Regional Development in China Yehua Dennis Wei, 2000 Regional Development in China Yehua Dennis Wei, 2013-04-15 This study systematically examines uneven regional development in China focusing on three central agents the foreign investor the state and the region Wei's findings have important implications for theories of and policy towards Chinese regional development This book is a vital resource for those with an interest in transition economies Regional Inequality in Transitional China Felix Haifeng Liao, Yehua Dennis Wei, Li Huang, 2020-09-17 This book investigates uneven regional development in China with particular focus on the cases of Guangdong and Zhejiang provinces which have been at the forefront of debate since Chinese economic reform Rapid economic growth since the opening up of China has been accompanied by significant disparities in the regional distribution of income this book represents one of the most recent studies to present a picture of this inequality Built upon a multi scale and multi mechanism framework it provides systematic examination of both the patterns and mechanisms of regional development and inequality in provincial China emphasizing the effects of economic transition Approaching from a geographical perspective its authors consider the interplay between the local the state and the global forces in shaping the landscape of regional inequality in China Extensive empirical findings will prove useful to those researching other developing countries within the frontier of globalization and economic transition Regional Inequality in Transitional China will appeal to scholars and students of geography economics and Chinese studies more broadly Globalizing Regional Development in East Asia Henry Wai-chung Yeung, 2013-09-13 Significant historical and geographical differences account for the many processes and trajectories of regional development in East Asia These historical and geographical specificities in East Asia have prompted serious re examination of existing theories in regional development and in particular the new regionalism approach associated with such ideas as the learning region institutional thickness relational assets and regional innovation system This book brings together a group of leading researchers specializing in local and regional development in East Asian economies Through in depth empirical studies of specific regions and localities these authors offer fresh and innovative perspectives on how regions evolve and develop over time in the world's most dynamic macro regional economy In particular their work points to the critical importance of local and trans local processes in shaping regional development trajectories The book is timely given that the debate on the nature and dynamics of regional development in both academic and policy circles has now moved on From the earlier focus on endogenous regional assets such as localized networks of association and trust scholars and policymakers are now analyzing the complex relationship between economic globalization and regional change This high calibre collection makes a significant contribution to the literature on local and regional development in Asia and provides an important resource for researchers students and policy makers interested in East Asia This book was published as a special issue of *Regional Studies*

Innovation and Regional Development in China Ingo Liefner, Yehua Dennis Wei, 2013-07-24 Although China is now the

factory of the world there is no reason to expect that it will always be content with manufacturing labor intensive goods for foreign corporations Scholars must now ask What is the current level of innovation in China And how can we face this challenge and renovate industrial production and innovation capacities in developed countries This edited volume investigates the unique characteristics of Chinese innovation and regional development China s policy framework and the role that transnational corporations play in China s increasing innovation activities This book contributes to the heated debate regarding pathways for technology progress and regional development in developing countries and identifies the ways in which local production networks respond to different configurations of external linkages Linking patterns of global and local production networks with the trajectories of technology development and regional development allows the authors to theorize and test whether and how particular configurations of production networks generate divergent long term local productivity growth and technological development outcomes Innovation and Regional Development in China will be of interest to geographers economists China specialists development specialists and scholars working on innovation and regional development in developing areas and transition countries

China's Changing Welfare Mix Beatriz Carrillo,Jane Duckett,2011-06-10 This book draws attention to two neglected areas in the growing body of research on welfare in China subnational variation and the changing mix of state and non state provision The contributors to this volume demonstrate the diversity of local welfare provision that lies behind broad national policies and programmes Their focus on local diversity is particularly relevant to understanding the welfare system in China because national state programmes are so often organized by local governments in line with the specifics of their economic and social development At the same time that social and economic development is itself independently creating an array of different conditions that shape non state family business and third sector welfare roles Through chapters that draw on original research in eight provinces the book adopts a local perspective to illustrate and explain some of the transformations that are under way and discuss not only local government initiatives and programmes but also the services and support provided by families informal social networks and community or third sector organizations as well as those delivered by private businesses on a commercial for profit basis This book will be of interest to students and scholars of Chinese society social policy and Chinese studies more widely Beatriz Carrillo is Lecturer in Asian Studies at the University of Technology Sydney Australia Jane Duckett is Professor of Chinese and Comparative Politics at the University of Glasgow UK

