Abstract

Background: Foot impairments in early rheumatoid arthritis are common and lead to progressive deterioration of lower limb function. A gait rehabilitation programme underpinned by psychological techniques to improve adherence, may preserve gait and lower limb function. This study evaluated the feasibility of a novel gait rehabilitation intervention (GREAT Strides) and a future trial.

Methods: This was a mixed methods feasibility study with embedded qualitative components. People with early (< 2 years) rheumatoid arthritis (RA) and foot pain were eligible. Intervention acceptability was evaluated using a questionnaire. Adherence was evaluated using the Exercise Adherence Rating Scale (EARS). Safety was monitored using case report forms. Participants and therapists were interviewed to explore intervention acceptability. Deductive thematic analysis was applied using the Theoretical Framework of Acceptability. For fidelity, audio recordings of intervention sessions were assessed using the Motivational Interviewing Treatment Integrity (MITI) scale. Measurement properties of four candidate primary outcomes, rates of recruitment, attrition, and data completeness were evaluated.

Results: Thirty-five participants (58.6% female) with median age (inter-quartile range (IQR)) 60.1 (49.4–68.4) years and disease duration 9.1 (4.0–16.2) months, were recruited and 23 (65.7%) completed 12-week follow-up. Intervention acceptability was excellent; 23/23 were confident that it could help and would recommend it; 22/23 indicated it made sense to them. Adherence was good, with a median (IQR) EARS score of 17/24 (12.5–22.5). One serious adverse event that was unrelated to the study was reported. Twelve participants' and 9 therapists' interviews confirmed intervention acceptability, identified perceptions of benefit, but also highlighted some barriers to completion. Mean MITI scores for relational (4.38) and technical (4.19) aspects of motivational interviewing demonstrated good fidelity. The Foot Function Index disability subscale performed best in terms of theoretical consistency and was deemed most practical.

fully revised and updated Dr Barbara Gladson's Pharmacology for Rehabilitation Professionals 2nd Edition remains your best resource for understanding how various drugs affect patients during therapeutic exercise and rehabilitation. Using case studies and engaging activities it helps you apply essential pharmacology information directly to rehabilitation practice. New chapters, a new reader-friendly design, new artwork, and more enhance the text and bring you up to date with both basic pharmacologic principles as well as the mechanism of action and side effects of drugs commonly seen in rehabilitation practice. Helps you develop effective exercise programs by providing drug exercise interactions from a pharmacokinetics perspective. You will clearly see the implications for exercise for each specific condition and medication. Presents case studies in every chapter that demonstrate the effects of various drugs on the diagnosis, prognosis, and interventions in physical therapy so you can more easily monitor patients for adverse drug effects. Features engaging activities in every chapter ranging from patient interviews to challenging real-life questions helping you retain and apply what you've learned. Encourages you to use the latest research in your clinical decision making with evidence-based content incorporated throughout. Simplifies the complex topic of pharmacokinetics so that you will fully understand how it affects your individual patients and your care plans. Guides you in using the Internet for online drug information with references to specific sites and when and how to use them to their fullest potential. Discusses lifespan considerations such as age, physical differences, and obesity as well as the latest information on diabetes and glucose testing. A new chapter on Complementary and Alternative Medicine in Pharmacology covers popular herbal and alternative products used to promote health as well as herbal remedies used during menopause and in the treatment of cancer helping you recognize the impact of herbals on your patients' symptoms and response to therapy. A new chapter on Drugs Affecting the Integumentary System discusses skin disorders and their pharmacological treatment, prophylactic and debriding agents, antiseptics, and more. A new chapter on Nutrition and Pharmacology provides current information on vitamins and minerals, enteral and parenteral nutrition, and food and drug interactions, important topics that affect rehabilitation outcomes. Updated drug information and new drugs are added throughout the text keeping you up to date with current pharmacological information as it pertains to rehabilitation.

Geriatric Rehabilitation K. Rao Poduri, 2017-03-16 Geriatric Rehabilitation addresses the fact that this is an age in which individuals have increasing longevity, better health care, education, and expectations of health care which present new, increasing, and even radical challenges to health care providers. The care of our older patients in rehabilitation settings demands the broad understanding of the key differences in strategies to care for older adults. The combined skills embraced in rehabilitation and geriatrics are presenting unprecedented opportunities for both fields to make substantive and even ground-breaking improvements in the lives of millions of older adults who entrust their lives to us. Rarely in one's medical career are such opportunities so evident and achievable. Geriatric Rehabilitation, edited by Dr K Rao Poduri MD FAAPMR, draws on a distinguished group of authors who are the front-line providers of care to the older adults. This book presents the

full spectrum of the unique care needs of older patients who need the combined skills of physical medicine and geriatrics It provides an easily accessible means of acquiring and improving these new skills for all those involved in geriatric care
