Confronting Penal Excess David Hayes, 2019-11-14 This monograph considers the correlation between the relative success of retributive penal policies in English speaking liberal democracies since the 1970s and the practical evidence of increasingly excessive reliance on the penal State in those jurisdictions It sets out three key arguments First that increasingly excessive conditions in England and Wales over the last three decades represent a failure of retributive theory Second that the penal minimalist cause cannot do without retributive proportionality at least in comparison to the limiting principles espoused by rehabilitation restorative justice and penal abolitionism Third that another retributivism is therefore necessary if we are to confront penal excess The monograph offers a sketch of this new approach late retributivism as both a theory of punishment and of minimalist political action within a democratic society Centrally criminal punishment is approached as both a political act and a policy choice Consequently penal theorists must take account of contemporary political contexts in designing and advocating for their theories Although this inquiry focuses primarily on England and Wales its models of retributivism and of academic contribution to democratic penal policy making are relevant to other jurisdictions too

Disability, Criminal Justice and Law Linda Steele, 2020-04-29 Through theoretical and empirical examination of legal frameworks for court diversion this book interrogates law's complicity in the debilitation of disabled people In a post deinstitutionalisation era diverting disabled people from criminal justice systems and into mental health and disability services is considered therapeutic humane and socially just Yet by drawing on Foucauldian theory of biopolitics critical legal and political theory and critical disability theory Steele argues that court diversion continues disability oppression It can facilitate criminalisation control and punishment of disabled people who are not sentenced and might not even be convicted of any criminal offences On a broader level court diversion contributes to the longstanding phenomenon of disability specific coercive intervention legitimates prison incarceration and shores up the boundaries of foundational legal concepts at the core of jurisdiction legal personhood and sovereignty Steele shows that the United Nations Convention on the Rights of Persons with Disabilities cannot respond to the complexities of court diversion suggesting the CRPD is of limited use in contesting carceral control and legal and settler colonial violence The book not only offers new ways to understand relationships between disability criminal justice and law it also proposes theoretical and practical strategies that contribute to the development of a wider reimagining of a more progressive and just socio legal order The book will be of interest to scholars and students of disability law criminal law medical law socio legal studies disability studies social work and criminology It will also be of interest to disability prisoner and social justice activists

A Theory of Legal Punishment Matthew Altman, 2021-05-05 This book argues for a mixed theory of legal punishment that treats both crime reduction and retribution as important aims of the state A central question in the philosophy of law is why the state's punishment of its own citizens is justified Traditionally two theories of punishment have dominated the field consequentialism and retributivism According to consequentialism punishment is justified when it maximizes positive outcomes According to retributivism criminals should be punished because they deserve it This book recognizes the strength of both positions According to the two tiered model the institution of punishment and statutory penalties as set by the legislature are justified based on their costs and benefits in terms of deterrence and rehabilitation The law exists to preserve the public order Criminal courts by contrast determine who is punished and how much based on what offenders deserve The courts express the community's collective sense of resentment at being wronged This book supports the two tiered model by showing that it accords with our moral intuitions commonly held compatibilist theories of freedom and assumptions about how the extent of our knowledge affects our obligations It engages classic and contemporary work in the philosophy of law and explains the theory's advantages over competing approaches from retributivists and other mixed theorists The book also defends consequentialism against a longstanding objection that the social sciences give us little guidance regarding which policies to adopt Drawing on recent criminological research the two tiered model can help us to address some of our most pressing social issues including the death penalty drug policy and mass incarceration This book will be of interest to philosophers legal scholars policymakers and social scientists especially criminologists economists and political scientists

Sentencing Multiple Crimes Jesper Ryberg, Julian V. Roberts, Jan W. de Keijser, 2017-10-10 Most people assume that criminal offenders have only been convicted of a single crime However in reality almost half of offenders stand to be sentenced for more than one crime The high proportion of multiple crime offenders poses a number of practical and theoretical challenges for the criminal justice system For instance how should courts punish multiple offenders relative to individuals who have been sentenced for a single crime How should they be punished relative to each other Sentencing Multiple Crimes discusses these questions from the perspective of several legal theories This volume considers questions such as the proportionality of the crimes committed the temporal span between the crimes and the relationship between theories about the punitive treatment of recidivists and multiple offenders Contributors from around the world and in the fields of legal theory philosophy and psychology offer their perspectives to the volume A comprehensive examination of the dynamics involved with sentencing multiple offenders has the potential to be a powerful tool for legal scholars and professionals particularly given the practical importance of the topic and the relative dearth of research about punishment of multiple offense cases

Infanticide Rachel Dixon, 2023-02-02 Infanticide

examines medical expert evidence in infanticide cases focusing specifically on the shifting notion of certainty in medical testimony Beginning in the Early Modern period and concluding in the mid twentieth century it considers how courts determined whether an infant died from natural causes or other reasons including violence The book explores expert evidence in cases of infanticide and examines the extent of certainty created by medical specialists who founded their testimony on anatomical exploration and science As the book progresses it becomes clear that medical specialists were unable to scientifically establish cause of death and in doing so conveyed uncertainty in court proceedings Rather than being regarded as a professional failing Dixon argues that the uncertainty created by medical specialists redirected the outcomes of infanticide cases The combination of uncertainty and the changing perceptions of infanticidal women by the court lead juries to find infanticidal women not guilty of a capital offence in many cases This book will be of great interest to students and scholars of Criminology Law and History [American Juvenile Justice](#) Franklin E.
