Regulating Menstruation:

Regulating Menstruation Etienne van de Walle, Elisha P. Renne, 2001-06 Menstruation seen alternately as something negative a curse or a failed conception or as a positive part of the reproductive process to be celebrated as evidence of fertility has long been a universal concern How women interpret and react to menstruation and its absence reflects their individual needs both historically as well as in the contemporary cultural social economic and political context in which they live This unique volume considers what is known of women s options and practices used to regulate menstruation practices used to control the periodicity quantity color and even consistency of menses in different places and times while revealing the ambiguity that those practices present Originating from an Internet conference held in February 1998 this volume contains fourteen papers that have been revised and updated to cover everything from the impact of the birth control pill to contemporary views on reproduction to the pharmacological properties of various herbal substances reflecting the historical contemporary and anthropological perspectives of this timely and complex issue *The Palgrave Handbook of Critical Menstruation Studies* Chris Bobel, Inga T. Winkler, Breanne Fahs, Katie Ann Hasson, Elizabeth Arveda Kissling, Tomi-Ann Roberts, 2020-07-24 This open access handbook the first of its kind provides a comprehensive and carefully curated multidisciplinary and genre spanning view of the state of the field of Critical Menstruation Studies opening up new directions in research and advocacy It is animated by the central question what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course The chapters diverse in content form and perspective establish Critical Menstruation Studies as a potent lens that reveals complicates and unpacks inequalities across biological social cultural and historical dimensions This handbook is an unmatched resource for researchers policy makers practitioners and activists new to and already familiar with the field as it rapidly develops and expands *Menstruation and Procreation in Early Modern France* Cathy McClive, 2016-03-03 Early modern bodies particularly menstruating and pregnant bodies were not stable signifiers Menstruation and Procreation in Early Modern France presents the first full length discussion of menstruation and its uncertain connections with embodied sex gender and reproduction in early modern France Attitudes to menstruation are explored in three inter linked arenas medicine moral theology and law across the sixteenth to the eighteenth centuries Drawing on a wide range of diverse sources including court records and private documents the author uses case studies to explore the relationship between the exceptional corporeality of individuals and attempts to construct menstrual norms reflecting on how early modern individuals lay or otherwise grappled with the enigma of menstruation She analyzes how early modern men and women accounted for the function recurrence and appearance of menstruation from its role in maintaining health to the link between other physiological and bodily processes including those found in both male and female bodies She questions the assumption that menstruation was exclusively associated with women by the second half of the eighteenth century arguing that whilst sex related menstruation was not sex specific even at the turn of the nineteenth

Menstruation remains a contentious topic today This book is not therefore simply a study of periods in early modern France but is also of necessity an exploration about the nature and constitution of historical evidence particularly bodily evidence and how historians use this evidence It raises important questions about the concept of certainty and about the value of observation testimony expertise the nature of language and the construction of bodily truths about the body as witness and the body as evidence **The Routledge Handbook of Anthropology and Reproduction** Sallie Han,Cecília

Tomori,2021-11-09 The Routledge Handbook of Anthropology and Reproduction is a comprehensive overview of the topics approaches and trajectories in the anthropological study of human reproduction The book brings together work from across the discipline of anthropology with contributions by established and emerging scholars in archaeological biological linguistic and sociocultural anthropology Across these areas of research consideration is given to the contexts conditions and contingencies that mark and shape the experiences of reproduction as always gendered classed and racialized Over 39 chapters a diverse range of international scholars cover topics including Reproductive governance stratification justice and freedom Fertility and infertility Technologies and imaginations Queering reproduction Pregnancy childbirth and reproductive loss Postpartum and infant care Care kinship and alloparenting This is a valuable reference for scholars and upper level students in anthropology and related disciplines associated with reproduction including sociology gender studies science and technology studies human development and family studies global health public health medicine medical humanities and midwifery and nursing **Abortion and Contraception in Modern Greece, 1830-1967** Violetta Hionidou,2020-05-15

The book examines the history of abortion and contraception in Modern Greece from the time of its creation in the 1830s to 1967 soon after the Pill became available It situates the history of abortion and contraception within the historiography of the fertility decline and the question of whether the decline was due to adjustment to changing social conditions or innovation of contraceptive methods The study reveals that all methods had been in use for other purposes before they were employed as contraceptives For example Greek women were employing emmenagogues well before fertility was controlled they did so in order to put themselves right and to enhance their fertility When they needed to control their fertility they employed abortifacients some of which were also emmenagogues while others had been used as expellants in earlier times Curettage was also employed since the late nineteenth century as a cure for sterility once couples desired to control their fertility curettage was employed to procure abortion Thus couples did not need to innovate but rather had to repurpose old methods and materials to new birth control methods Furthermore the role of physicians was found to have been central in advising and encouraging the use of birth control for health reasons thus facilitating and speeding fertility decline in Greece All this occurred against the backdrop of a state and a church that were at times neutral and at other times disapproving of fertility control
