Berk, 2022-07-26 In the Ninth Edition of *Infants and Children: Prenatal Through Middle Childhood* renowned professor, researcher, and author Laura E. Berk takes an integrated approach to presenting development in the physical, cognitive, emotional, and social domains, emphasizing the complex interchanges between heredity and environment, providing exceptional multicultural and cross-cultural focus, and offering research-based practical applications that students can relate to their personal and professional lives. **The Social Brain** Jean Decety, 2020-08-18 A range of empirical and theoretical perspectives on the relationship between biology and social cognition from infancy through childhood. Recent research on the developmental origins of the social mind supports the view that social cognition is present early in infancy and childhood in surprisingly sophisticated forms. Developmental psychologists have found ingenious ways to test the social abilities of infants and young children, and neuroscientists have begun to study the neurobiological mechanisms that implement and guide early social cognition. Their work suggests that far from being unfinished adults, babies are exquisitely designed by evolution to capture relevant social information, learn, and explore their social environments. This volume offers a range of empirical and theoretical perspectives on the relationship between biology and social cognition from infancy through childhood. The contributors consider scientific advances in early social perception and cognition, including findings on the development of face processing and social perceptual biases; explore recent research on early infant competencies for language and theory of mind, including a developmental account of how young children become moral agents and the role of electrophysiology in identifying psychological processes that underpin social cognition; discuss the origins and development of prosocial behavior; reviewing evidence for a set of innate predispositions to be social, cooperative, and altruistic; examine how young children make social categories; and analyze atypical social cognition, including autism spectrum disorder and psychopathy.
