**Methodological Foundations of Macroeconomics** Alessandro Vercelli,1991-09-26 This book is an investigation of the methodological and epistemological foundations of macroeconomic theory based on an examination of the theories of Keynes and Lucas It is divided into two parts In the first Professor Vercelli discusses the methodological issues which lie behind the conflict among different schools of thought in macroeconomics equilibrium and disequilibrium risk and uncertainty rationality and causality These issues are central to the current debate not only in many branches of economics but also in other scientific disciplines The traditional point of view of science based on equilibrium stability and determinism has been increasingly challenged by a new point of view in which disequilibrium instability and uncertainty play a crucial role This the author argues is bound to put macroeconomics in a new more promising position In the second part of the book the author compares the two main alternative research programmes in macroeconomics that outlined by Keynes in his General Theory and that suggested by Lucas the leader of the new classical economists

**Culture and Economic Explanation** Donald W. Katzner, 2008-02-19 Culture plays an important role in shaping the nature and content of economics This fascinating book compares the two cultures of Japan and the United States and provides insights into the economic workings and differences between the two nations Economics, Rational Choice and Normative Philosophy Thomas Boylan, Ruvin Gekker, 2008-10-27 Following Amartya Sen's insistence to expand the framework of rational choice theory by taking into account non utility information economists political scientists and philosophers have recently concentrated their efforts in analysing the issues related to rights freedom diversity intentions and equality Thomas Boylan and Ruvin Gekker have gathered essays that reflect this trend The particular themes addressed in this volume include the measurement of diversity and freedom formal analysis of individual rights and intentions judgment aggregation under constraints and strategic manipulation in fuzzy environments Some papers in the volume also deal with philosophical aspects of normative social choice Economic and Financial Crises A. Cencini, S. Rossi, 2015-06-02 This book deals with the structural origins of economic and financial crises It explains that both economic theories and policies need to be grounded on a monetary macroeconomic analysis of the working of domestic and international economies The volume outlines reform proposals to make sure that banking activities respect the nature of money **Economics and Diversity** Carlo D'Ippoliti, 2011-05-15 The bulk of contemporary economics assumes rather than explains differences between people or groups of people Yet many of these differences are produced by society or they imply differing opportunities and outcomes This book argues that economists should concern themselves with the explanation of the social causes and effects of such differences D Ippoliti introduces the concept of diversity to summarise all differences that are of social origin and that a theory or model seeks to explain This contrasts with the traditional concept of heterogeneity that instead refers to differences that are deemed to be exogenous of economic theory In approaching this the book ranges from the fields of methodology and history of economics to applied empirical work as well as gender diversity which is considered in depth The analysis of the thinking of two major economists of the past John Stuart Mill and Gustav Schmoller demonstrates how gender diversity exemplifies some of the fundamental issues in economics such as the division of labour society's capacity to reproduce itself and the role of social institutions and their impact on individual and collective behaviour The book maintains that growth of GDP and of the services sector cannot be trusted to automatically bring about greater inclusion of women in the labour market Active policy interventions are needed spanning from the removal of discrimination to the provision of public services and the establishment of fair competition in the market along with an improved division of social and political power between the sexes This work will be of interest to researchers and students focusing on the history of economic thought labour economics social policy and gender studies *Financial Markets in Perspective* Arie Arnon, Maria Cristina Marcuzzo, Annalisa Rosselli, 2022-02-11 This book examines financial markets from a historical perspective Bringing together

contributions from leading historians of economic thought economists and economic historians it offers an integrated approach and reflects on the workings of financial markets their impact on and relation with the rest of the economy and how their role was and is understood by economics The contributions cover topics such as classical and modern economic thinking on financial markets and institutions as well as financial models and innovations and also present case studies on financial history and on policy issues The historical perspective leads to a representation of markets not as abstract and timeless mechanisms but as institutions populated by a diversity of agents subject to rules and customs and influenced by scientific developments and economic theories
