Conjuring Science Christopher P. Toumey, 1996 Toumey focuses on the ways in which the symbols of science are employed to signify scientific authority in a variety of cases from the selling of medical products to the making of public policy about AIDS HIV a practice he calls conjuring science It is this conjuring of the images and symbols of scientific authority that troubles Toumey and leads him to reflect on the history of public understanding and perceptions of science in the United States

In Defense of Science Frank R. Spellman, Joan Price-Bayer, 2010-12-16 Today only a few people outside of the scientific community are conversant with the tradition of science and its many breakthroughs The rest are scientifically illiterate So say Frank R Spellman and Joni Price Bayer authors of In Defense of Science Why Scientific Literacy Matters This book explains why ordinary citizens need to have an understanding of science its methods and its groundbreaking discoveries The authors introduce the most basic scientific concepts in accessible and straightforward language Along the way they debunk several misconceptions of science and scientists and arrive at a view of science as an integral part of society policy and everyday life The book begins with an introduction to science and its basic concepts including a brief and entertaining history of science and scientific discoveries before taking on current views of science in society It surveys the many sources of our ideas of science including pop culture classics of literature news media and political discourse Much of the information from these sources tends to mislead and the only way to guard against such misinformation is to become scientifically literate and promote scientific

literacy in society The book therefore delves into the reasons that so many people do not understand basic scientific principles and do not keep up with scientific breakthroughs and finishes by examining the current state of science education It includes many resources for further reading and is presented in an engaging and entertaining way It offers much food for thought for anyone concerned with science in today's world