The Geography of Innovation: Local Hotspots and Global Innovation Networks World Intellectual Property Organization,2019-11-08 Through successive industrial revolutions the geography of innovation around the globe has changed radically and with it the geography of wealth creation and prosperity Since the Third Industrial Revolution high incomes are increasingly metropolitan leading to a renewal of inter regional divergence within countries These metropolitan areas are also hotbeds of innovation At the same time global networks for the production and delivery of goods and services have expanded greatly in recent decades The globalization of production is

mirrored in the globalization of innovation This paper argues that the emerging geography of innovation can be characterized as a globalized hub to hub system rather than a geography of overall spread of innovation Although much attention has been given to explaining the rise and growth of innovation clusters there is as yet no unified framework for the micro foundations of the agglomeration and dispersion of innovation In addition there appear to be strong links between growing geographical inequality of innovation and prosperity particularly within countries This is particularly relevant in the context of declining overall research productivity which could be driving growing geographical concentration All in all there is a rich agenda for continuing to investigate the relationship between the geography of innovation economic development and income distribution

China's Governmentalities Elaine Jeffreys, 2009-09-10 Contributes to emerging studies of governmentality in non western and non liberal settings by showing how neoliberal discourses on governance development education the environment community religion and sexual health have been raised in other contexts This book opens discussions of governmentality to other worlds and the global politics of the present

Translocal China Tim Oakes, Louisa Schein, 2006-08-21 Inter disciplinary in approach this collection of essays explores China's reform era development within the concept of translocality A key element of spatial change in today's China has been the unprecedented geographic mobility of millions of labour migrants tourists brides entrepreneurs and many others But translocality doesn't just mean people It is crucially constituted by the circulation of capital ideas images goods styles services and disease to name but a few With contributions from well respected China specialists the essays focus simultaneously on mobilities and localities drawing our attention to the multiplying forms of mobility in China whilst retaining the importance of localities in people's lives The book provides a clear path to understanding the importance of translocality as a concept along with concrete examples of its operation in China Unique in approach it is at once a study of the connections between location and culture politics economics bodies gender and technology

China's Embedded Activism Peter Ho, Richard Edmonds, 2007-10-19 The contributors to China's Embedded Activism focus on the environmental realm one of the most active areas of civil society in modern China

Locating China Jing Wang, 2007-05-07 Taking a multidisciplinary approach this volume examines the relationship between space and the production of local popular culture in contemporary China The international team of contributors examine the inter relationship between the cultural imaginary of a given place and China's continuing drive towards urbanization This has led to the development of new spaces and places and new forms of spatial practices that destabilize old concepts of the local and locality Delivering ethnographic observations and theoretical speculations this work furthers our understanding of the link between spatial thinking and the production of consumer culture in China

Chinese Science and Technology Industrial Parks Susan M. Walcott, 2017-11-30 Title first published in 2003 This book examines types of advanced technology Chinese districts set aside for developing products for national and global markets Culminating in a proposed best practice model for Chinese integration into global networks based on China's own particular political economy

China's Thought Management Anne-Marie Brady, 2012-02-06 China's Thought Management argues that by re-emphasizing and modernizing propaganda and thought work since 1989 the CCP has managed to overcome a succession of local and national level crises the Tiananmen Square protests of 1989 the impact of the collapse of Socialism in the Eastern bloc SARS ethnic clashes in Tibet and Xinjiang to name but a few emerging and re-strengthened and as dominant in Chinese society as ever. The contributors to this book address such crucial issues as the new emphasis on economic propaganda the continued importance of the PLA propaganda system in China's overall propaganda work and political stability how the CCP uses Confucianism in its foreign and domestic propaganda and new approaches to mass persuasion such as campaigns of mass distraction. Each chapter is a case study of the multiple ways in which the CCP has modified and adjusted its propaganda to reflect China's changed economic and political environment. Challenging readers to reconceptualise mainstream understandings of the CCP's hold on power and the means the CCP government adopts to maintain its authority to rule this book will be invaluable reading for anyone interested in the Chinese media and Chinese politics. *Choosing China's Leaders* Chien-wen Kou, Xiaowei Zang, 2013-10-08

