## **Regulation School A Critical Introduction:**

**The Regulation School** Robert Boyer,1990      **Dalit Capital** Aseem Prakash,2020-12-17 Dalit Capital explores the relation between caste and Indian capitalism It explores the ways in which caste and social discrimination reinvent themselves under the guise of modern capitalism It demonstrates how inclusion holds Dalits at a disadvantage perpetrated by the state markets and the civil society      **Distrust** Russell Hardin,2004-05-20 If trust is sometimes the rational response in interpersonal relations then it can also be rational to distrust Indeed distrust is the preferred response when it protects against harm as when parents do not entrust the safety of their child to a disreputable caretaker Liberal political theory was largely founded on distrust of government and the assumption that government cannot and should not be trusted led the framers of the U S constitution to establish a set of institutions explicitly designed to limit government power With contributions from political science anthropology economics psychology and philosophy Distrust examines the complex workings of trust and distrust in personal relationships groups and international settings Edna Ullman Margalit succinctly defines distrust as the negation of trust and examines the neutral state between the two responses in interpersonal relations As Margalit points out people typically defer judgment while remaining mildly wary of another s intentions until specific grounds for trust or distrust become evident In relations between nations misplaced trust can lead to grievous harm so nations may be inclined to act as though they distrust other nations more than they actually do Editor Russell Hardin observes that the United States and the former Soviet Union secured a kind of institutionalized distrust through the development of the nuclear deterrent system that stabilized the relationship between the two countries for four decades In another realm where distrust plays a prominent role Margaret Levi Matthew Moe and Theresa Buckley show that since the National Labor Relations Board has not been able to overcome distrust between labor unions and employers it strives to equalize the power held by each group in negotiations Recapitulating liberal concerns about state power Patrick Troy argues that citizen distrust keeps government regulation under scrutiny and is more beneficial to the public than unconditional trust Despite the diversity of contexts examined the contributors reach remarkably similar conclusions about the important role of trust and distrust in relations between individuals nations and citizens and their governments Distrust makes a significant contribution to the growing field of trust studies and provides a useful guide for further research A Volume in the Russell Sage Foundation Series on Trust      National Diversity and Global Capitalism Suzanne Berger,Ronald Dore,2018-10-18 How does globalization change national economies and politics Are rising levels of trade capital flows new communication technologies and deregulation forcing all societies to converge toward the same structures of production and distribution Suzanne Berger and Ronald Dore have brought together a distinguished group of experts to consider how the international economy shapes and transforms domestic structures Drawing from experience in the United States Europe and Asia the contributors ask whether competition imitation diffusion of best practice trade and financial flows are reducing national

diversities The authors seek to understand whether the sources of national political autonomy are undermined by changes in the international system Can distinctive varieties of capitalism that incorporate unique and valued institutions for achieving social welfare survive in a global economy The contributions to the volume present a challenge to conventional views on the extent and scope of globalization as well as to predictions of the imminent disappearance of the nation state s leverage over the economy

*Dark Horizons* Tom Moylan, Raffaella Baccolini, 2003 *Dark Horizons* presents new essays on the dystopian turn of late twentieth century science fiction Leading scholars discuss major dystopian traditions including cyberpunk and feminist utopian dystopian narratives as seen in works such as Octavia Butler s novel *Xenogenesis* and the film *Fight Club* These essays draw out the ways in which contemporary science fiction literature and film has served as a prophetic vehicle for writers with ethical and political concerns

**Trading Blows** James Shoch, 2003-01-14 For the past two decades trade policy has been high on the American political agenda thanks to the growing integration of the United States into the global economy and the wealth of debate this development has sparked Although scholars have explored many aspects of U S trade policy there has been little study of the role played by party politics With *Trading Blows* James Shoch fills that gap Shoch offers detailed case studies of almost all of the major trade issues of the Reagan Bush and Clinton eras including administrative and legislative efforts to curb auto steel and other imports and to open up markets in Japan and elsewhere as well as free trade initiatives such as the North American Free Trade Agreement NAFTA the General Agreement on Tariffs and Trade GATT treaty that concluded the Uruguay Round of international trade talks the extension of presidential fast track trade negotiating authority and the approval of permanent normal trade relations with China In so doing he explains the complex patterns of party competition over U S trade policy since 1980 and demonstrates the significant impact that party politics has had on the nation s recent trade policy decisions

*The Transition to Flexibility* Daniel C. Knudsen, 2012-12-06 The advanced capitalist nations are currently undergoing an enormous economic social and political transformation At the heart of this transformation is the transition between large scale standardized production Fordism and new more flexible approaches to manufacturing flexibility and a concomitant extension of manufacturing to include products both concrete goods and ephemeral services This volume explores the consequences of this transition from the standpoints of technology labor relations firm strategy education government programs and geography The book is a collection of papers by well known scholars investigating the current global transition from mass consumption and production to flexible production for niche markets The book is unique in that it not only discusses standard economic concerns but also investigates the social and political implications of this transition Each chapter is concerned with a different aspect of the same restructuring process

