**Regional Studies** Glen E. Lich, 1992 Concept of region means different things to different academic disciplines the contributors to this volume agree that the study of regions and regionalism can and should be undertaken with seriousness Contributors include William R Ferris Terry G Jordan Howard R Lamar Ann R Markusen Charles Hamm Samuel S Hill Susan H Armitage Frederic G Cassidy Wilbur Zelinsky Oscar J Martinez and Lynwood Montell Glen E Lich the volume's editor provides a Northwest Lands, Northwest Peoples Dale D. Goble, Paul W. Hirt, 2012-03-15 It can be said that all of human history is environmental history for all human action happens in an environment in a place This collection of essays explores the environmental history of the Pacific Northwest of North America addressing questions of how humans have adapted to the northwestern landscape and modified it over time and how the changing landscape in turn affected human society economy laws and values Northwest Lands and Peoples includes essays by historians anthropologists ecologists a botanist geographers biologists law professors and a journalist It addresses a wide variety of topics indicative of current scholarship in the rapidly growing field of environmental history *Human Geography in Action* Michael Kubly, John Harner, Patricia Gober, 2013-01-14 Michael Kubly's 6th edition of *Human Geography in Action* is comprised of 14 stimulating concept based chapters The text aims to develop geographic problem solving skills that prove valuable to readers Each chapter begins with an introduction to a concept followed by a case study tying the concept into the real world and wraps up with an activity These engaging activities featured throughout the text further its Do Geography approach *Human Geography in Action* provides the opportunity to use GIS to investigate ethnic distributions and culture regions track the AIDS epidemic over space and time model interstate migration flows simulate India's demographic future add new baseball franchises animate past urban growth and assess future growth areas *Regionalism and the Humanities* Timothy R. Mahoney, Wendy J. Katz, 2008-12-01 Although the framework of regionalist studies may seem to be crumbling under the weight of increasing globalization this collection of seventeen essays makes clear that cultivating regionalism lies at the center of the humanist endeavor With interdisciplinary contributions from poets and fiction writers literary historians musicologists and historians of architecture agriculture and women this volume implements some of the most innovative and intriguing approaches to the history and value of regionalism as a category for investigation in the humanities In the volume's inaugural essay Annie Proulx discusses landscapes in American fiction comments on how she constructs characters and interprets current literary trends Edward Watts offers a theory of region that argues for comparisons of the United States to other former colonies of Great Britain including New Zealand Australia and Canada Whether considering a writer's connection to region or the idea of place in exploring what is meant by regionalism these essays uncover an enduring and evolving concept Although the approaches and disciplines vary all are framed within the fundamental premise of the humanities the search to understand what it means to be human A Wetland Biography Gay M. Gomez, 2010-07-05 Louisiana's Chenier Plain is a 2 200 square

mile region of marshes and oak covered ridges cheniers that stretches along the Gulf of Mexico from Sabine Lake to Vermilion Bay Its inhabitants some 6 000 people of Cajun and other ancestries retain strong economic and cultural ties to the land and its teeming wildlife They call it paradise but it is a vulnerable paradise In this multifaceted study Gay Gomez explores the interaction of the land people and wildlife of the Chenier Plain revealing both the uniqueness of the region and the challenges it faces After describing the geography and history of the Chenier Plain Gomez turns to the lifeways of its people Drawing on their words and stories she tells how the chenier dwellers combine modern occupations with traditional pursuits such as alligator and waterfowl hunting fur trapping and fishing She shows how these traditions of wildlife use provide both economic incentives for conservation and a source of personal and place identity This portrait of a working wetland reveals how wildlife use and appreciation can give rise to a stewardship that balances biological economic and cultural concerns in species and habitat protection

**Lone Star Mind** Ty Cashion, 2018-11-01 There is the story the Lone Star State likes to tell about itself and then there is the reality a Texas past that bears little resemblance to the manly Anglo myth of Texas exceptionalism that maintains a firm grip on the state s historical imagination Lone Star Mind takes aim at this traditional narrative holding both academic and lay historians accountable for the ways in which they craft the state s story A clear sighted far reaching work of intellectual history this book marshals a wide array of pertinent scholarship analysis and original ideas to point the way toward a new usable past that twenty first century Texans will find relevant Ty Cashion fixes T R Fehrenbach s Lone Star A History of Texas and the Texans in his crosshairs in particular laying bare the conceptual deficiencies of the romantic and mythic narrative the book has served to codify since its first publication in 1968 At the same time Cashion explores the reasons why the collective efforts of university trained scholars have failed to diminish the appeal of the state s iconic popular culture despite the fuller and more accurate record these historians have produced Framing the search for a collective Texan identity in the context of a post Christian age and the end of Anglo male hegemony Lone Star Mind illuminates the many historiographical issues besetting the study of American history that will resonate with scholars in other fields as well Cashion proposes that a cultural history approach focusing on the self interests of all Texans is capable of telling a more complete story a story that captures present day realities

