Phenomenology Structuralism Semiology:

Phenomenology, Structuralism, Semiology Harry Raphael Garvin, 1976 *Phenomenology, Structuralism, Semiology* Patrick Brady, 1976 This issue of the Bucknell Review studies the achievements of phenomenology and structuralism and their role in philosophy and in preparing for the emergence of semiotics The articles in this volume reflect the preoccupations of the past decade It is hoped that these essays will suggest some practical critical analysis on this subject

Speaking and Semiology, 1991 No detailed description available for Speaking and Semiology **Bibliography of Semiotics, 1975–1985**, 1986-01-01 This bibliography of semiotic studies covering the years 1975–1985 impressively reveals the world wide intensification in the field During this decade national semiotic societies have been founded all over the world a great number of international national and local semiotic conferences have taken place the number of periodicals and book series devoted to semiotics has increased as has the number of books and dissertations in the field This bibliography is the result of a dedicated effort to approach complete coverage *Speaking and Semiology* Richard L. Lanigan, 2013-02-06 No detailed description available for Speaking and Semiology *Japanese and Western Phenomenology* Philip Blosser, 1993-01-31 This volume has been developed from the first extensive meeting of Japanese and Western phenomenologists which was sponsored by the Center for Advanced Research in Phenomenology Inc and the Phenomenological Association of Japan and held in Santa City Chiefly philosophical and chiefly concerned with Husserl's thought it also shows links with several human sciences and such figures as Wilhelm Dilthey Eugen Fink Martin Heidegger Max Scheler Alfred Schutz and well as with Zen and the Japanese tradition in phenomenology which is second only to the German in age and has recently blossomed anew Further such meetings have occurred and are planning building upon this foundation **Embodiment in the Semiotic Matrix** Isaac E. Catt, 2017-09-22 Communicology is widely accepted on the international scene as a new name for the study of human communication It replaces several equivocal disciplinary conceptions such as communication which may fail to distinguish the science of communication from its object of investigation or the message centered communication studies which often obfuscates information exchange with the experience of shared meaning in human encounters Communicology differs from the American mainstream social science of communication not only because it is grounded in communication theory rather than information theory but also because it advances a philosophically informed ecological perspective on human discourse This book is intended as a contribution to the philosophy of communication and the human science of communicology Semiotic phenomenology is thoroughly described as the synthetic logic that combines a philosophy of consciousness with a science of culture and conduct to explicate the lifeworld habitus Consciousness is viewed as cultural semiotic and experience as personal phenomenological This is a reciprocal reflexive relationship in which culture is conceived as consciousness of communication and communication the manifest experience of culture The book describes embodiment so conceived including the history of the matrix idea in

American pragmatism and European philosophy as they commingled in the United States to produce a unique discipline of communication the science of embodied discourse Important roots of this new discipline are described for the first time here in a unique synthesis of C S Peirce John Dewey Gregory Bateson and Pierre Bourdieu In addition the semiotic relativity hypothesis is argued to be an important implication of this new discipline Transcending the stale debate on language and thought the limited conception of linguistic relativity is considerably broadened and deepened The distinctive lifeworld of humans is argued to occur at the threshold of sign consciousness in the semiotic matrix of culture society person Semiotic phenomenology is not only a synthesis of two great European philosophical movements structuralism and phenomenology it is also the essence of American pragmatism This view culminates in the contemporary human science of communicology

Saussure's Philosophy of Language as Phenomenology Beata Stawarska, 2015-01-15 This book draws on recent developments in research on Ferdinand de Saussure's general linguistics to challenge the structuralist doctrine associated with the posthumous Course in General Linguistics 1916 and to develop a new philosophical interpretation of Saussure's conception of language based solely on authentic source materials This project follows two new editorial paradigms 1 a critical re examination of the 1916 Course in light of the relevant sources and 2 a reclamation of the historically authentic materials from Saussure's Nachlass some of them recently discovered In Stawarska's book this editorial paradigm shift serves to expose the difficulties surrounding the official Saussurean doctrine with its sets of oppositional pairings the signifier and the signified la langue and la parole synchrony and diachrony The book therefore puts pressure not only on the validity of the posthumous editorial redaction of Saussure's course in general linguistics in the Course but also on

