Regional Office for Europe, 2000. This book brings together the scientific evidence on the main effects of transport on human health and the environment. It sets the conceptual framework for future analyses of the health burden and health gains from transport policies. It outlines how these health concerns have been reflected in policy tools such as impact assessment, regulation and economic analysis, and identifies the areas where action is most needed. Discussions of the environment and health effects of transport need to be communicated in a way that is relevant for policy makers and easily understood by nonscientists. That is the aim of this book, which summarizes the results of extensive reviews of the issues prepared by groups of prominent international experts. It is also planned to release the reviews themselves to give a more detailed account of the scientific evidence. Foreword. *Advanced Technologies and Methodologies for Risk Management in the Global Transport of Dangerous Goods* C. Bersani, 2008-09-15.
