modern and Mexican took shape in the late 1940s in the form of a sophisticated residential development known as Jardines del Pedregal. The project won international acclaim and Barragán moved on to create a series of masterpieces: his own house, the houses built for the Prieto Lopez and Galvez families, the monument known as Satellite Towers, and the outstanding residential developments of Las Arboledas and Los Clubes are but a few examples of his singular way of dealing with nature and architecture as two key elements of the intimate relation between inside and outside, between constructed and non-constructed environments.

Post-Western Histories of Architecture Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23
This book seeks to provide an alternative post-Western perspective to the history of contemporary architecture. It puts forward detailed critical analyses of various areas of the world including Europe, Latin America, Africa, China, Australia, India, and Japan, where particular movements of architecture have developed as active political acts. The authors focus on a broad spectrum of countries, architectures, and architects that have developed a design approach closely linked to the building context. The concept of context is broad and includes various economic, social, cultural, political, and natural aspects. In all cases, the architects selected in this book have chosen to view context as an opportunity. However, each architect has considered certain specific aspects of context: some have been very attentive to the social context, others to material aspects or typological issues, and still others to aspects related to political visions or economic factors. The analysis critically highlights interesting, creative, and respectful design approaches towards local conditions such as sustainability in Nordic Europe, climate-conscious design in Africa, and the bottom-up sensitivity of India. The book's main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment. Thanks to its valuable examples, this book strives to make a conscious contribution to establishing a bulwark against the current flattening-out processes that architecture is experiencing. This book will be of relevance to researchers, teachers, and students interested in the history of architecture, architecture and planning, and postcolonial studies.
