*Pines and Pioneers* Keim Publications, Wynifred Staples Smith, 1999-01-01 The story of two patriots who worked at the shipbuilding docks after they had lain down their Revolutionary War muskets at Bath Maine Haunted by an ever recurring whisper Taller timber up the river they at last left their jobs for a few days Being devoutly religious they ascribed to God the leading instinct which took them without swerving directly to a hidden pocket of gigantic pines on the shore of Webb Lake in Weld and Carthage Maine They moved their families into the frontier found it necessary to build an Indian fort but finally delivered the logs by drive an impossible task of getting the longest klogs ever seen fourteen miles down the tiny Webb River into the Androscoggin with its dangerous falls and safely delivered at Bath Jacket *Pines and Pioneers* Wynifred Staples Smith, 1965 *The Courthouse and the Depot* Wilber W. Caldwell, 2001 Their songs insist that the arrival of the railroad and the appearance of the tiny depot often created such hope that it inspired the construction of the architectural extravaganzas that were the courthouses of the era In these buildings the distorted myth of the Old South collided head on with the equally deformed myth of the New South **Tapping the Pines** Robert B. Outland III, 2004-12-01 The extraction of raw turpentine and tar from the southern longleaf pine along with the manufacture of derivative products such as spirits of turpentine and rosin constitutes what was once the largest industry in North Carolina and one of the most important in the South naval stores production In a pathbreaking study that seamlessly weaves together business environmental labor and social history Robert B Outland III offers the first complete account of this sizable though little understood sector of the southern economy Outland traces the South s naval stores industry from its colonial origins to the mid twentieth century when it was supplanted by the rising chemicals industry A horror for workers and a scourge to the Southeast s pine forests the methods and consequences of this expansive enterprise remained virtually unchanged for more than two centuries With its exacting attention to detail and exhaustive research *Tapping the Pines* is an essential volume for anyone interested in the piney woods South *The Plant Disease Bulletin* ,1965 *The Plant Disease Reporter* ,1965 *Catalog of Copyright Entries. Foster, Henry David Thoreau, 2009-06-30 In 1977 David Foster took to the woods of New England to build a cabin with his own hands Along with a few tools he brought a copy of the journals of Henry David Thoreau Foster was struck by how

different the forested landscape around him was from the one Thoreau described more than a century earlier The sights and sounds that Thoreau experienced on his daily walks through nineteenth century Concord were those of rolling farmland small woodlands and farmers endlessly working the land As Foster explored the New England landscape he discovered ancient ruins of cellar holes stone walls and abandoned cartways all remnants of this earlier land now largely covered by forest How had Thoreau's open countryside shaped by ax and plough divided by fences and laneways become a forested landscape Part ecological and historical puzzle this book brings a vanished countryside to life in all its dimensions human and natural offering a rich record of human imprint upon the land Extensive excerpts from the journals show us through the vividly recorded details of daily life a Thoreau intimately acquainted with the ways in which he and his neighbors were changing and remaking the New England landscape Foster adds the perspective of a modern forest ecologist and landscape historian using the journals to trace themes of historical and social change Thoreau's journals evoke not a wilderness retreat but the emotions and natural history that come from an old and humanized landscape It is with a new understanding of the human role in shaping that landscape Foster argues that we can best prepare ourselves to appreciate and conserve it today From the journal I have collected and split up now quite a pile of driftwood rails and riders and stems and stumps of trees perhaps half or three quarters of a tree Each stick I deal with has a history and I read it as I am handling it and last of all I remember my adventures in getting it while it is burning in the winter evening That is the most interesting part of its history It has made part of a fence or a bridge perchance or has been rooted out of a clearing and bears the marks of fire on it Thus one half of the value of my wood is enjoyed before it is housed and the other half is equal to the whole value of an equal quantity of the wood which I buy October 20 1855      *Reading the Landscape of America* May Theilgaard Watts, 1999 In this natural history classic the author takes the reader on field trips to landscapes across America both domesticated and wild She shows how to read the stories written in the land interpreting the clues laid down by history culture and natural forces A renowned teacher writer and conservationist in her native Midwest Watts studied with Henry Cowles the pioneering American ecologist She was the first to explain his theories of plant succession to the general public Her graceful witty essays with charming illustrations by the author are still relevant and engaging today as she invites us to see the world around us with fresh eyes
