

Reinterpreting the French Revolution

A GLOBAL-HISTORICAL
PERSPECTIVE

BAILEY STONE

Reinterpreting The French Revolution

David Andress

Reinterpreting The French Revolution:

Reinterpreting the French Revolution Bailey Stone, 2002-11-04 This book provides a synthesis of the most recent scholarly literature on the diplomatic political social economic and cultural history of eighteenth century and revolutionary France On the basis of that synthesis and current theoretical writing on major modern revolutions the book argues that the outbreak of the French Revolution and the dramatic developments of the subsequent ten years were attributable to the interacting pressures of international and domestic politics on those national leaders attempting to govern France and to modernize its institutions The book furthermore contends that the Revolution of 1789 1799 reconceptualized in this fashion needs to be placed in the larger contexts of early modern and modern French history and modern progressive sociopolitical revolutions In staking out these positions the book offers a unique interpretation of the French Revolution one that dissents from both the Marxian socioeconomic orthodoxy of earlier times and more recent political cultural analyses

Reinterpreting the French Revolution: A Global-Historical Perspective Bailey Stone (1946), 2004 Stone draws on the latest scholarship on diplomatic political social economic and cultural history of eighteenth century and revolutionary France to attribute the outbreak of the French Revolution and later developments to pressures of international and domestic politics on those national leaders attempting to govern France and to modernize its institutions

Reinterpreting the French Revolution Jack A. Goldstone, 1984

1789 David Andress, 2009-03-03 The world in 1789 stood on the edge of a unique transformation At the end of an unprecedented century of progress the fates of three nations France the nascent United States and their common enemy Britain lay interlocked France a nation bankrupted by its support for the American Revolution wrestled to seize the prize of citizenship from the ruins of the old order Disaster loomed for the United States too as it struggled in the face of crippling debt and inter state rivalries to forge the constitutional amendments that would become known as the Bill of Rights Britain a country humiliated by its defeat in America recoiled from tales of imperial greed and the plunder of India as a king's madness threw the British constitution into turmoil Radical changes were in the air A year of revolution was crowned in two documents drafted at almost the same time the French Declaration of the Rights of Man and the American Bill of Rights These texts gave the world a new political language and promised to foreshadow new revolutions even in Britain But as the French Revolution spiraled into chaos and slavery experienced a rebirth in America it seemed that the budding code of individual rights would forever be matched by equally powerful systems of repression and control David Andress reveals how these events unfolded and how the men who led them such as Benjamin Franklin Thomas Paine Emmanuel Joseph Sieyès and George Washington stood at the threshold of the modern world Andress shows how the struggles of this explosive year from the inauguration of George Washington to the birth of the cotton trade in the American South from the British Empire's war in India to the street battles of the French Revolution would dominate the Old and New Worlds for the next two centuries

The Anatomy of Revolution Revisited Bailey Stone, 2014 This study aims to update a

classic of comparative revolutionary analysis Crane Brinton's 1938 study *The Anatomy of Revolution* It invokes the latest research and theoretical writing in history political science and political sociology to compare and contrast in their successive phases the English Revolution of 1640-60 the French Revolution of 1789-99 and the Russian Revolution of 1917-29 This book intends to do what no other comparative analysis of revolutionary change has yet adequately done It not only progresses beyond Marxian socioeconomic class analysis and early revisionist stresses on short term accidental factors involved in revolutionary causation and process it also finds ways to reconcile state centered structuralist accounts of the three major European revolutions with postmodernist explanations of those upheavals that play up the centrality of human agency revolutionary discourse mentalities ideology and political culture

The Wars of the French Revolution Charles J Esdaile, 2018-10-03 *The Wars of the French Revolution 1792-1801* offers a comprehensive and jargon free coverage of this turbulent period and unites political social military and international history in one volume Carefully designed for undergraduate students through twelve chapters this book offers an introduction to the origins and international context of the French Revolution as well as an in depth examination of the reasons why war began Aspects unpicked within the book include how France acquired a de facto empire stretching from Holland to Naples the impact of French conquest on the areas concerned the spread of French ideas beyond the frontiers of the French imperium the response of the powers of Europe to the sudden expansion in French military power the experience of the conflicts unleashed by the French Revolution in such areas as the West Indies Egypt and India and the impact of war on the Revolution itself Offering extensive geographical coverage and challenging many preconceived ideas *The Wars of the French Revolution 1792-1801* is the perfect resource for students of the French Revolution and international military history more broadly

