Engaging Eager and Reluctant Learners Dennis Adams,Mary Hamm,2017-03-08 This book will help educators design STEM programs and lessons that foster teamwork and thinking while getting students actively involved in their own learning There are many practical ideas and lesson plans that will help teachers reach both eager and reluctant learners The suggestions for STEM curriculum and instruction are research based and standards driven This book looks at collaborative learning differentiation and diversity all the while building instruction in the STEM subjects and good hands on materials

This is done in a way that is designed to help every student feel successful and part of the class as a whole. It shows a deep respect for the unique relationship between teachers and their students as they try to navigate their way into the future. Suggestions are designed to help learners question, analyze, interpret, problem solve, and discover. The STEM subjects of science, technology, engineering, and math are essential to understanding the world of today and the world of tomorrow. The authors' view is that it takes more than innovation alone for innovation to be useful; products of the imagination must be arranged in ways that allow them to be used to solve real world problems. *New Approaches in Teaching History* Frederic Krome, 2024-02-14. Science fiction literature and film are an underappreciated source for the teaching of history. Finding material that can excite a student's curiosity can be a key towards greater student engagement, especially among students who are taking history as a requirement rather than from interest. The discovery that they can read or watch science fiction as part of their classwork often comes as a pleasant surprise. Beyond its popularity, however, utilizing science fiction for class assignments has certain pedagogical advantages: it introduces students to new vistas in historical thought, helps them learn how literature and film can be applied as a primary source, and can encourage participation in projects that are enjoyable. Each chapter provides case studies focusing on a different subject in the modern history curriculum, and in addition to providing an analysis of specific texts and/or cinematic sources, gives suggestions on assignments for the students. The Golden Cord Charles Taliaferro, 2012-12-15. The title of Charles Taliaferro's book is derived from poems and stories in which a person in peril or on a quest must follow a cord or string in order to find the way to happiness, safety, or home. In one of the most famous of such tales, the ancient Greek hero Theseus follows the string given him by Ariadne to mark his way in and out of the Minotaur's labyrinth. William Blake's poem *Jerusalem* uses the metaphor of a golden string which, if followed, will lead one to heaven itself. Taliaferro extends Blake's metaphor to illustrate the ways we can link what we see, feel, and do with deep spiritual realities. Taliaferro offers a foundational case for the recognition of the experience of the eternal God of Christianity in which God is understood as the fount of all goodness and the subject and object of our best love, revealed through scripture, tradition, philosophical reflection, and encountered in everyday events. He addresses philosophical obstacles to the recognition of such experiences, especially objections from the new atheists, and explores the values involved in thinking and experiencing God as eternal. These include the belief that the eternal goodness of God subordinates temporal goods such as the pursuit of fame and earthly glory; that God is the essence of life; and that the eternal God hallows domestic goods, blessing the everyday goods of ordinary life. An exploration of the moral and spiritual riches of the Christian tradition as an alternative to materialism and naturalism. *The Golden Cord* brings an originality and depth to the debate in accessible and engaging prose. The Collectors of Lost Souls Warwick Anderson, 2019-08-27. This riveting account of medical detective work traces the story of kuru, a fatal brain disease, and the pioneering scientists who spent decades searching for its cause and cure. Winner, William H.