**Approaches to Economic Geography** Ray Hudson, 2016-06-10 The last four decades have seen major changes in the global economy with the collapse of communism and the spread of capitalism into parts of the world from which it had previously been excluded Beginning with a grounding in Marxian political economy this book explores a range of new ideas as to what economic geography can offer as it intersects with public policy and planning in the new globalised economy Approaches to Economic Geography draws together the formidable work of Ray Hudson into an authoritative collection offering a unique approach to the understanding of the changing geographies of the global economy With chapters covering subjects ranging from uneven development to social economy this volume explores how a range of perspectives including evolutionary and institutional approaches can further elucidate how such economies and their geographies are reproduced Subsequent chapters argue that greater attention must be given to the relationships between the economy and nature and that more consideration needs to be given to the growing significance of illegal activities in the economy The book will be of interest to students studying economic geography as well as researchers and policy makers that recognise the importance of the relationships between economy and geography as we move towards a sustainable future economy and society

*Politics in the New Hard Times* Miles Kahler, David A. Lake, 2013-04-15 The Great Recession and its aftershocks including the Eurozone banking and debt crisis add up to the worst global economic crisis since the Great

Depression of the 1930s Although economic explanations for the Great Recession have proliferated the political causes and consequences of the crisis have received less systematic attention Politics in the New Hard Times is the first book to focus on the Great Recession as a political crisis one with both political sources and political consequences The authors examine variation in crises over time and across countries rather than treating these events as undifferentiated shocks Chapters also explore how crisis has forced the redefinition and reinforcement of interests at the level of individual attitudes and in national political coalitions Throughout the authors stress that the Great Recession is only the latest in a long history of international economic crises with significant political effects and that it is unlikely to be the last **Literary Materialisms**

M. Nilges,E. Sauri,2013-08-13 Literary Materialisms addresses what has become a fundamental concern in the last decade how do we today define literary studies as an academic discipline and literature as a relevant object of study Avoiding unproductive proclamations this volume unites new materialist critical thinking with a commitment to fundamental principles

*Locating Capitalism in Time and Space* David Nugent,2002 The last several decades have witnessed major restructurings economic political and cultural in the international arena The depth and scope of these changes have prompted anthropologists to rethink many of their most basic assumptions to problematize issues that have long gone unexamined and to grapple with new and unique problems Doing so has left the discipline profoundly unsettled Existing standards of scholarship and research methodologies have come under attack key conceptual categories have been called into question and truths once considered secure have been subjected to severe scrutiny and even ridicule Seizing upon the opportunity afforded by the contemporary conjuncture of disciplinary crisis and redefinition this book raises questions about two interrelated aspects of historical process and academic production The volume contributes to ongoing debates about the degree to which the developments of recent decades represent the advent of a new historical era a rupture with the past that requires new conceptualizations and logics in order to be understood In confronting this question the contributors to this volume have assembled a range of materials that place the present period of reconstruction in the context of a broader history and geography of other related restructurings *Locating Capitalism in Time and Space* also raises questions about the degree to which the scholarship of recent decades represents a qualitative break with that of the past At issue here is whether one understands the history of academic production as a linear process of intellectual growth punctuated by major breakthroughs in understanding or as a political process structured by the same kinds of inequalities and struggles that characterize the social worlds that are the object of anthropological analysis **Deep transformations** Hubert

Buch-Hansen,Max Koch,Iana Nesterova,2024-05-14 As a research field social movement and political project degrowth is a multi faceted phenomenon It brings together a range of practices including alternative forms of living and initiatives of various kinds in civil society business and the state Yet no comprehensive theory of degrowth transformations has so far been developed *Deep transformations* fills this gap It develops a theory of degrowth transformations drawing on insights from

multiple fields of knowledge such as political economy sociology and philosophy The book offers a holistic perspective that brings into focus transformation processes on various scales and points to various mechanisms that can facilitate degrowth These for instance include ecosocial policies transformative initiatives in business and civil society and alternative modes of being in and relating to the world      **Towards Teaching in Public** Mike Neary, Les Bell, Howard Stevenson, 2012-02-02