[How the West Came to Rule](#) Alexander Anievas, Kerem Nişancıoğlu, 2015-06-20 Winner of International Studies Association ISA's International Political Sociology Best Book Prize for 2017 Winner of British International Studies Association BISA's International Political Economy Working Group Book Prize of 2016 Shortlisted for the ISA Book Prize Mainstream historical accounts of the development of capitalism describe a process which is fundamentally European a system that was born in the mills and factories of England or under the guillotines of the French Revolution In this groundbreaking book a very different story is told *How the West Came to Rule* offers a interdisciplinary and international historical account of the origins of capitalism It argues that contrary to the dominant wisdom capitalism's origins should not be understood as a development confined to the geographically and culturally sealed borders of Europe but the outcome of a wider array of global processes in which non European societies played a decisive role Through an outline of the uneven histories of Mongolian expansion New World discoveries Ottoman Habsburg rivalry the development of the Asian colonies and bourgeois revolutions Alexander Anievas and Kerem Nisancıoğlu provide an account of how these diverse events and processes came together to produce capitalism

The French Revolution and the People David Andress, 2004-01-01 Shares the personal stories of middle class citizens

and peasants who experienced the French Revolution firsthand discussing their everyday lives and the factors that motivated their participation in the conflict's political and social upheavals Revolutions in the Atlantic World, New Edition Wim Klooster, 2018-01-23 Introduction Empires at war Civil war in the British Empire the American Revolution The war on privilege and dissension the French Revolution From prize colony to black independence the revolution in Haiti Multiple routes to sovereignty the Spanish American revolutions The revolutions compared causes patterns legacies **A Social History of France 1780-1914** Peter McPhee, 2017-03-03 This volume provides a lively and authoritative synthesis of recent work on the social history of France and is now thoroughly updated to cover the long nineteenth century from 1789 1914 Peter McPhee offers both a readable narrative and a distinctive coherent argument about this remarkable century and explores key themes such as Peasant interaction with the environment The changing experience of work and leisure The nature of crime and protest Changing demographic patterns and family structures The religious practices of workers and peasants The ideology and internal repercussions of colonisation At the core of this social history is the exercise and experience of social relations of power not only because in these years there were four periods of protracted upheaval but also because the history of the workplace of relations between women and men adults and children is all about human interaction Stimulating and enjoyable to read this indispensable introduction to nineteenth century France will help readers to make sense of the often bewildering story of these years while giving them a better understanding of what it meant to be an inhabitant of France during that turbulent time Citizen Soldiers and the Key to the Bastille Julia Osman, 2015-01-06 Showcasing French participation in the Seven Years War and the American Revolution this book shows the French army at the heart of revolutionary social and cultural change Osman argues that efforts to transform the French army into a citizen army before 1789 prompted and helped shape the French Revolution *Re-Interpreting Blackstone's Commentaries* Wilfrid Prest, 2014-12-01 This collection explores the remarkable impact and continuing influence of William Blackstone's Commentaries on the Laws of England from the work's original publication in the 1760s down to the present Contributions by cultural and literary scholars and intellectual and legal historians trace the manner in which this truly seminal text has established its authority well beyond the author's native shores or his own limited lifespan In the first section Words and Visions Kathryn Temple Simon Stern Cristina S Martinez and Michael Meehan discuss the Commentaries aesthetic and literary qualities as factors contributing to the work's unique status in Anglo American legal culture The second group of essays traces the nature and dimensions of Blackstone's impact in various jurisdictions outside England namely Quebec Michel Morin Louisiana and the United States more generally John W Cairns and Stephen M Sheppard North Carolina John V Orth and Australasia Wilfrid Prest Finally Horst Dippel Paul Halliday and Ruth Paley examine aspects of Blackstone's influential constitutional and political ideas while Jessie Allen concludes the volume with a personal account of Reading Blackstone in the Twenty First Century and the Twenty First Century through Blackstone This volume is a sequel to the well

received collection Blackstone and his Commentaries Biography Law History Hart Publishing 2009 A Brief History of France, Revised and Updated Cecil Jenkins, 2017-07-13 When we think of France we tend to think of fine food and wine the elegant boulevards of Paris or the chic beaches of St Tropez Yet as the largest country in Europe France is home to extraordinary diversity The idea of Frenchness emerged through 2 000 years of history and it is this riveting story from the Roman conquest of Gaul to the present day that Cecil Jenkins tells of the forging of this great nation through its significant people and events and its fascinating culture As he unfolds this narrative Jenkins shows why the French began to see themselves as so different from the rest of Europe but also why today the French face the same problems with regard to identity as so many other European nations The First Total War David A. Bell, 2014-06-03 A mesmerizing account that illuminates not just the Napoleonic wars but all of modern history It reads like a novel Lynn Hunt Eugen Weber Professor of modern European history UCLA The twentieth century is usually seen as the century of total war But as the historian David A Bell argues in this landmark work the phenomenon actually began much earlier in the era of muskets cannons and sailing ships in the age of Napoleon In a sweeping evocative narrative Bell takes us from campaigns of extermination in the blood soaked fields of western France to savage street fighting in ruined Spanish cities to central European battlefields where tens of thousands died in a single day Between 1792 and 1815 Europe plunged into an abyss of destruction It was during this time Bell argues that our modern attitudes toward war were born Ever since the dream of perpetual peace and the nightmare of total war have been bound tightly together in the Western world right down to the present day in which the hopes for an end to history after the cold war quickly gave way to renewed fears of full scale slaughter With a historian's keen insight and a journalist's flair for detail Bell exposes the surprising parallels between Napoleon's day and our own including the way that ambitious wars of liberation such as the one in Iraq can degenerate into a gruesome guerrilla conflict The result is a book that is as timely and important as it is unforgettable Thoughtful and original Bell has mapped what is a virtually new field of inquiry the culture of war Steven L Kaplan Goldwin Smith Professor of European history Cornell University **Writing the History of Nationalism** Stefan Berger, Eric Storm, 2019-09-19 What is nationalism and how can we study it from a historical perspective Writing the History of Nationalism answers this question by examining eleven historical approaches to nationalism studies in theory and practice An impressive cast of contributors cover the history of nationalism from a wide range of thematic approaches from traditional modernist and Marxist perspectives to more recent debates around gender postcolonialism and the global turn in history writing This book is essential reading for undergraduate students of history politics and sociology wanting to understand the complex yet fascinating history of nationalism *Rethinking Revolutionary Change in Europe* Bailey Stone, 2020-02-17 Reconsidering the English French and Russian Revolutions this book offers an important new approach to the theoretical and comparative study of revolutions Bailey Stone proposes an innovative neostructuralist integration of competing structuralist and postmodernist theory Providing a balanced and nuanced critique