its structuralist and post structuralist legacy within the works of Levi Strauss Lacan and Derrida Its constructive contribution consists in reclaiming the writings from Saussure s Nachlass in the service of a linguistic phenomenology which intersects individual expression in the present with historically sedimented social conventions Stawarska develops such a conception of language by engaging Saussure s own reflections with relevant writings by Hegel Husserl Roman Jakobson and Merleau Ponty Finally she enriches her philosophical critique with a detailed historical account of the material and institutional processes that led to the ghostwriting and legitimizing the Course as official Saussurean doctrine *Rethinking Architecture* Neil Leach,2005-12-20 This book brings together the core writings on architecture by key philosophers and cultural theorists of the twentieth century the very best theoretical writings on the ideas which have shaped our cities and experiences of architecture *Handbook of Semiotics* Winfried Noth,1990-09-22 History and Classics of Modern Semiotics Sign and Meaning Semiotics Code and the Semiotic Field Language and Language Based Codes From Structuralism to Text Semiotics Schools and Major Figures Text Semiotics The Field Nonverbal Communication Aesthetics and Visual Communication **Rhetoric, Literature, and Interpretation** Harry Raphael Garvin,1983 In what sense does the literary critic exist in his own right and in what way does his role go beyond that of the teacher mystic philologist historian philosopher rhetorician and literary artist This issue of the Bucknell Review focuses on the opposition of rhetoric and interpretation presenting essays which explore the problems and possibilities critics confront when they adopt either interpretation or rhetoric as a critical starting point Illustrated **Mappings of the Biblical Terrain** Vincent L. Tollers,John R. Maier,1990 Twenty five international biblical scholars and literary theorists apply the methods of literary criticism semantics social criticism theology narratology and gender studies to the Hebrew Bible and the New Testament New connections between Judaism and Christianity are suggested **Science and Literature** Harry Raphael Garvin,James M. Heath,1983 This issue explores the tensions between literature and the sciences focusing on responses which see science as an alien ideology that threatens everything the arts hold dear and on a more positive response that sees the sciences as providing new tools viewpoints and knowledge about the world **Interpreting Greek Tragedy** Charles Segal,2019-05-15 This generous selection of published essays by the distinguished classicist Charles Segal represents over twenty years of critical inquiry into the questions of what Greek tragedy is and what it means for modern day readers Taken together the essays reflect profound changes in the study of Greek tragedy in the United States during this period in particular the increasing emphasis on myth psychoanalytic interpretation structuralism and semiotics **Criticism, History, and Intertextuality** Richard Fleming,Michael Payne,1988 Exploring the dynamics of intertextuality this collection begins with the origins of the idea of the poem as autonomous and coherent object in American New Criticism and the relationship of that idea to the rhetoric of Brooks s Kantian sense of history Succeeding essays demonstrate the intriguing patterns of intertextuality **Michel Foucault's Archaeology of Western Culture** Pamela Major-Poetzl,2017-10-10 The author

argues that Foucault's archaeology is an attempt to separate historical and philosophical analysis from the evolutionary model of nineteenth century biology and to establish a new form of social thought based on principles similar to field theory in twentieth century physics. She examines Foucault's view of the relationship between power and knowledge and goes on to discuss the new concepts of space, time, subject and causality expressed in relativity theory, quantum mechanics, Saussurean linguistics and Foucault's literary essays. In Pursuit of Military Excellence Shimon

Naveh, 2013-04-03. This book offers a scientific interpretation of the field of military knowledge situated between strategy and tactics, better known as operational art, and traces the evolution of operational awareness and its culmination in a full-fledged theory. The author, a Brigadier General, retired in the Israeli Defence Forces, and Doctor of History, King's College London, clarifies the substance of operational art and constructs a cognitive framework for its critical analysis. He chronicles the stages in the evolution of operational theory from the emergence of 19th century military thought to Blitzkrieg. For the first time, the Soviet theories of Deep Operations and Strike Manoeuvre that emerged in the 1920s and 1930 are discussed. The author argues that it is these doctrines that eventually led to the crystallization of the American Airland Battle theory successfully implemented in the Gulf War.

Rene Girard and

Myth. Richard Golsan, 2014-06-11. In this comprehensive introduction to the work of contemporary French critic Rene Girard, Richard Golsan focuses on Girard's theory of myth and its connections to his broader exploration of the origins of suffering and violence in Western culture. Golsan highlights two of Girard's primary concepts: mimetic desire and the scapegoat, and employs the concepts to illustrate the ways Girardian analysis of violence in biblical, classical and folk myths has influenced recent work in theology, psychology, literary studies and anthropology. The book concludes with an interview between Golsan and Girard, who offers his own analysis of the appropriation and criticism of his work by a politically and intellectually diverse company of scholars.
