with our ethnic familial and regional backgrounds Baker Clark profiles fifteen individuals who have shaped our experiences with food and who have gone beyond popular trends to promote cooking as a craft worth learning and sustaining The cooks and food critics he writes about emphasize the appreciation of good cooking and the relationship of food to social justice spirituality and sustainability Profiles from the Kitchen highlights prominent figures within the food industry from nationally and internationally known individuals such as Paul and Julia Child James Beard and M F K Fisher to regional food experts such as John T Edge and Dennis Getto The result is a collective portrait of foodlovers who celebrate the rich traditions and histories associated with food in our daily lives and who encourage us to reestablish our own connections in the kitchen

Ciaran Sugrue, Tone Solbrekke, 2014-06-23 What does professional responsibility entail in an increasingly insecure unpredictable and de regulated world This is the core question addressed in this text The point of departure for the various contributions is that professional responsibility is a way of being in the world that includes a particular mandate to behave in a manner consistent with moral and societal obligations as a professional Increasingly however there is a lack of consensus as to what such mandates imply and even more dissensus as to what appropriate exercise of responsibility entails One of the distinctive features of this book is the manner in which it combines normative and empirical dimensions It moves beyond dualistic perspectives to create a more inclusive conversation on professional responsibility In the face of increasing complexity of professional work professional responsibility remains open to further development The book signals direction for the development of professional responsibility and while seeking to give direction to ongoing deliberations avoids the pitfalls of performativity The chapters are grounded in a variety of disciplinary perspectives and traverse various professional boundaries in a self reflexive manner to create more inclusive transformative and generative narratives on professional responsibility This is achieved by Focusing on normative dimensions of professional work and combining these with a focus on empirical aspects of professional practice in a variety of setting and Recognising the inevitable tensions between personal trust and responsibility and largely depersonalised policies and strategies of quality control when normative and empirical aspects of professional responsibility are situated within their policy environments The concluding narrative moves beyond deconstruction complexity and critique of these considerations to a construction of new imagined horizons of professional responsibility from theoretical conceptual and practical perspectives This text sets out to transform professional responsibility through a re configuration of its constituent elements in imaginative and creative ways and by indicating the real world import of re charting the field