Political elites are a key topic in contemporary China studies and have been investigated in relation to factional politics generation politics technocracy and crucially institutionalization. The institutionalization of elite replacement began in China in the 1980s and quickly accelerated after the early 1990s as mechanisms emerged to regulate political elites' entry and exit including age limits term limits and step by step promotion. By examining the various processes of elite selection this book explores the role played by institutionalization in elite recruitment promotion and turnover in China. While existing studies have developed our understanding of Chinese elite politics two key puzzles regarding institutionalisation remain. Although institutionalisation is recognised as an important trend in Chinese politics there is as yet no theoretical framework to explain the forces that have brought about and sustained this. Further it is unclear how the process of institutionalisation has impacted on factional politics and how factions would continue to operate within the parameters of formal politics. Drawing on a wide range of studies this book looks at Politburo members senior People's Liberation Army officers provincial leaders heads of major central state owned enterprises and Youth League affiliates to provide a comprehensive understanding of elite recruitment and mobility in contemporary China. This book will be of great interests to students and scholars of Chinese politics and government Chinese studies and Asian politics more broadly.

Policing Serious Crime in China Susan Trevaskes, 2012-08-06 Despite a resurgence in the number of studies of Chinese social control over the past decade or so no sustained work in English has detailed the recent developments in policy and practice against serious crime despite international recognition that Chinese policing of serious crime is relatively severe and that more people are executed for crime in China each year than in the rest of the world combined. In this book the author skilfully explores the politics practice procedures and public perceptions of policing serious crime in China focusing on one particular criminal justice practice anti crime campaigns in the period of transition from planned to market economy from

the 1980s to the first years of the twenty first century Susan Trevaskes analyzes the elements that led to the Hard Strike becoming the preferred method of attacking the growing problem of serious crime in China before going on to examine the factors surrounding the failure of the Hard Strike as a way of addressing the main problems of serious crime in China today that is drug trafficking and organized crime Drawing on a rich variety of Chinese sources Serious Crime in China is an original and informed read for scholars of China criminologists generally and the international human rights community

China's Reforms and International Political Economy, *New Mentalities of Government in China* David Bray, Elaine Jeffreys, 2016-01-13 China continues to transform apace flowing from the forces of deregulation privatization and globalization unleashed by economic reforms which began in late 1978 The dramatic scope of economic change in China is often counterposed to the apparent lack of political change as demonstrated by continued Chinese Communist Party CCP rule However the ongoing dominance of the CCP belies the fact that much has also changed in relation to practices of government including how authorities and citizens interact in the management of daily life New Mentalities of Government in China examines how the privatization and professionalization of public service provision is transforming the nature of government and everyday life in the People's Republic of China PRC The book addresses key theoretical questions on the nature of government in China and documents the emergence of a range of new mentalities of government in China Its chapters focus on areas such as clinical trials conceptualizing government consumer activity elite philanthropy lifestyle and beauty advice public health social work volunteering and urban and rural planning Offering a topical examination of shifting modes of governance in contemporary China this book will appeal to scholars in the fields of anthropology history politics and sociology **China's Reforms and International Political Economy** David Zweig, Zhimin Chen, 2009-05-21 Written by an international team of experts this important and interesting text gives vital insights into China's likely development and international influence in the next decade *China's Rational Entrepreneurs* Barbara Krug, 2004-07-31 The ability of China's entrepreneurs to establish firms in the midst of a strangling bureaucratic system is a topic which demands attention not least because it forms the basis of China's economic development Combining theoretical approaches with extensive fieldwork China's Rational Entrepreneurs presents a fresh angle of analysis for understanding the behaviour of Chinese entrepreneurs and what kind of relations they have with local government in order to secure long term business success *Small Town China* Beatriz Carrillo Garcia, 2011-04-19 While much has been written about rural migrant workers experiences in the big cities population movements into China's vast network of towns and small cities has been largely neglected This book presents a detailed case study of rural migrant workers experiences in a small town in a north China county The author explores the processes and institutions that enable or preclude the social inclusion of rural workers into the town's socio-economic system Inclusion and exclusion are assessed through an examination of rural workers immersion into the urban labour market their access to welfare benefits and to social services such as housing education and health The book proposes

that outside the larger cities there are alternative accounts of urban social change and of the integration of rural migrant workers. It stresses the fact that the particular socio-economic structure of towns where the state-owned share of the economy has been smaller and where consequently social and private forces have been more active allowed for a more open inclusion of rural workers. Though shortcomings are still observed, the book suggests that China's transformation may not necessarily result in dysfunctional and socially polarized urban environments. This book will be of interest to students and scholars of China's rural migrant workers, bottom-up urbanization and small town development, social policy and more broadly on contemporary social change in China.
