Regionalization of the Law of the Sea Law of the Sea Institute. Conference,1978 *The Role of Regional Organizations in the Context of Climate Change* Michael H. Glantz,2013-06-29 The past two decades have seen a remarkable broadening of interest in global warming from a research concern on the part of a limited number of scientists to a political problem on a worldwide scale The nature of this transformation would itself be a fruitful study for a mixed team of social scientists and natural scientists It would be valuable to assess the differing nature of the staging posts along this road the First World Climate Conference in 1979 which was a meeting of scientists talking to scientists the Villach Assessment of 1985 which was a meeting of scientists whose report was given attention by the policy advisers of a number of governments the Second World Climate Conference of 1990 which consisted of a scientific meeting followed by a Ministerial Meeting and the United Nations Framework Convention on Climate Change of 1992 signed by 158 countries at the UN Conference on Environment and Development in June 1992 The present publication is a welcome contribution of the followup to UNCED By focusing on a specific problem it avoids the pitfall of undue generalization and provides the basis for fruitful discussion between natural scientists social scientists and policymakers To choose as the area of concentration a particular scale also helped to produce meaningful discussion likely to lead to action Canadian Perspectives on Economic Relations with Japan Joint Centre on Modern East Asia,Institute for Research on Public Policy,1980 Marine Regionalism in the Southeast Asian Seas Lewis M. Alexander,1982 **The Management of Marine Regions: The North Pacific** Edward Miles,Stephen Gibbs,David Fluharty,Christine Dawson,David Teeter,2023-07-28 The North Pacific Project was established at the Institute for Marine Studies University of Washington in September 1976 and was funded by the Rockefeller Foundation This funding eventually covered the period September 1 1976 to August 31 1980 The Project seeks to identify and describe in detail the major marine policy problems of the North Pacific region The North Pacific Project was established at the Institute for Marine Studies University of Washington in September 1976 and was funded by the Rockefeller Foundation This funding eventually covered the period September 1 1976 to August 31 1980 The Pacific Ocean Boundary Problems Mark J. ,1980 *Ocean Boundary Making* Douglas M. Johnston, Phillip Saunders, 2024-05-01 Originally published in 1988 this book was written at a time when many nations were engaged in various forms of ocean boundary making This created new regional pressures and the need for collective regional responses to these issues This book examines the issues at stake and the boundary making processes It discusses these in a general way showing how the Third UN conference on the Law of the Sea helped resolve the problems whilst leaving some issues unresolved The book goes on to examine the issues and boundary making processes in 7 important areas of the world *Maritime Regime Building* Mark J. Valencia, 2001-06-20 The past few decades have witnessed the emergence of a vast array of regional arrangements and institutions dealing with all aspects of ocean management The level of cooperation ranges from minimal dispute avoidance to relatively comprehensive ocean governance at the regional level As concrete examples reasonably successful and comprehensive regional regimes have been created for the Baltic the North and the Mediterranean Seas and the South Pacific And attempts at regional regime building are ongoing in Southeast Asia the South China Sea and the Indian Ocean Although there are broad similarities between the semi enclosed seas of Western Europe and Northeast Asia no regional maritime regime has yet been initiated in Northeast Asia The papers in this volume are authored by leading authorities on not only the maritime affairs of their particular region of focus but on maritime policy in general They describe and explain existing or incipient regional maritime regimes in an unusually broad comparative context and extract lessons learned that may be applicable elsewhere including Northeast Asia The case studies are neatly sandwiched between an introduction to concepts and principles on regional co operation and concluding chapters on lessons learned and their applicability to Northeast Asia Moreover the papers raise and address several questions of relevance to policy For example what factors are conducive to maritime regime initiation expansion and positive evolution and which constrain regime formation and evolution Why has maritime regime building been successful in Europe and largely unsuccessful in Asia And which if any lessons learned in the European context are applicable in Asia Given the growing interest in regime formation and effectiveness in general and maritime regimes in particular this book will be of considerable interest to both analysts and policymakers **Regional Approaches to Controlling Land-based Marine Pollution** Marsudi Triatmodjo, 1990 *Regional Control of Ocean Pollution* C.O. Okidi, 2022-07-18 [Global Challenges in the Arctic Region](#) Elena Conde, Sara Iglesias Sánchez, 2016-08-05 Bringing together interconnected discussions to make explicit the complexity of the Arctic region this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national regional and international level One of the intrinsic features of the region is the difficulty in the determination of boundaries responsibilities and interests Against this background sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and at the same time influence national

approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region This perspective lays the ground for further discussion revolving around the main clusters of governance focusing on the Arctic Council and the European Union with the particular roles and interest of Arctic and non Arctic states and the impact on indigenous populations environment including the relevance of national regulatory schemes and the intertwinement with concerns related to energy or migration strategy concentrating in geopolitical realities and challenges analysed from different perspectives and focusing on different actors and covering security and climate change related challenges This collection provides an avenue for parallel and converging research of complex realities from different disciplines through the expertise of scholars from different latitudes
