Dickman,2008-10-01 This timely book refocuses the debate about school choice programs with a nonpartisan assessment of the nation s largest and longest running private school voucher program the high profile Milwaukee experiment and finds that the system undercuts the promise of school choice The authors argue that the Milwaukee experiment has not resulted in the one element necessary for school choice to be effective an accountability system in which good schools thrive and poor schools close They show that most ingredients of a robust market are missing Well informed consumers parents are not the norm State fiscal incentives are counterproductive and competition among public and choice schools is difficult to discern They conclude that school choice could succeed if certain conditions were met and they offer guidelines to strengthen accountability and repair the voucher system      **Bilingual Education in Massachusetts** Christine H. Rossell,Keith Baker,1996 Massachusetts is one of only nine states in the country to require bilingual education in all school districts where there is a sufficient number of limited English proficient LEP students Moreover Massachusetts has set the lowest threshold for mandatory bilingual education in the country Observations of actual classroom practice demonstrates that these students are not all receiving the same style of education Generally only Spanish speaking students are taught to read write in their native language while also receiving some native language instruction in other academic subjects as existing law requires Students from virtually all other groups though enrolled in bilingual education receive instruction almost exclusively in English with at most a few hours per week of enrichment in their native languages cultures Twenty five years after passage of the bilingual education law in Massachusetts there is still no proof that the mandated approach to teaching works better than other approaches such as intensive English instruction Not only is there no proof from Massachusetts but there is none from the many studies that have been conducted in other states If one can draw any conclusion it is that teaching a LEP student in their native language is at least marginally detrimental to their acquisition of English To order contact Pioneer Institute 85 Devonshire Street 8th Floor Boston MA 02109 617 723 2277      *Competition in Education* David J.