**Towards Teaching in Public** Reshaping the Modern University explores how the contested relationships between policy curriculum and pedagogy are reshaping the modern university and examines the impact of conceptualisations of teaching in public on this debate in this age of academic capitalism It traces the emergence of strategies for open access with particular reference to the contribution of technology and e learning to the emergence of teaching in public as a critique of current educational policy The contributors combine policy analysis with a consideration of pedagogical issues and an exploration of the student experience This collection draws together chapters by experienced scholars and practitioners within the field of teaching and learning in higher education      **Handbook Global History of Work** Karin Hofmeester, Marcel van der Linden, 2017-11-20 Coffee from East Africa wine from California chocolate from the Ivory Coast all those every day products are based on labour often produced under appalling conditions but always involving the combination of various work processes we are often not aware of What is the day to day reality for workers in various parts of the world and how was it in the past How do they work today and how did they work in the past These and many other questions comprise the field of the global history of work a young discipline that is introduced with this handbook In 8 thematic chapters this book discusses these aspects of work in a global and long term perspective paying attention to several kinds of work Convict labour slave and wage labour labour migration and workers of the textile industry but also workers organisation strikes and motivations for work are part of this first handbook of global labour history written by the most renowned scholars of the profession

**Germany's Hidden Crisis** Oliver Nachtwey, 2018-11-27 How neoliberalism is causing a crisis in Germany Upward social mobility represented a core promise of life under the old West German welfare state in which millions of skilled workers upgraded their Volkswagens to Audis bought their first homes and sent their children to university Not so in today's Federal Republic where the gears of the so called elevator society have long since ground to a halt In the absence of the social mobility of yesterday widespread social exhaustion and anxiety have emerged across mainstream society Oliver Nachtwey analyses the reasons for this social rupture in postwar German society and investigates the conflict potential emerging as a result He concludes that although the country has managed to muddle through thus far simmering tensions beneath the surface nevertheless threaten to undermine the German system's stability in the years to come Recipient of the Friedrich Ebert Foundation 2016 Hans Matthäfer Preis for Economic Writing      [More with Less](#) Bob Russell, 1999-01-01 The massive changes under way in capitalist commodity production include the transition from a traditional or Fordist approach to a post Fordist one involving practices such as employee involvement continuous improvement and gainsharing In this research

monograph Bob Russell explores the changing character of industrial relations and labour processes in two staple industries potash and uranium mining Using an innovative case analytic approach Russell compares the managerial strategies used by five transnational firms As indicated by his title More with Less he sees the shift toward post Fordism as having more to do with the intensification of labour accomplished in part through the creation of multitasked positions than with worker empowerment and the transcendence of class conflict Russell combines extensive empirical analysis with a review of contemporary writing on work relations and labour processes to provide this intensive political economic perspective on the capital labour relation His meticulous research will interest scholars and professionals in Canada the United States Britain Europe and Australia

### **Rethinking Regional Innovation and Change: Path Dependency or Regional Breakthrough**

Gerhard Fuchs, Philip Shapira, 2005 To what extent can regions diverge from established paths of economic development Are their futures determined by institutional and industrial structures that may be hundreds of years old or do innovations transfers and adaptations of knowledge technology learning systems and policy mechanisms offer realistic opportunities for regional development Rethinking Regional Innovation and Change Path Dependency or Regional Breakthrough brings together papers from leading international scholars in the field of regional development and policy The contributors examine the interactions between path dependent developments institutions and governance structures that influence regional innovation capacity Using cases from both highly developed and less developed regions they explore the complex relationships between technical and industrial development paths and regional institutions They assess the extent to which regional innovative capacity can be increased by strengthening re orienting or creating institutions and policies and they examine opportunities for reflexive practice at the regional level as a critical tool in orienting regional development Up to date case studies present diverse theoretical perspectives from economics political science geography planning and public policy This volume will be of particular interest to researchers analysts and policymakers in the fields of regional development innovation policy and institutional and organizational change as well as faculty and students in public policy public administration planning geography regional economics and economic development

### **Framing and Managing**

**Lean Organizations in the New Economy** Darina Lepadatu, Thomas Janoski, 2020-02-18 This book examines the dominance and significance of lean organizing in the international economy Scholars from each discipline see lean production as positive or negative the book blends theory with practice by sorting out these different academic views and revealing how lean is implemented in different ways The first part synthesizes academic research from a range of disciplines including engineering sociology and management to present the reader with an integrated understanding of the benefits and drawbacks of lean management The second part links this theory to practice with a set of case studies from companies like Apple Google Nike Toyota and Walmart that demonstrate how lean is implemented in a variety of settings The book concludes with three models explaining how Toyotism Nikefication with offshoring and Waltonism provide full or less complete models of lean production

It clearly presents the positive and negative aspects of lean and insights into the culture of lean organizations With its rich interdisciplinary approach *Framing and Managing Lean Organizations in the New Economy* will benefit researchers and students across a range of classes from management sociology and public policy to engineering *Industries and Markets in Central and Eastern Europe* Mr William T Bagatelas, Ms Jana Kubicová, Professor Bruno S Sergi, 2012-10-01 A combination of rigorous analysis and case material this book is an essential guide to trade and industry developments in Central and Eastern Europe Its scope encompasses globalization the business strategies of MNCs agriculture services and the dynamics of innovation It also considers the trading relationships of these countries with Russia as well as the influence of trade on the democratization of states formerly belonging to the USSR
