Regional Worlds: Advancing the Geography of Regions Martin Jones, Anssi Paasi, 2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region This idea prioritises both the intellectual and the practical development of regional studies This book drives the discussion further It stresses the complex forms of agency advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations This book was based on a special issue of *Regional Studies* **The Routledge**

Dividing the Land Edward T. Price, 1995-04-15 Many property lines drawn in early America still survive today and continue to shape the landscape and character of the United States Surprisingly though no one until now has thoroughly examined the process by which land was divided into private property and distributed to settlers from the beginning of colonization to early nationhood In this unprecedented study Edward T Price covers most areas of the United States in which the initial division of land was controlled by colonial governments the original thirteen colonies and Maine Vermont Kentucky West Virginia Tennessee Louisiana and Texas By examining different land policies and the irregular pattern of property that resulted from them Price chronicles the many ways colonies managed land to promote settlement develop agriculture defend frontiers and attract investment His analysis reveals as much about land planning techniques carried to America from

Europe as innovations spurred by the unique circumstances of the new world Price's analysis draws on his thorough survey of property records from the first land plans in Virginia in 1607 to empresario grants in Texas in the 1820s This breadth of data allows him to identify regional differences in allocating land assess the impact of land planning by historical figures like William Penn of Pennsylvania and Lord Baltimore of Maryland and trace changes in patterns of land division and ownership through transfers of power among Britain the Netherlands France Spain Mexico and the Republic of Texas Geography of Time, Place, Movement and Networks, Volume 1 Stanley D. Human Geography Erin H. Fouberg, Alexander B. Murphy, Harm J. de Blij, 2009-01-27 Taking us from our hominid ancestors to the megacities of today Human Geography brings a new

emphasis to the political and economic issues of human geography The State, Development and Identity in Multi-Ethnic Societies Nicholas Tarling, Terence Gomez, 2008-03-03 This book examines ethnic communities identity economy society and state and the links between them in a range of countries across Asia challenging the widely held belief that an authoritarian political system is necessary to ensure communal co existence in developing countries where ethnic minorities have a considerable economic presence *Defending French in Flanders, 1873-1974* David J. Hensley, 2023-12-28 This book examines the efforts of the French speaking minority in Flanders Belgium to maintain a legal and social presence of the French language in Flemish public life Chronologically the study is bookended by two developments almost exactly a century apart In 1873 the first laws were passed which required the use of Dutch in some aspects of public administration in Flanders challenging the de facto use of French among the Flemish ruling class One hundred and one years later the last French daily newspaper in Flanders collapsed marking the end of a once vibrant French language public sphere in Flanders The author contends that the methods and arguments by which French speakers defended the role of French in Flemish public life changed along with the social and political situation of this minority As the Flemish movement grew over the course of the twentieth century French speakers appeals to the free choice of language lost traction and they put forward claims that they represented an ethnolinguistic minority who deserved protection for their mother tongue Providing new insights for scholars of European history and in conversation with the literature on liberalism national identity and Francophonie this book demonstrates how the debate over the role of French in Flanders was at the center of Belgium s ethnolinguistic conflict the repercussions of which continue to be felt to this day **The Belgian Army and Society from Independence to the Great War** Mario Draper, 2018-02-13 This book explores Belgian state building through the prism of its army from independence to the First World War It argues that party politics which often ran along geographical linguistic and religious lines prevented both Flemings and Walloons from reconciling their regional identities into a unified concept of Belgian nationalism Equally it obstructed the army from satisfactorily preparing to uphold Belgium s imposed neutrality before 1914 Situated uneasily between the two powerhouses of nineteenth century Europe Belgium offers a unique insight into the concepts of citizenship and militarisation in a divided society in the era of fervent nationalism By examining the composition experience and image of the army s officer corps and rank and file as well as those of the auxiliary forces this book shows that although military and civilian society often stood aloof from one another the army as a national institution offered a fleeting glimpse into the dichotomy that was pre war Belgium *Urban Regimes and Strategies* A. G. Papadopoulos, 1996-11-15 If a city based its planning decisions on the needs of an international bureaucracy rather than on the traditional needs of local residents and businesses how would that city change Alex G Papadopoulos addresses this question with a detailed study of how the nineteenth century quarters of Leopold and Nord Est in Brussels have been transformed materially and functionally since the European Communities decided to locate their administrative headquarters

there in 1957 Drawing on game and rational choice theories spatial analysis and urban morphology studies Papadopoulos analyzes how the landscape of Brussels s center has evolved over the last three decades under the influence of successive coalitions of local and foreign elites He describes how international real estate developers form ephemeral flexible and specialized regimes of cooperation with governmental organizations at all levels and with special interest lobbies to carry out major urban projects while local neighborhood groups conservationists and political factions such as the Green Party oppose them with qualitatively similar regimes of resistance *Developments in Electoral Geography* Ron Johnston,Fred M. Shelley,Peter J. Taylor,2014-10-03 The essays in this collection show how electoral geography has shifted from empiricist activity towards a closer involvement with the wider issues addressed by social scientists They illustrate the potential contributions that electoral geographers can make towards the understanding of global national and local societies
