Astronomy Now, 2008 *NASA Tech Briefs*, 2003 *Viewing and Imaging the Solar System* Jane Clark, 2014-09-24
Viewing and Imaging the Solar System A Guide for Amateur Astronomers is for those who want to develop their ability to observe and image Solar System objects including the planets and moons the Sun and comets and asteroids They might be beginners or they may have already owned and used an astronomical telescope for a year or more Newcomers are almost always wowed by sights such as the rings of Saturn and the moons of Jupiter but have little idea how to find these objects for themselves with the obvious exceptions of the Sun and Moon They also need guidance about what equipment besides a telescope they will need This book is written by an expert on the Solar System who has had a lot of experience with outreach programs which teach others how to make the most of relatively simple and low cost equipment That does not mean that this book is not for serious amateurs On the contrary it is designed to show amateur astronomers in a relatively light hearted and math free way how to become serious *The Air & Space Catalog* Joel Makower, 1989 A comprehensive sourcebook to air and space Arranged in four sections astronomy weather space flight and aviation **A Catalogue Raisonné of the Works of the Most Eminent Dutch Painters of the Seventeenth Century** Cornelis Hofstede de Groot, 1909 *Feminist Literary and Cultural Criticism* Java Singh, 2022-06-19 *Feminist Literary and Cultural Criticism* explores inter disciplinary connections across Cultural Anthropology Geography Psychology and feminist literary criticism to develop a theoretical framework for spatial criticism Using the spatial gynocritics framework developed in the book it analyzes selected texts from five different genres short story novel film cartoons and OTT series created by women The creators discussed in the book constitute a transnational collectivity of women that shares common concerns about gender environment technology and social hierarchies They comprise a geographically and linguistically diverse group from India Uruguay Spain Argentina and the USA The book offers immense potential for a comparative study on numerous aspects among which the present work concentrates on the treatment of Space demonstrating that spatial logic and grammar are essential elements of the feminist praxis The book reveals the unexamined potential in the women creators praxis of destabilizing decentring and destroying the ascribed centres around which social arrangements are structured Moreover the book offers valuable analytic tools that add to scholarship in literary theory comparative cultural studies comparative literature gender studies feminist criticism and interdisciplinary humanities It is an indispensable aid to students and faculty in these areas of study enabling them to critique texts from a fresh perspective *Ezekiel's Gun* Jared Quan, 2010-03-15 **Lunar and Planetary Webcam User's Guide** Martin Mobberley, 2006-08-03 In the last few years cheap webcams have revolutionized amateur astronomy by providing a very inexpensive alternative to purpose made astronomical CCD cameras which use refrigerated imaging chips and are thus extremely expensive Webcams are capable of more advanced work than normal digital cameras because their simple construction makes it easy to remove the webcam s lens allowing it to be interfaced directly to a telescope Using a

webcam is not difficult but most amateur astronomers who have tried to do this do not achieve the finest results despite the webcam's potential. There are numerous imaging and image processing tricks and techniques and all of them are needed to get the best results. Along with webcam technology has come simple to use image processing and enhancement using a PC the most powerful technique is stacking in which the best images out of hundreds are selected and summed automatically to provide startlingly good results. *Lunar and Planetary Webcam User's Guide* demystifies the jargon of webcams and computer processing and provides detailed hints and tips for imaging the Sun, Moon and planets with a webcam. He looks at each observing target separately describing and explaining all specialised techniques in context. Glance through the images in this book to see just how much you can easily achieve by using a webcam with your telescope.

Nostradamus Reveals Lewis Philips, 2018-08-16 From the octagon tower a story unfolds about a group of surfers gathering for adventure, friendship and adrenaline. Bear, LP, Mason, Brownie, George and their friends, a testosterone-amped community of surfers and bikers live on the dangerous side of the law, both by choice and by necessity. But what happens the next day has nothing to do with surfing. A chance discovery is about to change their lives and end a few of them. At the Bora Ring, an ancient Aboriginal ceremonial site in Outback Queensland, a Scroll awaits to be found. In the discovery, each man faces his own curiosity. Has the Dreamtime seeped into the world? Can they trust Tibrogargan, Brownie's folklore ancestor? What messages are the women trying to share and are the women real? That night the men find more questions than answers. Their quest for understanding takes them on a journey spanning over forty years and venturing around the world. Mysticism, spiritualism, drugs, love and violence are but distractions to save and deliver the Scroll. In the year 2010 the Scroll will give up one of its many secrets and when one of the men realises a quatrain from Nostradamus foretold his participation in the journey, they'll learn that their adventure is far from over.
