The Architect's Portfolio Andreas Luescher, 2017-10-03 The creation of a successful portfolio is a vital skill needed by architectural students and professionals alike In a highly competitive global market the accomplished representation of the architect's work must be able to turn opportunities into triumphs This book offers a fresh step by step approach to achieving a reflective attractive and successful representation of one's work Structured in four stages it takes the reader through each step needed in the creation of a successful portfolio from understanding yourself and your market to planning designing and producing it Illustrated throughout in full color the book includes case study portfolios from the USA UK Europe and Asia which demonstrate the steps in the process for both practitioners and students from sketch trials to full colour stage lay outs These contributions come from architects all over the world providing terrific insight into current practices and inspiration and ideas This is essential reading for anyone putting together an architectural portfolio

Trading Systems 2nd Edition Urban Jaekle, Emilio Tomasini, 2019-12-17 Completely revised and updated second edition with new AmiBroker codes and new complete portfolio tests Every day there are traders who make a fortune It may seem that it seldom happens but it does as William Eckhardt Ed Seykota Jim Simons and many others remind us You can join them by using systems to manage your trading This book explains how you can build a winning trading system It is an insight into what a trader should know and do in order to achieve success in the markets and it will show you why you don't need to be a rocket scientist to become successful It shows how to adapt existing codes to the current market conditions how to build a portfolio and how to know when the moment has come to stop one system and use another one There are three main parts to Trading Systems Part One is a short practical guide to trading systems development and evaluation It condenses the authors years of experience into a number of practical tips It also forms the theoretical basis for Part Two in which readers will find a step by step development process for building a trading system covering everything from writing initial code to walk forward analysis and money management Two examples are provided including a new beginning of the month trading system that works on over 20 different stock indices worldwide from the US to Europe to Asian indices Part Three shows you how to build portfolios in two different ways The

first method is to combine a number of different trading systems for a number of different markets into an effective portfolio of systems The second method is a new approach to system development it provides step by step instructions to trade a portfolio of hundreds of stocks using a Bollinger Band trading strategy A trader can never really say they were successful but only that they survived to trade another day the black swan is always just around the corner Trading Systems will help you find your way through the uncharted waters of systematic trading and show you what it takes to be among those that survive
