The European Union and the Promotion of Democracy Richard Youngs, 2001 This book assesses European Union policies aimed at encouraging democratization in East Asia and the North African and Middle Eastern States within the Euro Mediterranean Partnership these two regions being the source of some of the strongest conceptual challenges to Western liberal democracy since the end of the cold war The book addresses theoretical debates over the international dimensions of political change and the EU s characteristics as an international actor The factors both driving and inhibiting European democracy promotion policies are explored The book outlines the EU s distinctive bottom up philosophy aimed at constructing the socio economic and ideational foundations for political liberalization but argues that the EU has in practice failed to develop a fully comprehensive and coherent democracy promotion strategy

European Integration and Supranational Governance Wayne Sandholtz, Alec Stone Sweet, 1998-09-24 The European Union began in 1957 as a treaty among six nations but today constitutes a supranational polity one that creates rules that are binding on its 15 member countries and their citizens This majesterial study confronts some of the most enduring questions posed by the remarkable evolution of the EU Why does policy making sometimes migrate from the member states to the European Union And why has integration proceeded more rapidly in some policy domains than in others A distinguished team of scholars lead by Wayne Sandholtz and Alec Stone Sweet offers a fresh theory and clear propositions on the development of the EU Combining broad data and probing case studies the volume finds solid support for these propositions in a variety of policy domains The coherent theoretical approach and extensive empirical analyses together constitute a significant challenge to approaches that see the EU as a straightforward product of member state

interests power and bargaining This volume clearly demonstrates that a nascent transnational society and supranational institutions have played decisive roles in constructing the European Union **European Integration** Mark Gilbert, 2012 Rev and updated ed of Surpassing realism the politics of European integration since 1945 c2003 **Cultures of Border Control** Ruben Zaiotti, 2011-04 In recent years a number of European countries abolished national border controls in favor of Europe's external frontiers In doing so they challenged long established conceptions of sovereignty territoriality and security in world affairs Setting forth a new analytic framework informed by constructivism and pragmatism Ruben Zaiotti traces the transformation of underlying assumptions and cultural practices guiding European policymakers and postnational Europe shedding light on current trends characterizing its politics and relations with others The book also includes a fascinating comparison to developments in North America where the United States has pursued more restrictive border control strategies since 9 11 As a broad survey of the origins evolution and implications of this remarkable development in European integration Cultures of Border Control will be of interest to students and scholars of international relations and political geography The Margins of European Law Ian Ward, 1996-09-18 The Margins of European Law attempts to provide a critical and sceptical approach to European law The related themes of the book attempt to introduce a historical and theoretical context for European law Ultimately it is suggested that the new European order requires a very different legal and jurisprudential approach one which is distinctively post modern European Community law at its margins is a mass of inconsistencies and injustices and a post modern model can better effect the erasing of the margins of European law

Endo, 1999-01-13 This work is the first systematic study of the presidency of the European Commission Drawing upon cases of attempted leadership by Jacques Delors the Commission President from 1985-95 it examines the leadership capacity of the office holder This points to the inherently shared and contingent nature of Commission President s leadership in a Union where the leadership sources are widely dispersed While this is essentially an empirical study Endo addresses some of the theoretical implications of its findings and resulting issues

A Legal and Political Interpretation of Articles 224 and 225 of the Treaty of Rome Constantin Stefanou, Helen Xanthaki, 2019-01-15 First published in 1997 Article 224 is one of the most powerful Articles of the Treaty of Rome allowing a member state to take unilateral measures

and to suspend some or all its Treaty based obligations in times of what can loosely be described as serious internal turmoil or external threat It is for this reason that the very next Article of the Treaty Article 225 allows the Commission or a member state to challenge invocation of Art 224 before the European Court of Justice ECJ on grounds of improper use In practice the use of Art 224 by a member state presents multiple problems The obvious connection with defence and security issues has inhibited the ECJ which still has not given an authentic interpretation of this Article As the recent former Yugoslav Republic of Macedonia FYROM cases Greek referral for the embargo on FYROM indicate unless the use of Art 224 is blatantly flippant the ECJ is not in a position to challenge a member state's unilateral measures

EC Law and Minority Language Policy

Niamh Nic Shuibhne, 2021-10-25 The European Community has pledged respect for the cultural and linguistic diversity of its Member States and has recognized minority languages as an inherent constituent in this regard This development reflects a broader trend within the Community towards grappling with less obvious aspects of supranational governance Minority language groups turn optimistically to Europe in response But despite rhetorical promises just what can the EC actually be expected to do in the realm of minority language protection a politically sensitive and traditionally domestic concern Arguments put forward to date focus primarily on philosophical moral economic and political discourse While these considerations are a vital aspect of the debate on minority languages and on linguistic diversity more generally the question of legal basis remains largely unanswered For the first time this book traces comprehensively the existence of an appropriate legal basis for action undertaken by the EC in this domain striving in particular to locate a pragmatic yet effective balance between legitimate possibility and acceptable limitations

Deepening and Widening Pierre-Henri Laurent, Marc

Maresceau, 1998 Eighteen articles discuss the leading EU issues and institutional reforms at the end of this century such as enlargement security and monetary union as well as relations with the US Russia and the new World Trade Organization Although the contents are not exclusively determined by that agenda the volume was prepared and edited on the eve of and during the early months of the 1996 IGC which highlighted the struggle between those who seek a more integrated and even a federal Europe and those proposing a looser confederation Annotation copyrighted by Book News Inc Portland OR