**The Natural West** Dan Flores, 2003-03-30 The Natural West offers essays reflecting the natural history of the American West as written by one of its most respected environmental historians. Developing a provocative theme, Dan Flores asserts that Western environmental history cannot be explained by examining place, culture, or policy alone but should be understood within the context of a universal human nature. The Natural West entertains the notion that we all have a biological nature that helps explain some of our attitudes towards the environment. Flores also explains the ways in which various cultures, including the Comanches, New Mexico Hispanos, Mormons, Texans, and Montanans, interact with the environment of the West. Gracefully moving between the personal and the objective, Flores intersperses his writings with literature, scientific theory, and personal reflection. The topics cover a wide range from historical human nature regarding animals and exploration to the environmental histories of particular Western bioregions and finally to Western restoration as the great environmental theme of the twenty-first century.

Where is the West? Gordon Morris Bakken, Brenda Farrington, 2000 This anthology examines Love's Labours Lost from a variety of perspectives and through a wide range of materials. Selections discuss the play in terms of historical context, dating, and sources; character analysis; comic elements; and verbal conceits; evidence of authorship; performance analysis; and feminist interpretations. Alongside theater reviews, production photographs, and critical commentary, the volume also includes essays written by practicing theater artists who have worked on the play. An index by name, literary work, and concept rounds out this valuable resource.

*Tejano South Texas* Daniel D. Arreola, 2002-04-15 Examines the cultural geography of Tejano South Texas and the Mexican ancestry of its residents, discussing where they originated when they came to Texas and how the area differs from other Mexican American regions.

**Nature's Northwest** William G. Robbins, Katrine Barber, 2011-04-15 At the beginning of the twentieth century, the greater Northwest was ablaze with change and seemingly obsessed with progress. The promotional literature of the time, praising railroads, population increases, and the growing sophistication of urban living, however, ignored the reality of poverty and ethnic and gender discrimination. During the course of the next century, even with dramatic changes in the region, one constant remained: inequality. With an emphasis on the region's political economy, its environmental history, and its cultural and social heritage, this lively and colorful history of the Pacific Northwest, defined here as Oregon, Washington, Idaho, Montana, and southern British Columbia, places the narrative of this dynamic region within a national and international context. Embracing both Canadian and American stories, in looking at the larger region, renowned historians William Robbins and Katrine Barber offer us a fascinating regional history through the lens of both the environment and society. Understanding the physical landscape of the greater Pacific Northwest and the watersheds of the Columbia, Fraser, Snake, and Klamath rivers sets the stage for understanding the development of the area. Examining how this landscape spawned sawmills, fish canneries, railroads, logging camps, agriculture, and shared immigrant and ethnic traditions reveals an intricate portrait of the twentieth century.

Northwest Impressive in its synthesis of myriad historical facts this first rate regional history will be of interest to historians studying the region from a variety of perspectives and an informative read for anyone fascinated by the story of a landscape rich in diversity natural resources and Native culture      Regions J. Nicholas Entrikin, 2017-05-15 This volume gathers a collection of the most seminal essays written by leading experts in the field which identify or signal many of the changing directions of regional research in geography during the past fifty years Various forms of new regionalism or new regional geography have emerged over the last several decades especially in political and economic geography but in general the region has been a concept in declining use Despite this the region has gained new currency in sub areas of political and economic geography and a so called new regionalism has emerged in studies of the changing nature of the nation state in a globalizing economy Taken together the essays in this volume provide the reader with a comprehensive overview of academic developments in this area of geographical research      Environmental Problems in America's Garden of Eden Gordon Morris Bakken, Brenda Farrington, 2001 This anthology examines Love's Labours Lost from a variety of perspectives and through a wide range of materials Selections discuss the play in terms of historical context dating and sources character analysis comic elements and verbal conceits evidence of authorship performance analysis and feminist interpretations Alongside theater reviews production photographs and critical commentary the volume also includes essays written by practicing theater artists who have worked on the play An index by name literary work and concept rounds out this valuable resource      **The Image of the Frontier in Literature, the Media, and Society** Society for the Interdisciplinary Study of Social Imagery.
