Office,1978 The Knowledge Business Rob Imrie,2016-03-03 This book provides a critique of the knowledge business and describes and evaluates its different manifestations in and impacts on the university sector Its focus is the social sciences and in particular housing and urban studies Drawing on a wide range of experiences both in the UK and elsewhere it illustrates the changing management of the academy and the development by university managers of instruments or techniques of control to ensure that academics are disciplined in ways that are commensurate with achieving commercial goals The individual chapters highlight the different ways in which the academy is being put to work for commercial gain and they evaluate how far the public service ethos of the universities is coming apart in a context in which what is to be serviced is increasingly a private clientele defined by their ability to pay The Knowledge Business examines the contradictions and tensions associated with these processes highlighting the implications for the academic labour process and the future of the academy
