A. F. VAN RHYEN, 1875 Worlds of Sense Constance Classen, 2023-02-28 First published in 1993 *Worlds of Sense* is an exploration of the historical and cultural formation of the senses As the author demonstrates different cultures have strikingly different ways of making sense of the world In the modern urban West we are accustomed to thinking in terms of visual models such as world view whereas the Ongees of the Andaman Islands for example live in a world ordered by smell and the Tzotzil of Mexico hold that temperature is the basic force of the cosmos In a fascinating examination of the role of the senses in diverse societies and eras Constance Classen shows the extent to which perception is shaped by and expressive of cultural values This book will be of interest to students of cultural studies sociology anthropology and philosophy The Senses and the English Reformation Matthew Milner, 2016-03-03 It is a commonly held belief that medieval Catholics were focussed on the bells and whistles of religious practices the smoke images sights and sounds that dazzled pre modern churchgoers Protestantism in contrast has been cast as Catholicism's austere intellectual and less sensual rival sibling With its white washed walls lack of incense and often music Protestantism worship emphasised preaching and scripture making the new religion a drab and disengaged sensual experience In order to challenge such entrenched assumptions this book examines Tudor views on the senses to create a new lens through which to explore the English Reformation Divided into two sections the book begins with an examination of pre Reformation beliefs and practices establishing intellectual views on the senses in fifteenth century England and situating them within their contemporary philosophical and cultural tensions Having established the parameters for the role of sense before the Reformation the second half of the book mirrors these concerns in the post 1520 world looking at how and to what degree the relationship

between religious practices and sensation changed as a result of the Reformation By taking this long term binary approach the study is able to tackle fundamental questions regarding the role of the senses in late medieval and early modern English Christianity By looking at what English men and women thought about sight hearing smell taste and touch the stereotype that Protestantism was not sensual and that Catholicism was overly sensualised is wholly undermined Through this examination of how worship was transformed in its textual and liturgical forms the book illustrates how English religion sought to reflect changing ideas surrounding the senses and their place in religious life Worship had to be sensible and following how reformers and their opponents built liturgy around experience of the sacred through the physical allows us to tease out the tensions and pressures which shaped religious reform
