**Karl Rahner's Writings on Literature, Music and the Visual Arts**, 2021-08-26 This book is made up of a collection of texts unavailable in one volume until now including six previously untranslated essays from a major theologian of the twentieth century Rahner's numerous writings focused on the revelation of God as mystery in the world and on the human being who has an essential openness towards the transcendent His articles reveal an empathy and a depth of insight into the relationship between theology faith and the arts which are remarkable and may take the reader by surprise More recently Rahner's contribution to the growing field of theology and the arts has been recognised by leading theologians on this subject He asserts that theology must integrate the verbal and non verbal arts as they are authentic means of human self expression of religious experience and of God's self communication and therefore they are essential sources of theology Rahner argues that theology understood as a person's reflexive self expression about him or herself in the light of divine revelation cannot be regarded as complete until the arts become an intrinsic moment of theology itself

**(RLE Linguistics B: Grammar)** I.M. Schlesinger,2014-01-10 In this volume the author reviews the results of research on language performance and proposes a model of production and comprehension Although recent developments in linguistics are taken into account consideration of other requirements of a performance model leads to the conclusion that the grammar the speaker has in mind differs from the grammar as currently conceived of by most linguists The author is also critical of recent computer simulations of language performance on the basis that they fall short of describing what goes on in human production and comprehension The author therefore proposes that the basic issues must be rethought and new theoretical foundations reformulated in order to arrive at a viable theory of language functioning In developing the framework of the model presented in this book requirements of flexibility in the performance mechanisms the probabilistic nature of comprehension processes and the interleaving of linguistic rules with context and knowledge of the world are emphasized

Language and Its Functions Pieter Adrianus Verburg,1998-01-01 When Pieter Verburg 1905 1989 published Taal en Functionaliteit in 1952 the work was received with admiration by linguistic scholars though the number of those who could read the Dutch text for themselves remained limited The title alludes to the theories of linguistic function set out in 1936 by Karl B hler but Verburg regards the three functions of discourse focussing respectively on the speaker the person addressed and the matter discussed as no more than sub functions of the human function of speech His central concern is to explore the relationships between thought and language and language and reality and the work sets out to provide a historical analysis of views on these relationships in the period 1100 to 1800 The great strength of the work lies in the way in which the views of language are related to contemporaneous moves in philosophy and science contrasting essentially the mediaeval acceptance of authority the beginnings of induction in the Renaissance the dependence of early rationalism on calculation based on axiomatic truths and the further development of independent observation All these trends are reflected in the way men thought about language as well as in the way they used it Much has been written on the history of linguistics since this book was written but it still offers a unique view of the development of thinking about language **Fachsprachliche Dimensionen**

Els Oksaar,1988    *Languages in Contact* Uriel Weinreich,2011-11-23 The appearance of Uriel Weinreich's Languages in Contact Findings and Problems 1953 marked a milestone in the study of multilingualism and language contact Yet until now few linguists have been aware that its main themes were first laid out in Weinreich's Columbia University doctoral dissertation of 1951 Research Problems in Bilingualism with Special Reference to Switzerland Based on the author's fieldwork it contains a detailed report on language contact in Switzerland in the first half of the 20th century especially along the French German linguistic border and between German and Romansh in the canton of Grisons Graubünden The present edition reproduces Weinreich's original text in full with only minor alterations and corrections as well as the author's fieldwork photographs and many of his hand drawn diagrams A new foreword reviews Weinreich's life and legacy as well as developments in contact linguistics and the Swiss linguistic situation over the past 60 years With selected comments on noteworthy points and references to more recent literature this volume will be of interest not only to those working on the languages of Switzerland or specialists in language contact but all scholars today whose work builds on the broad and lasting foundations laid over half a century ago by Uriel Weinreich
