Gender-related Legal Reform and Access to Economic Resources in Eastern Africa Gita Gopal, 1999 The impetus for change in African legal reform is coming primarily from African women themselves as they respond to their personal and practical experiences with the law Top down imposition of norms has not worked if legal reform is to lead to sustainable equity for women the voices of these women must be heard Given that previous efforts to ensure greater equity in personal laws have not been fully successful in eastern African countries any new legal initiatives must not repeat the mistakes of the past Law must not again remain merely on the books as a legitimizing tool that reinforces or supports gender discrimination but must actively protect and guard the interests of both men and women This paper attempts to draw out some possible lessons from past experience to inform new efforts at legal reform in these countries It examines the laws related to allocation of economic resources within households in the broader historical social and cultural context in some of these countries and examines the effectiveness of these laws in challenging gender relationships

Broadman, 1998-01-01 To enhance and sustain economic prosperity Russian authorities must improve the business climate so that firms restructure and the private sector thrives within a market environment Meeting this challenge requires actions on several fronts The Russian government asked the World Bank to write policy papers to address this issue This volume contains those policy papers which were then presented at a high level workshop in Moscow The topics include removing impediments to robust interfirm competition such as structural concentration arbitrary regulatory practices and entry barriers strengthening corporate governance incentive systems enhancing the nascent institutional framework for the exercise of creditor rights and implementation of enterprise bankruptcy procedures reducing barter and other nonmonetary forms of business transactions and fostering enterprise restructuring The volume also contains formal comments on these papers presented by senior Russian officials at the workshop **Economic Growth with Equity** K. J. Langford, Christine L. Forster, Duncan M. Malcolm, 1999 Latin America and the Caribbean Region Viewpoints Many articles have been written about the causes of financial crises in emerging market Much less attention has been devoted to the effectiveness of alternative policy responses and the ensuing process of recovery of the real economy This paper analyzes the adjustment process in the aftermath of speculative attacks in six countries Argentina Brazil Mexico Indonesia Korea and Thailand As implied by the title the main question to be addressed is whether the tales of adjustment in these Latin American and Asian economies were

similar This comparison is interesting for several reasons The six countries came under the aegis of adjustment programs supported by international financial institutions and the associated policy prescriptions have been at the center of attention Of the six cases one is an example of a successful defense of the currency while another exemplifies a temporarily successful defense followed by an incomplete adjustment program The others experienced dramatic currency devaluations This small sample of episodes of adjustment also offers variety in the magnitude of the ensuing economic decline While the Mexican and Argentine crises of 1995 and even the Brazilian adjustment after the October 1997 attack against its currency were certainly costly the Asian crises have been deeper and the recovery of the real economy has been slower The paper draws policy implications for reducing the costs of the macroeconomic adjustment after currency crises Also available English edition 1999 52 pages Stock no 14541 ISBN 0 8213 4541 9

FINANCIAL DISINTERMEDIATION Grace Mingyan Du,2023-01-02 With historical and comparative method this book explores financial disintermediation which besets both the United States and China and extends the thinking up to the evolutionary trend of capitalism and socialism Different from the previous research this book delves into the first cause which induces financial disintermediation namely the basic deficiency of capitalism liquidity crisis and the countermeasures which various institutional systems have taken for dealing with it The conclusion reveals that the upheaval was initiated from the founding of financial safety net During the Great Depression by adopting financial safety net the previous evolving track of American financial system was ended and a new path launched financial disintermediation The starting point for China was the setout of the reform and opening up In the West financial safety net formulates a dualistic regulatory regime which spurred financial disintermediation Severe financial disintermediation has led up to a series of thorny issues including the resurgence of liquidity crisis the financialization of the economy and too big to fail and debt overhang and widening wealth disparity and so on In China the main difference with its western counterpart should be the replacement of asset quality deterioration in financial system to liquidity crisis The root problem lies in that some matched institutions needed for guaranteeing its positive effects are desperately absent or weak so it is a must to strengthen them and steadfastly arrest financial disintermediation simultaneously For that both regimes should learn from each other
