Neo-Piagetian Theories of Cognitive Development Andreas Demetriou, Anastasia Efklides, Dr Michael Shayer, Michael Shayer, 2005-06-20

Educationalists espoused Piaget's theory of cognitive development with enthusiasm in the late 1960's Since then however Piaget's models have been widely criticised and have fallen out of favour The Neo Piagetians as they have been dubbed attempt to preserve the best of traditional Piagetian ideas and combine them with the results of recent empirical research In this collection an international array of the world's leading scholars show how new research and diverse research traditions can be reconciled with many of Piaget's models to provide useful insights into many of the problems faced by researchers in educational settings

Indiana School Journal and Teacher, 1897 *The Princeton Dictionary of Buddhism* Robert E. Buswell, Jr., Donald S. Lopez, Jr., 2013-11-24 The most comprehensive and authoritative dictionary of Buddhism ever produced in English. With more than 5 000 entries totaling over a million words this is the most comprehensive and authoritative dictionary of Buddhism ever produced in English. It is also the first to cover terms from all of the canonical Buddhist languages and traditions: Sanskrit, Pali, Tibetan, Chinese, Japanese, and Korean. Unlike reference works that focus on a single Buddhist language or school, The Princeton Dictionary of Buddhism bridges the major Buddhist traditions to provide encyclopedic coverage of the most important terms, concepts, texts, authors, deities, schools, monasteries, and geographical sites from across the history of Buddhism. The main entries offer both a brief definition and a substantial short essay on the broader meaning and significance of the term covered. Extensive cross references allow readers to find related terms and concepts. An appendix of Buddhist lists, for example, the four noble truths and the thirty-two marks of the Buddha, a timeline, six maps, and two diagrams are also included. Written and edited by two of today's most eminent scholars of Buddhism and more than a decade in the making, this landmark work is an essential reference for every student, scholar, or practitioner of Buddhism and for anyone else interested in Asian religion, history, or philosophy. The most comprehensive dictionary of Buddhism ever produced in English. More than 5 000 entries totaling over a million words. The first dictionary to cover terms from all of the canonical Buddhist languages and traditions: Sanskrit, Pali, Tibetan, Chinese, Japanese, and Korean. Detailed entries on the most important terms, concepts, texts, authors, deities, schools, monasteries, and geographical sites in the history of Buddhism. Cross references and appendixes that allow readers to find related terms and look up equivalent terms in multiple Buddhist languages. Includes a list of Buddhist lists, a timeline, and maps. Also contains selected terms and names in Thai, Burmese, Vietnamese, Lao, Khmer, Sinhalese, Newar, and Mongolian.

Becoming a Word Learner Roberta Michnick Golinkoff, Kathryn Hirsh-Pasek, Lois Bloom, Linda B. Smith, Amanda L. Woodward, Nameera Akhtar, Michael Tomasello, George Hollich, 2000-11-02 Language acquisition is a contentious field of research occupied by cognitive and developmental psychologists, linguists, philosophers, and biologists. Perhaps the key component to understanding how language is mastered is explaining word acquisition. At twelve months an infant learns new words slowly and laboriously, but at twenty months he or she acquires an average of ten new words per day. How can we explain this phenomenal change? A theory of word acquisition will not only deepen our

understanding of the nature of language but will provide real insight into the workings of the developing mind In the latest entry in Oxford's Counterpoints series Roberta Golinkoff and Kathryn Hirsh Pasek will present competing word acquisition theories that have emerged in the past decade Each theory will be presented by the pioneering researcher Contributors will include Lois Bloom of Columbia University Linda Smith of Indiana University Amanda Woodward of the University of Chicago Nameera Akhtar of the University of California Santa Cruz and Michael Tomasello of the Max Planck Institute The editors will provide introductory and summary chapters to help assess each theoretical model Roberta Golinkoff has been the director of The Infant Language Project at the University of Delaware since 1974 For the past decade she has collaborated with Kathryn Hirsh Pasek of Temple University to solve the question of language acquisition in children

In Search of Certainty Mark Burgess, 2015-04-09

Quite soon the world's information infrastructure is going to reach a level of scale and complexity that will force scientists and engineers to approach it in an entirely new way The familiar notions of command and control are being thwarted by realities of a faster denser world of communication where choice variety and indeterminism rule The myth of the machine that does exactly what we tell it has come to an end What makes us think we can rely on all this technology What keeps it together today and how might it work tomorrow Will we know how to build the next generation or will we be lulled into a stupor of dependence brought about by its conveniences In this book Mark Burgess

focuses on the impact of computers and information on our modern infrastructure by taking you from the roots of science to the principles behind system operation and design To shape the future of technology we need to understand how it works or else what we don't understand will end up shaping us This book explores this subject in three parts Part I Stability describes the fundamentals of predictability and why we have to give up the idea of control in its classical meaning Part II Certainty describes the science of what we can know when we don't control everything and how we make the best of life with only imperfect information Part III Promises explains how the concepts of stability and certainty may be combined to approach information infrastructure as a new kind of virtual material restoring a continuity to human computer systems so that society can rely on them
