Bixler, 1984 *Sniper Training FM 23-10: OFFICIAL U.S. Army Field Manual 23-10 (Sniper Training)* Department of the Army, 2018-09-14 The United States Army sniper is a specially selected volunteer highly trained in advanced marksmanship and Fieldcraft skills He can support special operations missions and is able to engage selected targets from concealed positions at ranges and under conditions that are not possible for the normal rifleman The sniper's skill acts as a force multiplier where the mission is two fold 1 to eliminate high value tactical targets on the battlefield and 2 act as observer gathering intelligence Field Manual 23 10 provides doctrinal guidance on the mission personnel organization equipment training skills and employment of the Sniper This manual is intended for use by commanders staffs instructors and soldiers at training posts United States Army Instructor's Guide for Intermediate Leadership Development, 1984 **Shots that Hit** William R. Wells (II.), 1993 *Increasing Small Arms Lethality In Afghanistan: Taking Back The Infantry Half-Kilometer* Major Thomas P. Ehrhart, 2015-11-06 Operations in Afghanistan frequently require United States ground forces to engage and destroy the enemy at ranges beyond 300 meters These operations occur in rugged terrain and in situations where traditional supporting fires are limited due to range or risk of collateral damage With these limitations the infantry in Afghanistan require a precise lethal fire capability that exists only in a properly trained and equipped infantryman While the infantryman is ideally suited for combat in Afghanistan his current weapons doctrine and marksmanship training do not provide a precise lethal fire capability to 500 meters and are therefore inappropriate Comments from returning non commissioned officers and officers reveal that about fifty percent of engagements occur past 300 meters The enemy tactics are to engage United States forces from high ground with medium and heavy weapons often including mortars knowing that we are restricted by our equipment limitations and the inability of our overburdened soldiers to maneuver at elevations exceeding 6000 feet Current equipment training and doctrine are optimized for engagements under 300 meters and on level terrain There are several ways to extend the lethality of the infantry A more effective 5 56 mm bullet can be designed which provides enhanced terminal performance out to 500 meters A better option to increase incapacitation is to adopt a larger caliber cartridge which will function using components of the M16 M4 The 2006 study by the Joint Service Wound Ballistics Integrated Product Team discovered that the ideal caliber seems to be between 6 5 and 7 mm This was also the general conclusion of all military ballistics studies since the end of World War I **Special Forces commander's manual for MOS 11B (SQI S)** United States.