of both sides he presents new ways of understanding radical change in the European polities that created the concept and the dramatic realities of modern revolution He focuses on the central issues of modernizers versus traditionalists old regime bourgeoisies regicides terror and state legitimacy By reconciling political and cultural theories of revolutionary causation and process Stone s synthesis marks a critical advance in our understanding of revolution

The Justification of War and International Order Lothar Brock,Hendrik Simon,2021 In the past few decades the understanding of the relationship between nations has undergone a radical transformation The role of the traditional nation state is diminishing along with many of the traditional vocabularies which were once used to describe what has been called ever since Jeremy Bentham coined the phrase in 1780 international law The older boundaries between states are growing ever more fluid new conceptions and new languages have emerged which are slowly coming to replace the image of a world of sovereign independent nation states which has dominated the study of international relations since the early nineteenth century This redefinition of the international arena demands a new understanding of classical and contemporary questions in international and legal theory It is the editors conviction that the best way to achieve this is by bridging the traditional divide between international legal theory intellectual history and legal and political history The aim of the series therefore is to provide a forum for historical studies from classical antiquity to the twenty first century that are theoretically informed and for philosophical work that is historically conscious in the hope that a new vision of the rapidly evolving international world its past and its possible future may emerge Book jacket

France, Britain, and the Struggle for the Revolutionary Western Mediterranean Joshua Meeks,2017-01-23 This book investigates the conflict over control over the Western Mediterranean in the late eighteenth century The Western Mediterranean during the 1790s featured a constant struggle for control over the region While most histories point to military events such as the Italian Campaign as descriptive of this struggle between the two competing ideological forces of Revolutionary France and the Counter Revolutionary First Coalition led by Britain this book takes a different approach Rather than looking at the struggle between ideologies this book looks at the struggle within those ideologies arguing that the Western Mediterranean states were not simply the battlefields or the prizes of the struggle but were active participants with goals of autonomy or neutrality The focus stretches beyond conflict between France and Britain into the adaptation of ideology for different uses in Tuscany Toulon Algiers Spain and especially Corsica

The Oxford Handbook of the Ancien Régime William Doyle,2012 An exploration of current scholarly thinking about the wide and surprisingly complex range of historical problems associated with the study of Ancien Régime Europe

The Birth of a Great Power System, 1740-1815 Hamish Scott,2014-07-22 The Birth of a Great Power System 1740 1815 examines a key development in modern European history the origins and emergence of a competitive state system H M Scott demonstrates how the well known and dramatic events of these decades the emergence of Russia and Prussia the three partitions of Poland the continuing retreat of the Ottoman Empire the unprecedented territorial expansion of Revolutionary

and Napoleonic France halted by the final defeat of Napoleon were part of a wider process that created the modern great power system dominated by Europe's five leading states. Enhanced by maps and a chronology of principal events, this comprehensive and accessible textbook is fully up to date in its coverage of recent scholarship. Unlike many other treatments of this period, Scott extends his beyond the French Revolution of 1789 in order to demonstrate how events both before and after this great upheaval merged to produce the central political development in modern European history. This book addresses the crucial phase in the emergence of the modern international system, which with the subsequent addition of the USA, Japan and Russia has prevailed until the present day.

The Enthralling Realm of Kindle Books: A Comprehensive Guide Revealing the Advantages of E-book Books: A Realm of Ease and Versatility E-book books, with their inherent portability and ease of access, have freed readers from the constraints of physical books. Done are the days of carrying bulky novels or meticulously searching for particular titles in shops.
