Regulation And The Nature Of Postal And Delivery Services:

Regulation and the Nature of Postal and Delivery Services Michael A. Crew, Paul R. Kleindorfer, 2012-12-06 This book is based on a conference on Regulation and the Evolving Nature of Postal and Delivery Services 1992 and Beyond held at Village PTT La Londe les Maures France on March 18 1992 Leading practitioners worldwide postal administrations and the express delivery industry as well as a number of regulators academic economists and lawyers examine the important policy and regulatory issues facing the postal and delivery industries This includes such issues as international postal policy and the role of the Universal Postal Union regulation and terminal dues competition entry and the role of scale and scope economies the nature and role of costs analysis in postal service productivity and service standards Postal and Delivery Services Michael A. Crew, Paul R. Kleindorfer, 2013-12-01 When Postmaster General Creswell penned his concern about the impact of electronic diversion on his postal organization the year was 1872 General Creswell it turned out fretted unnecessarily Facsimile did not achieve commercial viability until roughly a century after his tenure as Postmaster General and today that technology is fading rapidly from the communication scene Moreover it never appears to have significantly affected physical letter volumes However if General Creswell were leading a major postal organization today he likely would feel threatened by the potential of Internet communication to cause electronic diversion of physical mail Should recent technology developments cause the oft predicted but so far incorrect inflection point that would mark the beginning of declining mail volumes the implications from a management standpoint will be profound The relatively fixed nature of postal costs suggest that volume declines must be offset though improved productivity reduced cost of inputs revenue from new products that share common costs or reduced level of universal service *Commercialization of Postal and Delivery Services: National and International Perspectives* Michael A. Crew, Paul R. Kleindorfer, 2012-12-06 xiii We have almost the cheapest letter price in the OECD We've quadrupled the retail outlets where you can buy stamps but closed three quarters of our Post Offices On time delivery is better than 97% The workforce has been reduced by 40% with a 25% increase in volumes over the period Real unit costs measured by total real expenditure divided by total volumes have been reduced by over 20% What do these results and achievements mean for policy setters around the world In particular do these results for New Zealand Post prove that it is a commercial business and what are the lessons for other postal businesses Market Forces New Zealand Post presently has a limited letter monopoly a 45 cent letter price against an 80 cent competitive floor price The existence of this level of protection somehow negates the company's commercial achievements The combination of high efficiency and low prices cannot persuade everyone that the results are not my view are the only ones that can solely monopoly driven Market forces in answer my question is New Zealand Post a commercial organization We need the test of free and open competition to see whether we've got the business formula right Before advancing this argument which in essence is the case for deregulation it may be useful to distinguish between market behavior and Post behavior **Regulatory and Economic**
