Newman, Michael A. Kohn, 2009-02-16 For researchers clinicians and other health professionals looking to select develop or apply medical tests *Aventis Version 100 Q&As about Lung Cancer* Parles, 2002-11 *Essentials of Clinical Pulmonology* Pallav L Shah, Felix JF Herth, YC Gary Lee, Gerard J Criner, 2018-09-05 Concise yet comprehensive this textbook of clinical pulmonology provides pulmonologists and respiratory disease physicians with all the key information that they need to know to manage the patient through the diagnosis and treatment journeys From the most common condition to the rarest each disease is consistently presented and comprehensively covered giving the reader just the key facts Building upon the basic sciences and integrating these with clinical practice each chapter has a consistent approach is highly designed and visually appealing Numerous illustrations colour photographs scans bullet points tables and algorithms ensure that the key information is available at a glance The keynote sections serve as a useful revision aid as do the multiple choice questions A truly international and highly experienced editorship with expert contributors from around the world ensure that the book remains a trusted source of information Set at the level between the definitive reference work and the clinical manual *Essentials of Clinical Pulmonology* is an invaluable cornerstone for all pulmonologists whether trainees or experienced clinicians **What Holism Can Do for Social Theory** Barbara Hanson, 2014-06-27 This book reconsiders the nature of

positivist philosophy in social science theory based on classical and medieval thought in what later became Europe It argues that social theory is being held back by antagonistic debates over science positivism objectivity and universal law debates which appear unnecessary narrow and acontextual when their origins are examined Positing that solutions to these impasses can be found by moving to alternative holistic epistemology and looking at issues in terms of interrelations rather than parts the book shows the promise of a social theory that provides a unit of analysis that mediates between local and global relations Lung Cancer Claudia I. Henschke, Peggy McCarthy, Sarah Wernick, 2003 Claudia Henschke offers specific recommendations who needs to be checked where to be tested and what to expect This book provides information on diagnosis treatment and survival accompanied by inspiring words from survivors Making Sense of Pain: Critical and Interdisciplinary Perspectives Jane Fernandez, 2020-05-18 This conference proceeding provides an attempt to extend the conversation on pain the boundaries of the word pain are characteristically blurred by connotations of suffering and trauma

The variety of papers in this collection transgress these boundaries knowingly inviting a more expansive rather than narrow definition of pain

The Involvement of Systemic Homeostasis in Tumour Biology Wei-Lin Jin,Hongying Pan,Qian Wang,Gerhard Schmalz,2023-10-13 Systemic homeostatic mechanisms include several aspects such as metabolic neuroendocrine immune and physiological homeostasis Irreversible damage or reversible imbalance of such homeostatic processes may initiate cancers by altering the regulation of the molecular machinery Systemic homeostasis related genes have been found to be intimately involved in oncological processes and in some instances have shown prognostic value Thus future gene targeting approaches for cancer should not only focus on classical cancer drivers but also address systemic homeostasis related genetic mechanisms Identification of systemic homeostasis related genes with diagnostic prognostic or therapeutic value can advance translational cancer research Increasing numbers of research studies have reported systemic homeostasis related genes relevance to various types of cancer For example cancer cells have been shown to activate a critical mechanism of oxygen homeostasis hypoxia inducible factors HIFs family genes in order to adapt to the tumor microenvironment and develop into a more aggressive phenotype In addition methylene tetrahydrofolate dehydrogenase MTHFD family genes are involved in mitochondrial one carbon metabolism which is essential for maintaining systemic metabolic homeostasis and have recently been found overexpressed in many cancers and have been correlated to poor survival outcomes The overexpression of transferrin family genes with iron transporting function has been linked with iron accumulation which is a known initiating factor in cancer Another example is Forkhead box O FOXO family genes which serve as a critical regulator of immune homeostasis and can regulate cancer immunity by negatively regulating the expression of immunosuppressive gene programmed death 1 ligand 1 PD L1 Apart from these examples other systemic homeostatic mechanisms such as glucose homeostasis energy homeostasis lipid homeostasis phosphate homeostasis cholesterol homeostasis and mineral homeostasis may also be implicated in cancer pathogenesis Although accruing research is focused on describing systemic homeostatic mechanisms in cancer biology several research questions remain unaddressed The utilization of recent analytic tools and bioinformatics as systems biology approaches has the potential to address these research gaps Therefore in this special issue we will collect articles focusing on the application of bioinformatics and systems biology based investigations of systemic homeostatic mechanisms in malignant diseases Both original research and review articles are welcomed however publications based on the analysis on only one database will not be accepted e g TCGA
