THE DIGITAL ECONOMY IS REAL AND IT'S HERE TO STAY

Nearly 90% of the Fortune 500 companies have disappeared, merged, or contracted in the last 60 years. During the same period, the average life span of companies has gone down from 62 years to 58 years.¹

Digital transformation started two decades ago with the fast adoption of Internet 1.0 (World Wide Web, wireless, e-commerce, social). This completely transformed how we communicate, live, and work. It also had a massive impact on many industries.

The next 10 years are going to be even more disruptive with the advent of Internet 2.0, where everything is connected (Internet of Things, connected homes, connected cars), value is exchanged in new ways (blockchain) and software runs the world (Artificial Intelligence, augmented reality). All of these technologies will find new applications that dramatically transform every industry in every region. At the current market disruption rate, 75% of S&P 500 companies from 2012 will be replaced by 2027.²

Internet 2.0 will drive massive opportunities and threats for every company. It's not just about productivity or business process optimization; it will impact the very existence of the business – the business model.

It is paramount in today's reality that every CEO and management team are well-versed in digital technologies and have clear plans to reimagine their business models to meet the challenges of the new reality.

In this article, we present a simple framework on the art of the possible in business model innovation. We will discuss the six most successful and proven digital business models that companies can evaluate as part of their digital strategy.
