Global Development Finance 2004 - The Changing Face of Finance, 2004 This publication contains the World Bank's annual review of global financial conditions facing developing countries. This volume, the first part of a two-volume set, looks at recent trends in and prospects for financial flows to developing countries. It highlights sources of vulnerability and risk in the recovery of private finance flows, including the likely increases in interest rates in advanced economies and volatility in major currencies and financial markets, as well as problems of macroeconomic management in developing countries. It also presents the World Bank's assessment of the global outlook in the light of the recent economic recovery. Please note that the two-volume set, including summary and country data tables for 136 countries as well as summary data for regions and income groups, is also available separately. Progressive Policies for Economic Development

Alfredo Saad-Filho,2021-07-28 Despite the unprecedented gravity of the challenges posed by global warming most political systems have not given them the required priority The oil industry has resisted and many countries have taken only token measures to reduce emissions and mitigate the worst effects In this context this book examines the progressive options available to today s developing countries as they face the limitations of neoliberalism and the existential challenge of global warming Examining the cases of both low income fossil fuel dependent economies and large middle income economies this book argues that for all developing economies the best way forward includes green macroeconomic policies articulated with progressive industrial and social policies thus allowing these countries to achieve economic diversification build alternative drivers of growth and deliver improvements in the distribution of income wealth and power There is urgent need for this progressive policy agenda grounded on heterodox economics committed to social integration and the reduction of multiple inequalities to improve the economic outcomes for these countries improve the lives of citizens and meet global climate targets The book argues that capitalism challenges the possibility of free and dignified existence while climate change challenges the possibility of life itself and that these challenges must be confronted together Since neoliberal capitalism will not adopt the necessary policies to reduce carbon emissions rapidly it must be overthrown not only for ethical or logical reasons or to shift to better arrangements for the functioning of society but in order to preserve the conditions for life itself This agenda for progressive economic development is essential reading for anyone interested in heterodox economics
