*China's Quest for Political Legitimacy* Baogang Guo,2010-09-23 This book examines the new equity enhancing politics in China in the context of Chinese traditional cognitive patterns of political legitimacy and its implication for Chinese political development in the near future Based on an analysis of the new governing philosophy the generation of political elite and a new set of public policies the book reaffirms the emergence of a new Chinese polity that infuses one party rule with limited electoral and deliberative democracies Unlike many scholars who perceive the contemporary Chinese history as a constant search for democracy this book takes a very different approach It asserts that the enduring question in political development in China today is no different from what was sought after throughout Chinese history namely the constant search for political legitimacy Even though the quest for democracy is instrumental to that end it may not ultimately lead to the embrace of a full fledged liberal democracy The new politics is not only a rationalization of the efficiency based development but also a major paradigm shift in China s developmental strategy

**The Politics of Regulatory Reform** Stuart Shapiro,Debra Borie-Holtz,2014-01-21 Regulation has become a front page topic recently often referenced by politicians in conjunction with the current state of the U S economy Yet despite regulation s increased presence in current politics and media The Politics of Regulatory Reform argues that the regulatory process and its influence on the economy is misunderstood by the general public as well as by many politicians In this book two experienced regulation scholars confront questions relevant to both academic scholars and those with a general interest in ascertaining the effects and importance of regulation How does regulation impact the economy What roles do politicians play in making regulatory decisions Why do politicians enact laws that require regulations and then try to hamper agencies abilities to issue those same regulations The authors answer these questions and untangle the misperceptions behind regulation by using an area of regulatory policy that has been underutilized until now Rather than focusing on the federal government Shapiro and Borie Holtz have gathered a unique dataset on the regulatory process and output in the United States They use state specific data from twenty eight states as well as a series of case studies on regulatory reform to question widespread impressions and ideas about the regulatory process The result is an incisive and comprehensive study of the relationship between politics and regulation that also encompasses the effects of regulation and the reasons why regulatory reforms are enacted

*Reforming the Workplace* Joseph Rees, 2016-11-11 Government regulatory agencies are too often tangled webs of bureaucracy fraught with internal politics and in conflict with both industries and individuals How to instigate and implement the needed reform is a timely issue that is currently being debated Reforming the Workplace is an account of a successful program that is now a model for nationwide improvements in various regulatory agencies Joseph Rees's focus is the Occupational Safety and Health Administration OSHA which in 1982 announced a major shift in policy from strict government regulation to self regulation by industries with proven safety records In California this resulted in the Cooperative Compliance Program CCP an arrangement among labor unions management and California OSHA that became responsible for overseeing safety regulations at seven large construction sites throughout the state In his detailed study of the CCP Joseph Rees provides important empirical data and assesses the reasons the program succeeded That success is so important he demonstrates because the CCP represents a different approach to reform self regulation that can be extended to and tailored for many troubled agencies Reforming the Workplace is a comprehensive study that will be a valuable resource for scholars and students of law and social policy in general and of federal regulation policies in particular

*The Political Economy of Environmental Regulation* Robert N. Stavins, 2004 This new authoritative collection comprises previously published papers on the political economy of environmental regulation economic analyses of the processes through which political decisions regarding environmental regulation are made principally in the institutional context found in the United States Despite this geographic focus many of the papers contain analytical models that are methodologically of interest and or have lessons that are relevant in other parts of the world In the environmental realm questions of political economy emerge along three fundamental dimensions which are closely interrelated but conceptually distinct 1 the degrees of government activity 2 the form of government activity and 3 the level of government that has responsibility The first three parts of the book deal

respectively with these three fundamental dimensions of inquiry The fourth part of the book examines the use of economic analysis in contemporary environmental policy The Political Economy of Environmental Regulation will be of significant interest to environmental scholars students and policy makers alike *Building New Competition Law Regimes* David Lewis, 2013 Nearly every important country now has a competition law It is vital to understand the institutions that drive the operation of these laws This excellent volume provides case studies of some of the more substantial new competition authorities written by former or current top agency officials and academics closely connected with those institutions The book highlights the fact that whilst these institutions have certain features in common they are very much shaped by the history and circumstances of their own countries and cultures and that any serious prescription for them needs to balance those factors against the general economic doctrines that lie behind competition law around the world Without that understanding regulators and those dealing with them are likely to face failure The book points to ways of resolving those problems Allan Fels The Australia and New Zealand School of Government ANZSOG This detailed book focuses on the development of competition law institutions and contains case studies that examine this against the backdrop of the debate around global convergence of competition law and the limits imposed by particular national circumstances Five of the chapters examine the development of competition law regimes in a diverse range of countries Mexico Hungary South Africa Thailand with comparative remarks on South Korea and Zambia The remaining chapters examine the role of multinational institutions particularly the International Competition Network and the practice of and potential for regional competition law arrangements The majority of the authors are seasoned practitioners of competition law all of whom acknowledge the importance of convergence while simultaneously demonstrating the limits imposed by divergent national circumstances This carefully edited collection is a companion volume to *Enforcing Competition Rules in South Africa* an account of the development of competition law institutions in South Africa authored by David Lewis and published by Edward Elgar *Building New Competition Law Regimes* will be of particular benefit to scholars teachers and practitioners of competition law It will also be of interest to development studies scholars teachers and practitioners and to specialists in the countries that are the subjects of the case studies **Progress in Policy Reforms to Improve the Investment Climate in South East Europe Investment Reform Index 2006** OECD, 2007-11-13 This report constitutes one of the pillars of the Investment Compact's work It provides governments with an overview of each country's performance on investment policy reform and will support them in setting priorities and further improving the investment environment
