fluctuations and the effect on observations e g Faraday rotation scattering measurements of Galactic and extragalactic radio sources iii density and magnetic field structure in molecular clouds toward star formation In closing this book demonstrates the key role of MHD turbulence in connecting diverse astrophysical processes and unraveling long standing astrophysical problems as foreseen by Chandrasekhar a founder of modern astrophysics

The fourteen volume set LNCS 15886-15899 constitutes the papers of several workshops which were held in conjunction with the 25th International Conference on Computational Science and Its Applications ICCSA 2025 held in Istanbul, Turkey, during June 30-July 3, 2025. The 362 full papers, 37 short papers, and 2 PhD showcase included in this book were carefully reviewed and selected from 1043 submissions. In addition, the conference consisted of 58 workshops focusing on very topical issues of importance to science, technology, and society, from new mathematical approaches for solving complex computational systems to information and knowledge in the Internet of Things, new statistical and optimization methods, several Artificial Intelligence approaches, sustainability issues, smart cities, and related technologies.

**Exhibitor Catalogue**, 1954 **sUAS Applications in Geography** Kory Konsoer, Michael Leitner, Quinn Lewis, 2022-07-20. The use of small unoccupied aerial systems (sUAS) for acquiring close-range, remotely sensed data has substantially increased in the past 5 years. A primary focus of early research was on physical systems and photogrammetric techniques. However, as sUAS technology continues to improve and more sophisticated payloads are utilized, such as lidar and multispectral cameras, applications have expanded to nearly all subdisciplines within Geography. This edited volume is intended to showcase the various ways in which sUAS are used in geographic research, including geomorphology, environmental and hazard monitoring, biogeography, and urban and sociocultural geography.

Library Science and Administration: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2017-11-30. Effective administration of libraries is a crucial part of delivering library services to the public. To develop and implement best practices, librarians must be aware and informed of the recent advances in library administration. *Library Science and Administration: Concepts, Methodologies, Tools, and Applications* is a comprehensive reference source for the latest scholarly material on trends, techniques, and management of libraries and examines the benefits and challenges of library administration. Highlighting a range of pertinent topics such as digital libraries, information sciences, and academic libraries, this multi-volume book is ideally designed for academicians, researchers, practitioners, and librarians seeking current research on library science and administration.

Locative Tourism Applications Erin E. Lynch, 2022-09-30. Travel through time. Walk the streets as they were. See through floors. Hunt for ghosts with drink in hand. Hear the walls speak. These are just a few of the ways that locative tourism applications seek to augment the urban experience. This book explores the universe of locative tourism applications. It uses multi-sited sensory ethnography

with diverse apps in 12 cities around the world to interrogate how these applications layer often branded maps of meaning over the urban environment and exposes what their use at the embodied intersection of physical and digital space can tell us about the production of cityscapes for touristic consumption Locative Tourism Applications takes a journey in three parts to evaluate how these extensions of the senses mediate users experience of urban locales The first offers the reader some theoretical and methodological orientation the second takes them on a whirlwind tour of locative apps and the third settles in for an extended exploration of two destinations Montreal and Christchurch With broad cross disciplinary appeal this volume will be of interest to scholars from tourism studies cultural geography urban studies new media studies and sensory studies and will be particularly valuable for sensory ethnographers examining mobile and location aware media

10th International Conference on Turbochargers and Turbocharging Institution of Mechanical Engineers,2012-05-11 This book presents the papers from the latest international conference following on from the highly successful previous conferences in this series held regularly since 1978 Papers cover all current and novel aspects of turbocharging systems design for boosting solutions for engine downsizing The focus of the papers is on the application of turbocharger and other pressure charging devices to spark ignition SI and compression ignition CI engines in the passenger car and commercial vehicles Novel boosting solutions for diesel engines

operating in the industrial and marine market sectors are also included The current emission legislations and environmental trends for reducing CO<sub>2</sub> and fuel consumption are the major market forces in the transport land and marine and industry sectors In these market sectors the internal combustion engine is the key product where downsizing is the driver for development for both SI and CI engines in the passenger car and commercial vehicle applications The more stringent future market forces and environmental considerations mean more stringent engine downsizing thus novel systems are required to provide boosting solutions including hybrid electric motor and exhaust waste energy recovery systems for high efficiency response reliability durability and compactness etc For large engines the big challenge is to enhance the high specific power and efficiency whilst reducing emission levels Nox and Sox with variable quality fuels This will require turbocharging systems for very high boost pressure efficiency and a high degree of system flexibility Presents papers from all the latest international conference Papers cover all aspects of the turbocharging systems design for boosting solutions for engine downsizing The focus of the papers is on the application of turbocharger and other pressure charging devices to spark ignition SI and compression ignition CI engines in the passenger car and commercial vehicles **The Role of Magnetic Fields in the Formation of Stars** Derek Ward-Thompson,Ray S.
