**Pollock's Textbook of Cardiovascular Disease and Rehabilitation** J. Larry Durstine, 2008 Dedicated to Michael Pollack 1936 1998 a preeminent scientist in the field and intended as an up to date reference to both scientific and clinical topics this volume comprises 34 contributed chapters combining the expertise of physicians with that of specialists in exercise and behavioral science Early chapters discuss the history of cardiovascular rehabilitation the epidemiology of cardiovascular disease exercise as medicine from antiquity to the present risk factor intervention and clinical practice guidelines Following are chapters on pathophysiology diagnosis and medical management lifestyle management common comorbidities and complications and rehabilitation

**Cardiovascular Prevention and Rehabilitation** Joep Perk, Peter Mathes, Helmut Gohlke, Irene Hellems, Catherine Monpère, Hannah McGee, Philippe Sellier, Hugo Saner, 2007-09-18 In the network of cardiologists within the European Society of Cardiology Working Group on Cardiac Rehabilitation and Exercise Physiology there is a strong view that the time indeed is right to publish definitively on the methods involved in cardiovascular prevention and rehabilitation We are facing a transition from conventional cardiac rehabilitation to a phase of combined preventive and rehabilitative efforts as witnessed in the recent Joint Task Force Guidelines on Preventive Cardiology For this revision of our clinical routines we lack a practical textbook based upon the conditions and resources of European health care This textbook is designed to fill that gap

**Psychological Approach to the Rehabilitation of Coronary Patients** U. Stocksmeier, 2012-12-06 The increasing frequency of coronary diseases the still insufficient results of prevention have brought physicians to try to reduce as much as possible the consequences of ischaemic heart disease Coronary units and new treatments have somewhat reduced the dramatic complications of the acute phase but after the latter evil effects of the disease remain at the physiological psychological and social level It is the aim of rehabilitation to analyze these problems to reduce them or to solve them whenever possible When this conception of complete coronary care took the lead the conditioning effects of heart disease and of immobilization on physical condition

ons were emphasized physical training programmes were prepared and their main lines and physiological effects are now fairly well known But it was soon obvious that the psychological problems raised by the patient and his environment are equally important Their approach is however much more difficult and their treatment particularly complex So the Council on Rehabilitation of the International Society of Cardiology is really grateful to Professor Dr HALHUBER and Dr Dr STOCKSMEIER for giving the opportunity to specialists to discuss together this particular aspect of coronary disease The discussions have been devoted to the methods of approaching the patient as well as to the therapeutic aspects and the role of psychologists in the rehabilitation programmes some papers have been devoted also to the possible role of the personality as a risk factor in the development of the disease

Rehabilitation After Myocardial Infarction Angela Mary Jackson,Sue Gregory,Brian McKinstry,Amanda Amos,2009 Background and goals This thesis explores the experience of rehabilitation following myocardial infarction MI from the perspective of people who did not attend either a cardiac rehabilitation programme CR or a CHD self help group and their significant others These resources are intended to support post MI rehabilitation and readjustment and research identifies various benefits yet many people do not use them Given the scale of the population affected by CHD the issues of why people do not use the resources their experience and that of their family members and the kinds of support people need and want are of public health importance These issues formed my investigative goals Methods The study used a qualitative methodology informed by grounded theory A screening questionnaire identified non participants from the post MI population in Lothian from which a sample of maximum diversity was selected In depth interviews were conducted with twenty seven post MI people and seventeen significant others The analysis combined identifying emergent themes and searching the data for key issues relating to study objectives Findings Additional to the barrier of non invitation a spectrum of factors relating to people s lifeworld circumstances beliefs and identity could either encourage or discourage participation Factors were highly similar for both resources Reasons for and the process of non participation could be grouped into three categories No need no point Not worth it or Not possible These were based on the way the factors that influenced individuals related to three key issues Shifts between categories were also possible A link between non participation and a range of rehabilitation difficulties among post MI people and family members is also demonstrated Conclusions and implications The study addresses a gap in understanding post MI non participation and its significance providing insight into the process by which CR and CHD Group nonuse occurs and the impacts for people who have had MI and family members Recommendations are made identifying realistic ways rehabilitation support might be improved barriers and opportunities and areas for further investigation
